

Contents

1	The Biology of Toll-Like Receptors and NOD-Like Receptors: The Toggles of Inflammation	1
1.1	Brief Description of Pattern Recognition Receptors	1
1.2	The Biology of Toll-Like Receptors	2
1.3	The Biology of NOD-Like Receptors	7
1.4	MicroRNA Regulation of Expression of Pattern Recognition Receptors	10
	References	12
2	Pattern Recognition Receptors, Gene Polymorphisms, and Cancer: A Double-Edged Sword	27
2.1	Introduction	27
	References	30
3	Structural Genomic Variation in <i>TLR4</i> Gene and Cancer	33
3.1	Structural Genomic Variation in <i>TLR4</i> Gene and Precancerous Gastric Lesions/Gastric Cancer	33
3.2	Structural Genomic Variation in <i>TLR4</i> Gene and Colorectal Cancer	36
3.3	Structural Genomic Variation in <i>TLR4</i> Gene and Lymphoma	38
3.4	Structural Genomic Variation in <i>TLR4</i> Gene and Cervical Cancer	39
3.5	Structural Genomic Variation in <i>TLR4</i> Gene and Endometrial Cancer	40
3.6	Structural Genomic Variation in <i>TLR4</i> Gene and Breast Cancer	41
3.7	Structural Genomic Variation in <i>TLR4</i> Gene and Nasopharyngeal Carcinoma	41
3.8	Structural Genomic Variation in <i>TLR4</i> Gene and Gallbladder Cancer	42

3.9	Structural Genomic Variation in <i>TLR4</i> Gene and Bladder Cancer	42
3.10	Structural Genomic Variation in <i>TLR4</i> Gene and Hepatocellular Carcinoma	43
3.11	Structural Genomic Variation in <i>TLR4</i> Gene and Malignant Melanoma	43
3.12	Conclusions.	43
	References	51
4	Structural Genomic Variation in Other Toll-Like Receptors and Cancer	57
4.1	Structural Genomic Variation in Toll-Like Receptor 6-1-10 Gene Cluster and Cancer	57
4.2	Structural Genomic Variation in Toll-Like Receptor 2 and Cancer	58
4.3	Structural Genomic Variation in Toll-Like Receptor 9 and Cancer	60
4.4	Structural Genomic Variation in Toll-Like Receptors 3, 5, 7, 8, and Cancer	61
4.5	Conclusions.	71
	References	73
5	Structural Genomic Variation in Toll-Like Receptor Signaling Pathway and Cancer	77
5.1	Structural Genomic Variation in TIRAP/MAL and Cancer	77
5.2	Structural Genomic Variation in MyD88 and Cancer	78
5.3	Structural Genomic Variation in TICAM1, TIRP/TRAM/TICAM2 and Cancer.	79
5.4	Structural Genomic Variation in IRAK1–IRAK4 and Cancer	79
5.5	Structural Genomic Variation in TRAF1–TRAF6 and Cancer	81
5.6	Structural Genomic Variation in TOLLIP, TAK-1, TAB-1, TAB-2, PKR, RIP-1, TBK-1, and Cancer	82
5.7	Structural Genomic Variation in IFN Regulatory Factors and Cancer	82
5.8	Conclusions.	84
	References	97
6	Structural Genomic Variation in Toll-Like Receptor Pathway and Prostate Cancer.	101
	References	120

7 Structural Genomic Variation in NOD-Like Receptors and Cancer	123
7.1 Structural Genomic Variation in NOD2 and Colorectal Cancer	123
7.2 Structural Genomic Variation in NOD2 and Gastric Cancer	139
7.3 Structural Genomic Variation in NOD2 and Lymphoma	142
7.4 Structural Genomic Variation in NOD2 and Cancer of the Genitourinary Tract.	143
7.5 Structural Genomic Variation in NOD2 and Other Cancer Types	144
7.6 Structural Genomic Variation in NOD1 and Cancer	144
7.7 Conclusions.	145
References	147
8 Structural Genomic Variation in Pattern Recognition Receptors and Cardiovascular Diseases.	153
8.1 Atherosclerosis: Infections Take Their Toll.	153
8.2 Pattern Recognition Receptors, Gene Polymorphisms, and Atherosclerosis: The Clinical Significance of the Chain	154
8.3 The Association of Pattern Recognition Receptor Polymorphisms with Myocardial Infarction and Stroke.	155
8.4 Should We Take Pattern Recognition Receptor Polymorphisms into Account While Assessing a Risk of Myocardial Infarction and Stroke?	157
References	165
9 Hot Spots in the Field: Where Should We Go?	169
Index	177

Genomics of Pattern Recognition Receptors
Applications in Oncology and Cardiovascular Diseases

Kutikhin, A.G.; Yuzhalin, A.E.

2013, XI, 185 p., Hardcover

ISBN: 978-3-0348-0687-9
