

Contents

Untranslated Gene Regions and Other Non-coding Elements	1
1 Introduction	1
2 Promoter	3
2.1 Types of Promoter	4
2.2 Complex Factor Interactions	6
2.3 Alternative Promoters	6
2.4 Bidirectional Promoters	7
2.5 Conclusion	9
3 5' Untranslated Region	9
3.1 Structure	9
3.2 Regulatory Motifs	14
3.3 Conclusion	19
4 Intronic Regions	19
4.1 Organization and Length	20
4.2 Introns in the UTRs	21
4.3 Intron Function	22
4.4 Regulatory Elements: Enhancers	23
5 3' Untranslated Region	25
5.1 MicroRNAs and the 3'UTR	25
5.2 Stabilisation and AU-Rich Elements	28
5.3 Structure	29
5.4 Conclusions	33
6 Non-Coding RNAs	34
6.1 Promoter Associated RNAs (PROMPTs)	35
6.2 Short Interfering RNA (siRNA)	35
6.3 Piwi-Interacting RNAs (piRNAs)	36
6.4 Small Nuclear RNA (snRNA)	37
6.5 <i>Cis</i> -Natural Antisense Transcripts	37
6.6 Long Non-coding RNAs	38
6.7 RNAs as Extracellular Signalling Molecules	38
6.8 Pseudogenes and Non-coding RNA	38

6.9 Non-coding Capacity in Primates 39

6.10 Competing Endogenous RNAs. 40

6.11 Chimeric RNAs 41

7 Conclusion 42
