1	Introduction	1
1.1	Overview	1
1.2	Basics	2
1.2.1	Interacting with <i>Maxima</i>	2
1.2.2	The <i>wxMaxima</i> Screen	4
1.2.3	Mathematical Functions	6
1.2.4	Referring to and Evaluating Expressions	7
1.2.5	Sequences, Lists, and Sets	9
1.3	Solving Algebraic Equations	11
1.3.1	Single Equation	12
1.3.2	Systems of Equations	13
1.3.3	Numerical Methods	14
1.4	Calculus	18
1.4.1	Differentiation	18
1.4.2	Integration	19
1.4.3	Limits	22
1.4.4	Taylor and Maclaurin Series	22
1.5	Differential Equations	23
1.5.1	Numerical Analysis	24
1.5.2	Second-Order ODEs	24
1.5.3	Extensions	25
1.6	Simplifying and Manipulating Expressions	25
1.6.1	Simplification	25
1.6.2	Factoring and Expanding Expressions	26
1.7	Plotting	27
1.7.1	Two-Dimensional Graphs	28
1.7.2	Graphing Points	30
1.7.3	Three-Dimensional Graphs	31
1.7.4	Graphs of Implicit and Parametric Functions	32

1.7.5	Scenarios	33
1.7.6	Default Settings	34
	References	35
2	Simple Economic Models	37
2.1	Production Possibilities	37
2.1.1	An Illustrative Example	37
2.1.2	Opportunity Costs	38
2.1.3	Shifting PPC	40
2.2	Competitive Markets	41
2.2.1	Demand Curves and Supply Curves	42
2.2.2	Equilibrium	43
2.2.3	Disequilibrium	45
2.2.4	Price Ceilings	45
2.2.5	Shifts	47
2.3	Elasticities	49
2.3.1	Price Elasticity	49
2.3.2	Other Elasticities	53
2.4	Taxes and Efficiency	57
2.4.1	Tax Incidence	57
2.4.2	Consumer Surplus	58
2.4.3	Producer Surplus	64
2.4.4	Combined Surpluses and Efficiency	65
3	Demand Theory: Preferences	69
3.1	A Utility Function	69
3.1.1	Graphical Representation	70
3.1.2	Marginal Utility	72
3.1.3	Cobb–Douglas and CES Functions	74
3.2	Indifference Curves	74
3.2.1	Graphical Representation	74
3.2.2	Defining Indifference Curves	75
3.2.3	Marginal Rates of Substitution	77
3.2.4	Limiting Cases	80
3.3	“Bliss” and Negative Marginal Utility	81
3.3.1	Indifference Curves and the Bliss Point	83
	References	85
4	Demand Theory: Constraints and Optimization	87
4.1	Budgets and Budget Constraints	87
4.1.1	Nominal vs. Relative Values	88
4.1.2	Budget Lines with Rationing and with Subsidies	88
4.2	Indifference Curves and Choice	90
4.2.1	Optimization: Choosing the Best Combination	91
4.2.2	Nonhomothetic Functions	94

4.2.3	Corner Solutions	96
4.2.4	An Inferior Good	98
4.3	Lagrangian Multipliers	101
4.3.1	Illustration of the Lagrangian Multiplier	103
4.3.2	Multiple Constraints	104
4.3.3	Expenditure Minimization	105
4.3.4	The Indirect Utility Function	105
4.4	Second-Order Conditions	107
4.4.1	Functions of One Variable	108
4.4.2	Functions of More than One Variable	110
	References	117
5	Preferences and Demand	119
5.1	The CES Utility Function	119
5.1.1	The Uncompensated Demand Curve	121
5.1.2	Compensation	123
5.1.3	An Alternative Measure	126
5.2	A Giffen Good	128
5.2.1	Analyzing Consumer Behavior	130
5.2.2	The Income Effect	131
5.2.3	The Price Effect	132
5.2.4	Income and Substitution Effects of a Price Change	133
5.2.5	The Price Consumption Curve and the Income Consumption Curve	135
5.2.6	Graphing the ICC and PCC	136
	References	138
6	Production Theory	139
6.1	Introduction	139
6.2	An Illustrative Function	140
6.3	Returns to Scale	141
6.3.1	Ranges of Positive and Negative Returns to Scale	141
6.3.2	Increasing and Decreasing Returns: Fixed Proportions	142
6.4	Production with Variable Proportions	145
6.5	Varying a Single Input	146
6.6	Interactions Between Inputs	148
6.7	Isoquants and Substitution	149
6.7.1	Elasticity of Substitution	150
6.7.2	Effect of L on mrs	150
6.7.3	Illustration	150
6.8	Homotheticity Revisited	151
7	Cost Theory	153
7.1	Overview	153
7.2	The Optimal Input Mix	154

7.3	Long-Run Cost Curves	155
7.3.1	The Total Cost Curve in the Long Run	155
7.3.2	Per-Unit Curves in the Long Run	157
7.4	Short-Run Costs	159
7.5	Long-Run and Short-Run Costs Using Isoquants	162
7.6	Fixed and Variable Short-Run Costs	164
7.7	Long-Run Average Cost as a Planning Curve	165
8	Firm and Industry Supply in the Short-Run	169
8.1	An Illustrative Cost Function	169
8.2	Selecting a Quantity	171
8.2.1	A General Statement	172
8.2.2	The Price-Taking Firm	172
8.2.3	The Price-Searching Firm	172
8.2.4	Section Summary	177
8.3	The Price-Taking Firm in the Short Run	178
8.3.1	Market Elasticity, Firm Size, and the Firm's Marginal Revenue	178
8.3.2	Determining Quantity	179
8.3.3	The Firm and the Industry	181
	Reference	183
9	Long-Run Supply	185
9.1	Introduction	185
9.2	A Constant-Cost Industry	186
9.2.1	Firm Supply	187
9.2.2	Long-Run Equilibrium	189
9.2.3	Long-Run and Short-Run Equilibria	190
9.3	A Variable Cost Industry	193
9.3.1	The Value of α	194
9.3.2	Industry Supply	195
9.4	An Industry with Non-identical Firms	197
9.4.1	Profits, Rents, and Shifting Cost Curves	199
9.4.2	Industry Supply	200
9.4.3	Least-Cost Production in a Competitive Industry	201
9.4.4	The Fourth Case	204
	Reference	205
10	Competitive Markets: Extensions and Application	207
10.1	Demand and Supply Shifts	207
10.2	Examples	209
10.2.1	Base Values	209
10.2.2	Constant-Elasticity Curves	210
10.2.3	Linear Curves	211

10.3	Allocative Efficiency	213
10.3.1	Consumer Surplus and Producer Surplus	214
10.3.2	Efficiency and Equilibrium	216
10.3.3	An Excise Tax	217
10.3.4	Demand, Supply, and Value	219
	References	219
11	General Equilibrium	221
11.1	The Model's Assumptions	221
11.2	Production	222
11.2.1	The Edgeworth Production Box	222
11.2.2	Initial Production Levels and Isoquants	223
11.2.3	A More Efficient Allocation	225
11.2.4	The Production Contract Curve	226
11.2.5	Contract Curve and Production Possibilities	228
11.2.6	Efficiency and Resource Prices	230
11.3	Relative Product Prices	231
11.4	Product Value and Resource Cost	232
11.4.1	The Supply Curve for Good X	233
11.4.2	Finding LX, Given PX	234
11.5	Distributing Output: Consumption	235
11.5.1	Distributing Output	235
11.5.2	Indifference Curves	236
11.5.3	The Consumption Contract Curve	238
11.6	Demand and Equilibrium	240
11.6.1	Incomes and Demand	240
11.6.2	Equilibrium Values	243
11.7	Summary	244
11.8	Summary of Specifications and Results	245
	Reference	246
12	Price-Searcher Markets	247
12.1	Overview	247
12.2	Monopoly	248
12.2.1	Quantity, Price, and Marginal Revenue	249
12.2.2	Profit Maximization Illustrations	251
12.2.3	Consumer Surplus and Deadweight Loss	254
12.2.4	Shifting Marginal Cost: An Excise Tax	255
12.3	Upward-Sloping Marginal Revenue	259
12.4	Monopolistic Competition	262
12.4.1	A Constant-Cost Industry	263
12.4.2	Equilibrium	265
12.4.3	An Increasing-Cost Industry	269
12.4.4	Equilibrium	271

12.4.5	Firm-Specific Cost	272
12.4.6	Economic Efficiency	276
	References	280
13	Nonlinear Pricing: Capturing Consumer Surplus	281
13.1	Review and Introduction	281
13.1.1	Pricing Mechanisms for Capturing Surplus	282
13.1.2	Conditions for Capturing Surplus	283
13.1.3	Market Segmentation	283
13.2	First-Degree Price Discrimination and Two-Part Pricing	284
13.2.1	A Special Case: Two-Part Pricing, Identical Buyers	286
13.2.2	Heterogeneous Buyers and Pricing Schedules	288
13.3	Price Discrimination in Segmented Markets	292
13.3.1	Constant Marginal Cost	293
13.3.2	Variable-Cost Price Discrimination	294
13.4	Imperfect Price Discrimination and Product Line Pricing	297
13.4.1	Separate Markets and Price Discrimination	298
13.4.2	Imperfect Market Segmentation	299
13.4.3	Pricing Complementary Goods	300
	Reference	301
14	Oligopoly	303
14.1	Introduction and Overview	303
14.1.1	Game Theory	304
14.1.2	Games of Oligopoly Behavior	304
14.2	The Cournot Model	305
14.2.1	Firms' Optimal Reactions	306
14.2.2	Solution	308
14.2.3	Increasing the Number of Firms	314
14.3	The Stackelberg Model	316
14.4	The Bertrand Model	318
14.4.1	The Competitive Equilibrium	321
14.4.2	An Alternative Specification	323
14.5	Nonidentical Products	325
14.5.1	The Bertrand Model	325
14.5.2	The Cournot Model	328
14.5.3	The Stackelberg Model	330
