

Contents

A Convergent Algorithm for Finding KL-Optimum Designs and Related Properties	1
Giacomo Aletti, Caterina May, and Chiara Tommasi	
Robust Experimental Design for Choosing Between Models of Enzyme Inhibition	11
Anthony C. Atkinson and Barbara Bogacka	
Checking Linear Regression Models Taking Time into Account	19
Wolfgang Bischoff	
Optimal Sample Proportion for a Two-Treatment Clinical Trial in the Presence of Surrogate Endpoints	27
Atanu Biswas, Buddhananda Banerjee, and Saumen Mandal	
Estimating and Quantifying Uncertainties on Level Sets Using the Vorob'ev Expectation and Deviation with Gaussian Process Models	35
Clément Chevalier, David Ginsbourger, Julien Bect, and Ilya Molchanov	
Optimal Designs for Multiple-Mixture by Process Variable Experiments	45
Roelof L.J. Coetzer and Linda M. Haines	
Optimal Design of Experiments for Delayed Responses in Clinical Trials	55
Vladimir Dragalin	
Construction of Minimax Designs for the Trinomial Spike Model in Contingent Valuation Experiments	63
Ellinor Fackle-Fornius and Linda Wänström	
Maximum Entropy Design in High Dimensions by Composite Likelihood Modelling	73
Davide Ferrari and Matteo Borrotti	

Randomization Based Inference for the Drop-The-Loser Rule	81
Nancy Flournoy, Arkaitz Galbete, José Antonio Moler, and Fernando Plo	
Adaptive Bayesian Design with Penalty Based on Toxicity-Efficacy Response	91
Lei Gao and William F. Rosenberger	
Randomly Reinforced Urn Designs Whose Allocation Proportions Converge to Arbitrary Prespecified Values	99
Andrea Ghiglietti and Anna Maria Paganoni	
Kernels and Designs for Modelling Invariant Functions: From Group Invariance to Additivity	107
David Ginsbourger, Nicolas Durrande, and Olivier Roustant	
Optimal Design for Count Data with Binary Predictors in Item Response Theory	117
Ulrike Graßhoff, Heinz Holling, and Rainer Schwabe	
Differences between Analytic and Algorithmic Choice Designs for Pairs of Partial Profiles	125
Heiko Großmann	
Approximate Bayesian Computation Design (ABCD), an Introduction . .	135
Markus Hainy, Werner G. Müller, and Henry P. Wynn	
Approximation of the Fisher Information Matrix for Nonlinear Mixed Effects Models in Population PK/PD Studies	145
Sergei Leonov and Alexander Aliev	
c-Optimal Designs for the Bivariate Emax Model	153
Bergrun Tinna Magnusdottir	
On the Functional Approach to Locally D-Optimum Design for Multiresponse Models	163
Viatcheslav B. Melas, Lyudmila A. Krylova, and Dariusz Uciński	
Sample Size Calculation for Diagnostic Tests in Generalized Linear Mixed Models	171
Tobias Mielke and Rainer Schwabe	
D-Optimal Designs for Lifetime Experiments with Exponential Distribution and Censoring	179
Christine H. Müller	
Convergence of an Algorithm for Constructing Minimax Designs	187
Hans Nyquist	
Extended Optimality Criteria for Optimum Design in Nonlinear Regression	195
Andrej Pázman and Luc Pronzato	

Optimal Design for Multivariate Models with Correlated	
Observations	203
Andrey Pepelyshev	
Optimal Designs for the Prediction of Individual Effects in Random	
Coefficient Regression	211
Maryna Prus and Rainer Schwabe	
D-Optimum Input Signals for Systems with Spatio-Temporal	
Dynamics	219
Ewaryst Rafajłowicz and Wojciech Rafajłowicz	
Random Projections in Model Selection and Related Experimental	
Design Problems	229
Ewa Skubalska-Rafajłowicz and Ewaryst Rafajłowicz	
Optimal Design for the Bounded Log-Linear Regression Model	237
HaiYing Wang, Andrey Pepelyshev, and Nancy Flournoy	
Index	247

mODa 10 – Advances in Model-Oriented Design and Analysis

Proceedings of the 10th International Workshop in Model-Oriented Design and Analysis Held in Łagów Lubuski, Poland, June 10–14, 2013

Ucinski, D.; Atkinson, A.C.; Patan, M. (Eds.)

2013, XX, 249 p. 43 illus., 13 illus. in color., Softcover

ISBN: 978-3-319-00217-0
