|--------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>1 Corporate Performance Interpretation and Measuring Problems . . . . .</b>                                                 | <b>1</b>  |
| 1.1 Interpretation of Corporate Performance on the Grounds of the Industrial Organisation Theory . . . . .                     | 1         |
| 1.2 Corporate Performance Versus Corporate Finance Theory . . . .                                                              | 4         |
| 1.3 Classification of Corporate Performance Determinants . . . . .                                                             | 7         |
| 1.4 The Nature and Genesis of Financial Ratios as Characteristics of Corporate Performance . . . . .                           | 14        |
| 1.5 Selected Classification Systems of Financial Ratios . . . . .                                                              | 17        |
| 1.6 Limitations of Financial Ratios . . . . .                                                                                  | 19        |
| <b>2 Country and Industry Factors as Determinants of Corporate Performance: Research Methodology . . . . .</b>                 | <b>23</b> |
| 2.1 Review of Previous Research on Corporate Performance Diversity . . . . .                                                   | 23        |
| 2.2 Relative Importance of Country and Industry Effects in Stock Returns in Light of Previous Research . . . . .               | 29        |
| 2.2.1 Country Effect as the Main Source of Stock Returns Volatility . . . . .                                                  | 30        |
| 2.2.2 The Importance of Industry Factors for Market Rates of Return . . . . .                                                  | 32        |
| 2.2.3 Impact of Integration on the Relative Importance of Country and Industry Factors . . . . .                               | 34        |
| 2.2.4 Financial Ratios Versus Market Returns . . . . .                                                                         | 37        |
| 2.2.5 Summary of Studies Review . . . . .                                                                                      | 38        |
| 2.3 Empirical Research of the Impact of Country and Industry Factors on Corporate Performance: Aims and Data Description . . . | 39        |
| 2.4 Methodology of Corporate Performance Diversity Analysis . . .                                                              | 43        |

|                                                                                                             |            |
|-------------------------------------------------------------------------------------------------------------|------------|
| <b>3 Analysis of the Corporate Performance Diversity in the Selected European Union Countries . . . . .</b> | <b>53</b>  |
| 3.1 Initial Analysis of the Financial Ratios in Industries and Countries . . . . .                          | 53         |
| 3.2 Cross-Industry Analysis of Ratios Variance . . . . .                                                    | 64         |
| 3.3 Cross-Country Analysis of Ratios Variance . . . . .                                                     | 71         |
| 3.4 Analysis of Ratios Variance in Time . . . . .                                                           | 78         |
| 3.5 Industry and Country Effect Through Two-Way Analysis of Ratios Variance . . . . .                       | 79         |
| <b>4 Cross-Industry and Cross-Country Comparative Cluster Analysis . . . . .</b>                            | <b>83</b>  |
| 4.1 Cluster Analysis of Industries . . . . .                                                                | 83         |
| 4.2 Comparative Cluster Analysis of Industries Across Countries . . .                                       | 91         |
| 4.3 Cluster Analysis of Countries . . . . .                                                                 | 92         |
| 4.4 Comparative Cluster Analysis of Countries Across Industries . . .                                       | 98         |
| 4.5 Relative Importance of Country and Industry Effect in the Light of Cluster Analysis . . . . .           | 100        |
| <b>5 Factors Affecting Corporate Performance in Countries and Industries . . . . .</b>                      | <b>111</b> |
| 5.1 Factors Influencing Corporate Performance in Countries and Industries . . . . .                         | 111        |
| 5.2 Factors Influencing Corporate Performance in Countries . . . . .                                        | 113        |
| 5.3 Factors Influencing Corporate Performance in Industries . . . . .                                       | 115        |
| 5.4 Two-Dimensional Map of Countries and Industries . . . . .                                               | 117        |
| <b>Ending . . . . .</b>                                                                                     | <b>123</b> |
| <b>References . . . . .</b>                                                                                 | <b>129</b> |
| <b>Appendices . . . . .</b>                                                                                 | <b>143</b> |

Corporate Performance

A Ratio-Based Approach to Country and Industry  
Analyses
