Contents

Part I Integrated Healthcare Systems

1 Modeling Patient Flows Through the Health care System 3
Randolph Hall, David Belson, Pavan Murali, and Maged Dessouky

2 Interdependency of Hospital Departments and Hospital-Wide Patient Flows 43
Alexander Kolker

3 Hospitals and Clinical Facilities, Processes, and Design for Patient Flow 65
Michael Williams

Part II Crowding and the Consequences of Delay

4 Emergency Department Crowding: The Nature of the Problem and Why It Matters 97
Kirk Jensen

5 The Consequences of Emergency Department Crowding and Delays for Patients 107
Megan McHugh

6 Access to Surgery and Medical Consequences of Delays 129
Boris Sobolev, Adrian Levy, and Lisa Kuramoto

Part III Demand, Prioritization and Appointments

7 Breakthrough Demand–Capacity Management Strategies to Improve Hospital Flow, Safety, and Satisfaction 153
Linda Kosnik

8 Managing Patient Appointments in Primary Care 173
Sergei Savin

9 Waiting Lists for Surgery 197
Emilio Cerdá, Laura de Pablos, and Maria V. Rodriguez

10 Triage in Nonemergency Services 229
Katherine Harding and Nicholas Taylor

Part IV Modeling and Analysis Tools

11 Personnel Staffing and Scheduling 253
Michael Warner

12 Discrete-Event Simulation of Health care Systems 273
Sheldon H. Jacobson, Shane N. Hall, and James R. Swisher

13 Process Mapping of a Regional Trauma System 311
David C. Evans, Douglas L. Andrusiek, and Boris Sobolev

14 Forecasting Demand for Regional Health Care 333
Peter Congdon

15 Queueing Analysis in Health Care 361
Linda Green

16 Rapid Distribution of Medical Supplies 385
Maged Dessouky, Fernando Ordóñez, Hongzhong Jia, and Zhihong Shen

Part V Implementing Change

17 Using a Diagnostic to Focus Hospital Flow Improvement Strategies 413
Roger Resar

18 Improving Patient Satisfaction Through Flow 429
Kirk Jensen

19 Mayo Post Acute Care Program and Care Continuum 447
Mark Lindsay

20 A Logistics Approach for Hospital Process Improvements 473
Jan Vissers

21 Managing a Patient Flow Improvement Project 507
David Belson
