1	Introduction and Motivations	1
	References	6
2	Social and Communication Networks	9
2.1	Topology of Social Networks	11
2.1.1	Definitions and Notations.	11
2.1.2	Weighted Networks.	19
2.2	Communication Networks.	21
2.2.1	Topological Properties.	24
2.2.2	Correlation Between Topological Structure and Tie Weights	26
2.3	Traditional Network Modeling	28
2.4	Temporal Properties of Social Networks.	31
2.4.1	Nodes and Ties are Not Persistent.	31
2.4.2	Inter-Event Times and Bursty Behavior.	33
2.4.3	Temporal Correlations: Motifs and Group Conversations.	35
2.5	Discussion	36
	References	37
3	Social Strategies in Communication Networks	45
3.1	Static Social Strategies.	48
3.1.1	The Boundaries of Human Communication	49
3.1.2	Time Allocation Diversity	52
3.2	Social Strategies, Bursty Activity and Tie Dynamics	55
3.2.1	Apparent Dynamics of Social Connectivity	56
3.2.2	Detection of Ties Creation/Removal	58
3.3	Dynamical Communication Strategies	61
3.3.1	Statistical Evidence for the Conservation of Social Capacity.	62
3.3.2	Dynamics of Tie Creation/Removal.	64
3.3.3	Social Capacity and Social Activity	65

3.4	Social Strategies and Network Topology	66
3.4.1	Assortative Mixing in Dynamical Social Strategies	68
3.4.2	Social Strategies and Information Diffusion	71
3.4.3	Lifetime Evolution and Sex Differences	73
3.5	Dynamical Granovetter Effect	75
3.6	Discussion	78
	References	81
4	Predicting Tie Creation and Decay	85
4.1	Conventional Approaches to the Link Prediction Problem	87
4.2	Characterizing a Social Tie	89
4.2.1	Topological Features for Tie Persistence and Decay	90
4.2.2	Measuring Temporal Features of Social Ties	91
4.3	Correlations Between Tie Features	94
4.4	Temporal Patterns and Tie Persistence/Decay	96
4.4.1	Active Ties and Open Ties	96
4.4.2	Tie Prediction Based on Time-Dependent Features	98
4.4.3	Measuring the Performance of the Model	100
4.5	Discussion	103
	References	104
5	Information Spreading on Communication Networks	107
5.1	Modeling Information Spreading Phenomena	109
5.1.1	Uncorrelated and Static Networks	111
5.1.2	The Role of Topological Properties	112
5.1.3	The Impact of Non-poissonian Activity Patterns	114
5.2	Information Spreading in Communication Networks	114
5.2.1	Characterizing Human Communication Patterns	115
5.2.2	SIR Model on Real Networks	117
5.2.3	The Dynamical Strength of Social Ties	119
5.3	Static Hubs and Dynamical Hubs	123
5.4	The Role of Ties Dynamics in Information Spreading	124
5.5	Towards a Dynamical Model of Human Interactions	125
5.6	Discussion	127
	References	128
6	Conclusion, Contributions and Vision for the Future	131
6.1	Overview and Conclusion	131
6.2	Summary of Contributions and Their Implications	132
6.3	Vision for the Future	139
	References	142
	Appendix A Data and Materials	145
