# Contents

**1 Introduction** . . . . . 1
1.1 Introduction . . . . . 1
1.2 Location . . . . . 1
1.3 Aim and Scope of Study . . . . . 3
1.4 Methodology . . . . . 3
1.4.1 Work Flow . . . . . 3
1.4.2 Field Work . . . . . 4
1.4.3 Laboratory Work . . . . . 5
1.4.4 Previous Works . . . . . 5
1.5 Depositional Framework of Tertiary Basins (Miocene), Northern Egypt . . . . . 15
References . . . . . 19

**2 Stratigraphy** . . . . . 23
2.1 Introduction . . . . . 23
2.2 Stratigraphy of the Area . . . . . 25
2.3 Geochronology . . . . . 25
2.3.1 Previous Work and Discussion . . . . . 30
2.3.2 Absolute Ages from Strontium Isotopes . . . . . 31
References . . . . . 34

**3 Sedimentary Facies** . . . . . 37
3.1 Introduction . . . . . 37
3.2 Facies Associations . . . . . 37
3.2.1 Tide-Dominated Estuary . . . . . 38
3.2.2 Open Shelf . . . . . 59
3.2.3 Tide-Dominated Delta . . . . . 70
3.2.4 Depositional Environment of Moghra Formation . . . . . 75
3.2.5 Tide-Dominated Estuaries, Open Shelf and Deltas of the Moghra Formation . . . . . 75
3.2.6 The Broader Setting of the Moghra Estuaries . . . . . 79
References . . . . . 80

**4 Petrography of Carbonates (Microfacies Association)** . . . . . 89
4.1 Introduction. . . . . 89
4.2 Bioturbated-Fossiliferous Carbonate Grain-Dominated Packstone Facies Association (FA6). . . . . 90
4.2.1 Fossiliferous Limestone (F15) . . . . . 90
4.2.2 Discussion. . . . . 104
4.2.3 Diagenesis. . . . . 104
4.3 Carbonate Lithofacies as Paleolatitude Indicator Problem Within Moghra Formation . . . . . 105
References . . . . . 107

**5 Sequence Stratigraphy** . . . . . 109
5.1 Introduction: Background and Rationale . . . . . 109
5.2 Sequence Architecture of Moghra Formation. . . . . 112
5.3 Sequence Boundaries and Maximum Flooding Intervals . . . . . 113
5.4 Sequence Boundaries and Maximum Flooding Intervals in Moghra Formation . . . . . 114
5.4.1 Moghra Formation SB1 . . . . . 117
5.4.2 Sb2 . . . . . 117
5.4.3 Sb3 . . . . . 118
5.4.4 Sb4 . . . . . 118
5.4.5 Sb5 . . . . . 119
5.4.6 Sb6 . . . . . 120
5.4.7 Sb7 . . . . . 121
5.4.8 Sb8 . . . . . 121
5.4.9 Sb9 . . . . . 122
5.4.10 Sb10. . . . . 123
5.4.11 SB11 (between Marmrica and Moghra Formation). . . . 123
5.5 Description of Depositional Sequences and Component Cycles . . . . . 123
5.5.1 Sequence 1 (4–30 m thick; Fig. 5.9a). . . . . 125
5.5.2 Sequence 2 (12–40 m thick; Figs. 2.1 and 5.2) . . . . . 126
5.5.3 Sequence 3 (2–20 m thick; Figs. 2.1 and 5.2) . . . . . 126
5.5.4 Sequence 4 (2–28 m thick; Fig. 5.10). . . . . 128
5.5.5 Sequence 5 (8–48 m thick; Figs. 2.1 and 5.2) . . . . . 128
5.5.6 Sequence 6 (12–56 m thick; Figs. 2.1 and 5.2) . . . . . 130
5.5.7 Sequence 7 (9–60 m thick; Figs. 2.1 and 5.2) . . . . . 131
5.5.8 Sequence 8 (12–56 m thick; Figs. 2.1 and 5.2) . . . . . 133
5.5.9 Sequence 9 (21–50 m thick; Figs. 2.1 and 5.2) . . . . . 134
5.5.10 Sequence 10 (20–50 m thick; Figs. 2.1 and 5.2) . . . . . 135
5.5.11 Sequence 11 (20–40 m thick, Figs. 2.1 and 5.2) (Marmarica Limestone). . . . . 136

5.6 Discussion . . . 136
5.7 Tectonic Subsidence and Accommodation . . . 138
References . . . 138

**6 Model for Development of Moghra Estuarine Complex** . . . 141
6.1 Model for Moghra Formation . . . 142
6.2 Why Moghra is Estuarine but not Within an Incised Valley? . . . 150
6.3 Preferred Model for the Cycles of the Moghra Fm . . . 151
References . . . 151

**7 Conclusion** . . . 155
7.1 Facies Associations . . . 155
7.2 Sequence Stratigraphy . . . 157
7.3 The Broader Setting of the Moghra Estuaries . . . 159
7.4 Recommendations for Future Work . . . 159
