## **Part I Steady Boundary Conditions in the Trajectories of States for Optimal Management of Complex Multi-Reservoir Water Distribution System**

<b>1</b>	<b>Introduction</b>	<b>3</b>
<b>2</b>	<b>Steady Optimisation Time, ST</b>	<b>7</b>
2.1	Steady Optimisation Time, ST	7
2.1.1	Quality Coefficient	10
2.1.2	State Equation of Reservoirs	12
2.1.3	Solution for the Optimising Task	13
2.1.4	Computer Simulations	16
2.1.5	Summary	24
<b>3</b>	<b>Transient Optimisation Horizon</b>	<b>27</b>
3.1	Transient Optimisation Horizon	27
3.2	Free Optimisation Time, FT	28
3.2.1	Quality Coefficient	28
3.2.2	The System State Equation	28
3.2.3	Solution for the Optimisation Task	30
3.2.4	For the Vector of Free Optimisation Start Times	31
3.2.5	Computer Simulation	34
3.3	Summary	39

**Part II Related Boundary Conditions in the Trajectories of States  
for Optimal Management of Complex Multi-Reservoir  
Water Distribution System**

<b>4</b>	<b>Introduction</b>	43
<b>5</b>	<b>Free Optimisation Time, FT</b>	45
5.1	Free Optimisation Time, FT	45
5.1.1	Quality Coefficient	49
5.1.2	State Equation for Reservoirs	52
5.1.3	Optimisation Task Solution	54
<b>6</b>	<b>Steady Optimisation Time, ST</b>	69
6.1	Steady Optimisation Time, ST	69
6.2	Quality Index	69
6.3	The System State Equation	71
6.4	Optimisation Task Solutions	72
<b>7</b>	<b>Summary</b>	81
	<b>References</b>	85

Management of Complex Multi-reservoir Water  
Distribution Systems using Advanced Control Theoretic  
Tools and Techniques

Chmielowski, W.

2013, VI, 85 p. 22 illus., Softcover
