## PART I CLONING AND HETEROLOGOUS EXPRESSION OF ION CHANNEL GENES

1 Approaches to Cloning of Pain-Related Ion Channel Genes . . . . .	3
<i>Armen N. Akopian</i>	
2 Mammalian Expression Systems and Transfection Techniques . . . . .	21
<i>Daunia Laurenti and Lezanne Ooi</i>	
3 Use of <i>Escherichia coli</i> for the Production and Purification of Membrane Proteins . . . . .	33
<i>Vincent G.L. Postis, Andrea E. Rawlings, Amelia Lesiuk, and Stephen A. Baldwin</i>	
4 Transient Overexpression of Genes in Neurons Using Nucleofection. . . . .	55
<i>Hannah M. Kirton, Louisa Pettinger, and Nikita Gamper</i>	
5 Viral Gene Delivery: Optimized Protocol for Production of High Titer Lentiviral Vectors . . . . .	65
<i>James Hewinson, Julian F.R. Paton, and Sergey Kasparov</i>	

## PART II ELECTROPHYSIOLOGICAL METHODS TO STUDY ION CHANNEL FUNCTIONS

6 Two-Electrode Voltage Clamp . . . . .	79
<i>Bingcai Guan, Xingjuan Chen, and Hailin Zhang</i>	
7 Conventional Micropipette-Based Patch Clamp Techniques . . . . .	91
<i>Jonathan D. Lippiat and David C. Wrighton</i>	
8 Recording of Ion Channel Activity in Planar Lipid Bilayer Experiments. . . . .	109
<i>Eleonora Zakharian</i>	
9 Recording Macroscopic Currents in Large Patches from <i>Xenopus</i> Oocytes . . . . .	119
<i>Tibor Rohacs</i>	
10 Combined Single-Channel and Macroscopic Recording Techniques to Analyze Gating Mechanisms of the Large Conductance Ca <sup>2+</sup> and Voltage Activated (BK) Potassium Channel. . . . .	133
<i>Nguyen V. Nguyen, Aleksandra Gruslova, Wojciech A. Kosiba, and Bin Wang</i>	
11 Perforated Whole-Cell Patch-Clamp Recording . . . . .	149
<i>John E. Linley</i>	
12 Piezo-Electrically Driven Mechanical Stimulation of Sensory Neurons. . . . .	159
<i>Jizhe Hao, Jérôme Ruel, Bertrand Coste, Yann Roudaut, Marcel Crest, and Patrick Delmas</i>	

13	Automated Planar Patch-Clamp . . . . .	171
	<i>Carol J. Milligan and Clemens Möller</i>	
14	Recording Single-Channel Currents Using “Smart Patch-Clamp” Technique . . . . .	189
	<i>Anamika Bhargava and Julia Gorelik</i>	

### PART III IMAGING AND FLUORESCENCE METHODS TO STUDY ION CHANNELS

15	Using Total Internal Reflection Fluorescence Microscopy to Observe Ion Channel Trafficking and Assembly . . . . .	201
	<i>Sarah Schwarzer, Gregory I. Mashanov, Justin E. Molloy, and Andrew Tinker</i>	
16	Förster Resonance Energy Transfer-Based Imaging at the Cell Surface of Live Cells . . . . .	209
	<i>Sonya M. Bierbower and Mark S. Shapiro</i>	
17	The Use of Dansyl-Calmodulin to Study Interactions with Channels and Other Proteins . . . . .	217
	<i>Alessandro Alaimo, Covadonga Malo, Pilar Areso, Kerman Aloria, Oscar Millet, and Alvaro Villarroel</i>	
18	Imaging and Quantification of Recycled K <sub>ATP</sub> Channels . . . . .	233
	<i>Christopher J. Cockcroft</i>	

### PART IV BIOCHEMICAL AND STRUCTURE-FUNCTIONAL APPROACHES IN ION CHANNEL STUDIES

19	Generation of Antibodies That Are Externally Acting Isoform-Specific Inhibitors of Ion Channels . . . . .	245
	<i>Jacqueline Naylor and David J. Beech</i>	
20	Site-Directed Mutagenesis to Study the Structure–Function Relationships of Ion Channels. . . . .	257
	<i>Wei Yang and Lin-Hua Jiang</i>	
21	Cysteine-Based Cross-Linking Approach to Study Inter-domain Interactions in Ion Channels . . . . .	267
	<i>Lin-Hua Jiang</i>	
22	Analysis of Ca <sup>2+</sup> Binding Sites in the MthK RCK Domain by X-Ray Crystallography . . . . .	277
	<i>Frank J. Smith and Brad S. Rothberg</i>	
23	Isotope Labeling Strategies for Analysis of an Ion Channel Cytoplasmic Domain by NMR Spectroscopy . . . . .	289
	<i>Karin Abarca-Heidemann, Elke Duchardt-Ferner, Jens Woehnert, and Brad S. Rothberg</i>	

### PART V STUDYING ION CHANNELS IN NATIVE TISSUES

24	Recording Dendritic Ion Channel Properties and Function from Cortical Neurons . . . . .	303
	<i>Mala M. Shah</i>	

25	M-Current Recording from Acute DRG Slices . . . . .	311
	<i>Kirstin E. Rose, Sylvain Gigout, and Nikita Gamper</i>	
26	Studying Ion Channels in Human Erythrocytes by Direct and Indirect Means . . . . .	321
	<i>Stephan M. Huber</i>	
27	Recording Ion Channels in Isolated, Split-Opened Tubules. . . . .	341
	<i>Elena Mironova, Vladislav Bugay, Oleh Pochynyuk, Alexander Staruschenko, and James D. Stockand</i>	
28	Single-Channel Analysis of TRPC Channels in the Podocytes of Freshly Isolated Glomeruli . . . . .	355
	<i>Daria V. Ilatovskaya and Alexander Staruschenko</i>	
29	Ca <sup>2+</sup> Imaging as a Tool to Assess TRP Channel Function in Murine Distal Nephrons . . . . .	371
	<i>Mykola Mamenko, Oleg Zaika, Roger G. O'Neil, and Oleh Pochynyuk</i>	
30	Patch-Clamping <i>Drosophila</i> Sensory Neurons . . . . .	385
	<i>Volodymyr Kucher, Benjamin A. Eaton, James D. Stockand, and Nina Boiko</i>	
PART VI ION CHANNELS AS RESEARCH TOOLS		
31	Production and Validation of Recombinant Adeno-Associated Virus for Channelrhodopsin Expression in Neurons . . . . .	401
	<i>John Y. Lin</i>	
32	Optical Control of Ligand-Gated Ion Channels . . . . .	417
	<i>Stephanie Szobota, Catherine McKenzie, and Harald Janovjak</i>	
	<i>Index</i> . . . . .	437
