Contents

Preface . . . . . *ix*
Contributors . . . . . *xv*

1 Chiral Recognition in Separation Science: An Overview 1
Gerhard K.E. Scriba

2 Enantioseparations by Thin-Layer Chromatography 29
Massimo Del Bubba, Leonardo Checchini, Alessandra Cincinelli, and Luciano Lepri

3 Gas-Chromatographic Enantioseparation of Unfunctionalized Chiral Hydrocarbons: An Overview 45
Volker Schurig and Diana Kreidler

4 HPLC Enantioseparation on Cyclodextrin-Based Chiral Stationary Phases 69
Yong Wang and Siu Choon Ng

5 Enantioseparations by High-Performance Liquid Chromatography Using Polysaccharide-Based Chiral Stationary Phases: An Overview 81
Bezhan Chankvetadze

6 Common Screening Approaches for Efficient Analytical Method Development in LC and SFC on Columns Packed with Immobilized Polysaccharide-Derived Chiral Stationary Phases 113
Pilar Franco and Tong Zhang

7 Chiral Separations by HPLC on Immobilized Polysaccharide Chiral Stationary Phases 127
Imran Ali, Zeid A. AL-Othman, and Hassan Y. Aboul-Enein

8 Enantioseparations by High-Performance Liquid Chromatography Using Macrocyclic Glycopeptide-Based Chiral Stationary Phases: An Overview 137
István Ilisz, Anita Aranyi, Zoltán Pataj, and Antal Péter

9 Enantioseparations of Primary Amino Compounds by High-Performance Liquid Chromatography Using Chiral Crown Ether-Based Chiral Stationary Phase 165
Myung Ho Hyun

10 Screening of Pirkle-Type Chiral Stationary Phases for HPLC Enantioseparations 177
Gregory K. Webster and Ted J. Szczerba

11 Enantioseparations by High-Performance Liquid Chromatography Based on Chiral Ligand-Exchange 191
Benedetto Natalini, Roccaldo Sardella, and Federica Ianni

12 Enantioseparations by High-Performance Liquid Chromatography Using Molecularly Imprinted Polymers 209
David A. Spivak

13 Chiral Mobile Phase Additives in HPLC Enantioseparations 221
Lushan Yu, Shengjia Wang, and Su Zeng

14 Chiral Benzofurazan-Derived Derivatization Reagents for Indirect Enantioseparations by HPLC 233
Toshimasa Toyo'oka

15 Separation of Racemic 1-(9-Anthryl)-2,2,2-trifluoroethanol by Sub-/Supercritical Fluid Chromatography 249
Xiqin Yang, Leo Hsu, and Gerald Terfloth

16 Chiral Separations by Simulated Moving Bed Method Using Polysaccharide-Based Chiral Stationary Phases. 257
Toshiharu Minoda

17 Enantioseparations by Capillary Electrophoresis Using Cyclodextrins as Chiral Selectors 271
Gerhard K.E. Scriba and Pavel Jáč

18 Application of Dual Cyclodextrin Systems in Capillary Electrophoresis Enantioseparations 289
Anne-Catherine Servais and Marianne Fillet

19 Enantioseparations in Nonaqueous Capillary Electrophoresis Using Charged Cyclodextrins 297
Anne-Catherine Servais and Marianne Fillet

20 Use of Macrocyclic Antibiotics as the Chiral Selectors in Capillary Electrophoresis 307
Chengke Li and Jingwu Kang

21 Application of Polymeric Surfactants in Chiral Micellar Electrokinetic Chromatography (CMEKC) and CMEKC Coupled to Mass Spectrometry 319
Jun He and Shahab A. Shamsi

22 Cyclodextrin-modified Micellar Electrokinetic Chromatography for Enantioseparations 349
Wan Aini Wan Ibrahim, Dadan Hermawan, and Mohd Marsin Sanagi

23 Cyclodextrin-Mediated Enantioseparation in Microemulsion Electrokinetic Chromatography. 363
Claudia Borst and Ulrike Holzgrabe

24 Chiral Separations by Capillary Electrophoresis Using Proteins as Chiral Selectors 377
Jun Haginaka

25 Enantioseparation by Chiral Ligand-Exchange Capillary Electrophoresis 393
Yi Chen and Lijuan Song

26 Experimental Design Methodologies in the Optimization of Chiral CE or CEC Separations: An Overview 409
Bieke Dejaegher, Debby Mangelings, and Yvan Vander Heyden

27 Chiral Capillary Electrophoresis–Mass Spectrometry 429
Elena Domínguez-Vega, Antonio L. Crego, and Maria Luisa Marina

28 Application of Chiral Ligand-Exchange Stationary Phases in Capillary Electrochromatography. 443
Martin G. Schmid

29 Polysaccharide-Derived Chiral Stationary Phases in Capillary Electrochromatography Enantioseparations. 457
Zhenbin Zhang, Hanfa Zou, and Junjie Ou

30 Open Tubular Molecular Imprinted Phases in Chiral Capillary Electrochromatography. 469
Won Jo Cheong and Song Hee Yang

31 Enantioseparations in Capillary Electrochromatography Using Sulfated Poly β-Cyclodextrin-Modified Silica-Based Monolith as Stationary Phase. 489
Ruijuan Yuan and Guosheng Ding

32 Cyclodextrin-Mediated Enantioseparations by Capillary Electrochromatography. 505
Dorothee Wistuba and Volker Schurig
