

Contents

Part I Introductory Remarks

1	Introduction	3
1.1	Ultrafast Excited-State Dynamics	3
1.2	The Born-Oppenheimer Approximation.	6
1.3	Pump-Probe.	9
1.3.1	Time-Resolved Photoelectron Spectroscopy and Mass Spectrometry.	10
1.3.2	Probing Dynamics by TRPES and TRMS	11
	References	13

Part II Experimental Methods

2	Experimental Setup	17
2.1	The Laser System and Optical Setup	17
2.2	Time-of-Flight Spectrometers	19
	References	22
3	Fitting of Experimental Data and Cross-Correlation	23
	References	26

Part III Theoretical Methods

4	Nuclear Dynamics	29
4.1	Multi-Configuration Time-Dependent Hartree	30
4.1.1	The MCTDH Equations of Motion.	30
4.1.2	Applicational Aspects of MCTDH	32
4.1.3	Parameterized Basis Functions in MCTDH	33

4.2	Full Multiple Spawning and Ab Initio Multiple Spawning.	35
4.2.1	The FMS Equations of Motion	35
4.2.2	The Spawning Approach to an Adaptive Basis Set.	37
4.2.3	Applicational Aspects of FMS and AIMS.	39
4.3	The Vibronic Coupling Hamiltonian.	43
4.3.1	Applicational Aspects of the VCHAM	44
	References	45
5	Time-Resolved Photoelectron Spectra	47
5.1	Perturbative Trajectory-Based Calculation.	47
5.2	Non-Perturbative Wavepacket-Based Calculation.	51
	References	53
6	Electronic Structure	55
6.1	Coupled-Cluster Methods	55
6.2	Multi-Reference Methods	56
	References	57
 Part IV Results and Discussion		
7	The Cycloketones	61
7.1	Time-Resolved Experiments	62
7.1.1	A Representative Model	67
7.2	Wavepacket Simulations	69
7.2.1	Model Hamiltonian	69
7.2.2	Population Transfer Dynamics.	70
7.2.3	Time-Resolved Photoelectron Spectra.	77
7.3	Conclusion	78
	References	80
8	The Cyclopentadienes	81
8.1	Electronic Structure	82
8.2	Dynamics Simulations	84
8.2.1	Setting the Timescale of Population Transfer	84
8.2.2	Nuclear Dynamics	85
8.2.3	Electronic Dynamics	87
8.3	The Excited State Reaction Mechanism	90
8.4	Time-Resolved Photoelectron Spectra.	91
8.5	Conclusion	95
	References	95

9	Dithiane	99
9.1	Electronic Structure	99
9.2	Time-Resolved Mass Spectrometry.	101
9.3	Conclusion	103
	References	103

Part V Concluding Remarks

10	Summarizing Discussion	107
	Appendix A: Supporting Information for Chapter 7	111
	Appendix B: Supporting Information for Chapter 8	127

The Non-Ergodic Nature of Internal Conversion

An Experimental and Theoretical Approach

Scheby Kuhlman, Th.

2013, XVIII, 131 p., Hardcover

ISBN: 978-3-319-00385-6
