Topological Derivative for Multi-Scale Linear Elasticity Models in Three Spatial Dimensions	1
Antonio André Novotny	
Topological Sensitivity Analysis for Two-Dimensional Heat Transfer Problems Using the Boundary Element Method	11
C. T. M. Anflor and R. J. Marczak	
Design of Compliant Mechanisms with Stress Constraints Using Topology Optimization.	35
Luís Renato Meneghelli and Eduardo Lenz Cardoso	
A Genetic Algorithm for Optimization of Hybrid Laminated Composite Plates.	49
M. A. Luersen and R. H. Lopez	
Delamination Diagnosis in Composite Beam Using AIS and BGA Algorithms Based on Vibration Characteristics	73
B. Mohebbi, F. Abbasidoust, M. M. Ettefagh and H. Biglari	
On Active Vibrations Control of a Flexible Rotor Running in Flexibly-Mounted Journal Bearings	91
Mohamed M. Eimadany	
Multi-Disciplinary Constraint Design Optimization Based on Progressive Meta-Model Method for Vehicle Body Structure	103
S. J. Heo, I. H. Kim, D. O. Kang, W. Y. Ki, S. M. H. Darwish, W. C. Choi and H. J. Yim	
Optimization Under Uncertainties	117
Rafael H. Lopez and André T. Beck
