

Contents

Pseudo-Gradient Based Particle Swarm Optimization Method for Nonconvex Economic Dispatch	1
Vo Ngoc Dieu, Peter Schegner and Weerakorn Ongsakul	
Energy Consumption Impacted by Climate Change Application: Case Study Astara	29
Mostafa Jafari	
Computer Tools for Modelling and Evaluating the Potential of Energy Storage Systems with Reference to the Greek Islands Case	51
Christos Sbiliris and Vassilis Dedoussis	
Particle Swarm Intelligence Based Optimization Controller Applied to Two Area Interconnected Power Systems	69
V. Jeyalakshmi and P. Subburaj	
Allocation and Size Evaluation of Distributed Generation	87
Partha Kayal and C. K. Chanda	
Multiperiod Economic Dispatch: A Decomposition Approach	103
Antonio Marmolejo and Igor Litvinchev	
Developing a Framework for Energy Technology Portfolio Selection	111
Hamid Davoudpour and Maryam Ashrafi	
Investigation of Cost Reduction in Residential Electricity Bill using Electric Vehicle at Peak Times	123
Onur Elma and Ugur Savas Selamogullari	

Wind Prediction in Malaysia	135
S. W. Lee, B. C. Kok, K. C. Goh and H. H. Goh	
Genetic Algorithm Based Multi Objective Optimization of Building Design.	149
Faranak Ebrahimnejad Farahani and Armin Ebrahimi Milani	
Mathematical Modelling of the Influence of Thermal Power Plant on the Aquatic Environment with Different Meteorological Condition by Using Parallel Technologies.	165
Alibek Issakhov
