

Contents

Part I Semiclassical and Adiabatic Limits

Local Smoothing with a Prescribed Loss for the Schrödinger Equation	3
Hans Christianson and Jared Wunsch	
Propagation Through Trapped Sets and Semiclassical Resolvent Estimates	7
Kiril Datchev and András Vasy	
Space–Adiabatic Theory for Random–Landau Hamiltonian: Results and Prospects	11
Giuseppe De Nittis	
Microlocal Analysis of FIOs with Singularities	15
Raluca Felea	
A Nonlinear Adiabatic Theorem for Coherent States	19
Clotilde Fermanian Kammerer and Rémi Carles	
Adiabatic Limits and Related Lattice Point Problems	25
Yuri A. Kordyukov and Andrey A. Yakovlev	
The Effective Hamiltonian in Curved Quantum Waveguides and When It Does Not Work	29
David Krejčířík and Helena Šediváková	
The Adiabatic Limit of the Laplacian on Thin Fibre Bundles	33
Jonas Lampart and Stefan Teufel	
Adiabatic Limit with Isolated Degenerate Fibres	37
Richard B. Melrose	
Microlocal Analysis and Adiabatic Problems: The Case of Perturbed Periodic Schrödinger Operators	45
Gianluca Panati	

Recent Results in Semiclassical Approximation with Rough Potentials ...	49
T. Paul	

Part II Singular spaces

On the Closure of Elliptic Wedge Operators	55
Juan B. Gil, Thomas Krainer, and Gerardo A. Mendoza	
Generalized Blow-Up of Corners and Fiber Products	59
Chris Kottke and Richard Melrose	
Trace Expansions for Elliptic Cone Operators	63
Thomas Krainer, Juan B. Gil, and Gerardo A. Mendoza	
Spectral Geometry for the Riemann Moduli Space	69
Rafé Mazzeo	
Invariant Integral Operators on the Oshima Compactification of a Riemannian Symmetric Space: Kernel Asymptotics and Regularized Traces	73
Pablo Ramacher and Aprameyan Parthasarathy	
Pseudodifferential Operators on Manifolds with Foliated Boundaries	77
Frédéric Rochon	
The Determinant of the Laplacian on a Conically Degenerating Family of Metrics	81
David A. Sher	

Part III Spectral and Scattering Theory

Relatively Isospectral Noncompact Surfaces	87
Pierre Albin, Clara Aldana, and Frédéric Rochon	
Microlocal Analysis of Scattering Data for Nested Conormal Potentials	91
Suresh Eswarathasan	
Equidistribution of Eisenstein Series for Convex Co-compact Hyperbolic Manifolds	95
Colin Guillarmou and Frédéric Naud	
Lower Bounds for the Counting Function of an Integral Operator	99
Yuri Safarov	
The Identification Problems in SPECT: Uniqueness, Non-uniqueness and Stability	103
Plamen Stefanov	

Eigenvalues and Spectral Determinants on Compact Hyperbolic Surfaces	105
Alexander Strohmaier and Ville Uski	
 Part IV Wave Propagation and Topological Applications	
 A Support Theorem for a Nonlinear Radiation Field	111
Dean Baskin and António Sá Barreto	
 Propagation of Singularities Around a Lagrangian Submanifold of Radial Points	113
Nick Haber and András Vasy	
 Local Energy Decay for Several Evolution Equations on Asymptotically Euclidean Manifolds	117
Dietrich Häfner and Jean-François Bony	
 Rayleigh Surface Waves and Geometric Pseudo-differential Calculus	121
Sönke Hansen	
 Topological Implications of Global Hypoellipticity	125
Gerardo A. Mendoza	
 Chern-Simons Line Bundle on Teichmüller Space	129
Sergiu Moroianu and Colin Guillarmou	
 A Simple Diffractive Boundary Value Problem on an Asymptotically Anti-de Sitter Space	133
Ha Pham	
 Quantization in a Magnetic Field	137
Radu Purice, Viorel Iftimie, and Marius Măntoiu	
 Price's Law on Black Hole Space-Times	145
Daniel Tataru	

Microlocal Methods in Mathematical Physics and Global
Analysis

Grieser, D.; Teufel, S.; Vasy, A. (Eds.)

2013, IX, 148 p. 2 illus. in color., Softcover

ISBN: 978-3-0348-0465-3

A product of Birkhäuser Basel
