
Contents

1	First Concepts	1
1.1	Sets and First Countings	1
1.2	Induction	5
1.3	Paths in Boards	9
1.4	A Couple of Tricks	12
1.5	Problems	15
2	The Pigeonhole Principle	17
2.1	The Pigeonhole Principle	17
2.2	Ramsey Numbers	20
2.3	The Erdős-Szekeres Theorem	22
2.4	An Application in Number Theory	23
2.5	Problems	24
3	Invariants	27
3.1	Definition and First Examples	27
3.2	Colorings	31
3.3	Problems Involving Games	33
3.4	Problems	37
4	Graph Theory	43
4.1	Basic Concepts	43
4.2	Connectedness and Trees	47
4.3	Bipartite Graphs	51
4.4	Matchings	53
4.5	Problems	55
5	Functions	59
5.1	Functions in Combinatorics	59
5.2	Permutations	63
5.3	Counting Twice	69
5.4	The Erdős-Ko-Rado Theorem	72
5.5	Problems	74
6	Generating Functions	77
6.1	Basic Properties	77

6.2	Fibonacci Numbers	80
6.3	Catalan Numbers	82
6.4	The Derivative	85
6.5	Evaluating Generating Functions	87
6.6	Problems	90
7	Partitions	93
7.1	Partitions	93
7.2	Stirling Numbers of the First Kind	94
7.3	Stirling Numbers of the Second Kind	96
7.4	Problems	98
8	Hints for the Problems	101
8.1	Hints for Chap. 1	101
8.2	Hints for Chap. 2	102
8.3	Hints for Chap. 3	104
8.4	Hints for Chap. 4	106
8.5	Hints for Chap. 5	108
8.6	Hints for Chap. 6	109
8.7	Hints for Chap. 7	111
9	Solutions to the Problems	113
9.1	Solutions for Chap. 1	113
9.2	Solutions for Chap. 2	120
9.3	Solutions for Chap. 3	128
9.4	Solutions for Chap. 4	138
9.5	Solutions for Chap. 5	146
9.6	Solutions for Chap. 6	156
9.7	Solutions for Chap. 7	164
Notation		169

Index		173

Problem-Solving Methods in Combinatorics

An Approach to Olympiad Problems

Soberón, P.

2013, IX, 174 p. 65 illus., 10 illus. in color., Softcover

ISBN: 978-3-0348-0596-4

A product of Birkhäuser Basel
