1	Introduction	1
	References	4
2	A Decision-Theoretic Approach to Forecasting	7
2.1	The Mathematical Model of Decision Making	7
2.2	Minimax, Admissible, and Bayesian Families of Decision Rules	8
2.3	The Bayesian Forecast Density	13
2.4	Forecasting Discrete States by Discriminant Analysis	17
2.4.1	The Mathematical Model	17
2.4.2	Complete Prior Knowledge of $\{\pi_i, p_i^0(\cdot)\}$	18
2.4.3	Prior Uncertainty	23
	References	29
3	Time Series Models of Statistical Forecasting	31
3.1	Regression Models of Time Series	31
3.2	Stationary Time Series Models	33
3.3	ARIMA(p, d, q) Time Series Model	35
3.4	Nonlinear Time Series	39
3.4.1	A General Nonlinear Model	39
3.4.2	Bilinear Model BL(p, q, P, Q)	40
3.4.3	Functional-Coefficient Autoregression Model FAR(p, d)	40
3.4.4	Generalized Exponential Autoregression Model EXPAR(p, d)	41
3.4.5	Threshold Autoregression Model TAR(k)	41
3.4.6	ARCH(p) Model	42
3.4.7	GARCH(p, q) Model	42
3.5	Multivariate Time Series Models	42
3.5.1	Multivariate Stationary Time Series	42
3.5.2	Vector Autoregression Model VAR(p)	43
3.5.3	Vector Moving Average Model VMA(q)	45

3.5.4	VARMA(p, q) Model	46
3.5.5	System of Simultaneous Equations (SSE) Model	47
3.6	Discrete Time Series	48
3.6.1	Markov Chains	48
3.6.2	Markov Chains of Order s	49
3.6.3	DAR(s) Model of Jacobs and Lewis	51
3.6.4	DMA(q) Model	51
3.6.5	INAR(m) Model	51
	References	52
4	Performance and Robustness Characteristics in Statistical Forecasting	55
4.1	A General Formulation of the Statistical Forecasting Problem	55
4.2	The Risk Functional and Optimality of Forecasting Statistics	58
4.3	Classification of Model Distortions	65
4.4	Robustness Characteristics	69
	References	72
5	Forecasting Under Regression Models of Time Series	73
5.1	Optimal Forecasting Under Complete Prior Information	73
5.2	Regression Forecasting Under Parametric Prior Uncertainty	76
5.2.1	Bayesian Approach in the PU-P Setting	76
5.2.2	Joint Estimation Using the Maximum Likelihood (ML) Principle	77
5.2.3	Using the Plug-In Principle	78
5.3	Logistic Regression Forecasting	83
5.4	Nonparametric Kernel Regression Forecasting	89
5.5	Nonparametric $k - NV$ -Regression Forecasting	98
5.6	Some Other Nonparametric Regression Forecasting Methods	101
5.6.1	Functional Series Expansions of Regression Functions	101
5.6.2	Spline Smoothing	103
5.6.3	Regressograms and Median Smoothing	104
	References	104
6	Robustness of Time Series Forecasting Based on Regression Models	105
6.1	Robustness of Least Squares Forecasting Under Functional Distortions of Multiple Linear Regression Models	105
6.1.1	Formulation of the Problem	105
6.1.2	The Hypothetical Regression Model and Its Functional Distortions	106
6.1.3	Robustness Characteristics of Forecasting Algorithms ...	108
6.1.4	Robustness Analysis of Least Squares Forecasting	109

6.2	Robustness of Least Squares Forecasting Under Functional Distortions of Multivariate Linear Regression Models	116
6.2.1	Mathematical Description of Model Distortions	116
6.2.2	Robustness Evaluation of Least Squares Forecasting	118
6.3	Robustness of Least Squares Forecasting Under Outliers	120
6.4	Impact of Correlation Between Observation Errors on Forecast Risk	123
6.5	Robust Forecasting Based on M -Estimators Under Functional Distortion.....	126
6.5.1	Construction of a Robust Forecasting Algorithm	126
6.5.2	Evaluation of the Constructed Robust Forecasting Algorithm.....	129
6.5.3	Numerical Examples	136
6.6	Robust Regression Forecasting Under Outliers Based on the Huber Estimator	137
6.7	Local-Median (LM) Forecasting and Its Properties	141
6.7.1	Description of the Method	141
6.7.2	The Breakdown Point	143
6.7.3	Probability Distribution of the LM Forecast	145
6.7.4	Risk of the LM Forecast.....	150
6.7.5	Robustness of LM Forecasting Compared to the Traditional Least Squares Method	152
6.7.6	A Generalization of the LM Method for Multivariate Regression	153
6.7.7	Numerical Results	158
	References.....	161
7	Optimality and Robustness of ARIMA Forecasting	163
7.1	Kolmogorov's Method	163
7.2	Optimal Forecasting Under ARIMA Time Series Models	170
7.2.1	The General Method for Stationary Time Series.....	170
7.2.2	Forecasting Under the $AR(p)$ Model.....	173
7.2.3	Forecasting Under the $MA(q)$ Model	174
7.2.4	Forecasting Under the $ARMA(p, q)$ Model.....	175
7.2.5	Forecasting Under the $ARIMA(p, d, q)$ Model.....	175
7.3	Plug-In Forecasting Algorithms	176
7.3.1	Plug-In Forecasting Algorithms Based on Covariance Function Estimators.....	176
7.3.2	Plug-In Forecasting Algorithms Based on $AR(p)$ Parameter Estimators.....	178
7.3.3	Plug-In Forecasting Algorithms Based on Parameter Estimation of $MA(q)$ Models.....	180

7.3.4	Plug-In Forecasting Algorithms Based on ARMA(p, q) Parameter Estimators	181
7.3.5	Plug-In Forecasting Algorithms Based on ARIMA(p, d, q) Parameter Estimators	182
7.4	Robustness Under Parametric Model Specification Errors	183
7.4.1	The General Case	183
7.4.2	Stationary Time Series Forecasting Under Misspecification of Covariance Functions.....	184
7.4.3	Forecasting of AR(p) Time Series Under Misspecification of Autoregression Coefficients	186
7.5	Robustness Under Functional Innovation Process Distortions in the Mean Value	190
7.6	Robustness of Autoregression Forecasting Under Heteroscedasticity of the Innovation Process	196
7.6.1	The Mathematical Model.....	196
7.6.2	Presence of a Specification Error	197
7.6.3	Least Squares Estimation of θ^0	200
7.7	Robustness of Autoregression Time Series Forecasting Under IO-Outliers	203
7.8	Robustness of Autoregression Time Series Forecasting Under AO Outliers	208
7.9	Robustness of Autoregression Forecasting Under Bilinear Distortion	217
7.9.1	Introduction	217
7.9.2	The Bilinear Model and Its Stationarity Conditions	217
7.9.3	First and Second Order Moments in Stationary Bilinear Time Series Models	218
7.9.4	Robustness of Autoregression Forecasting Under Bilinear Distortion	222
7.9.5	Robustness Analysis of Autoregression Forecasting.....	226
7.9.6	Numerical Results	228
