|----------|-------------------------------------------------|----|
| <b>1</b> | <b>Introduction</b>                             | 1  |
| 1.1      | Liquid Crystals: Complex Anisotropic Fluids     | 1  |
| 1.2      | Microfluidics                                   | 2  |
| 1.3      | Motivation                                      | 2  |
| 1.4      | Thesis Outline                                  | 4  |
|          | References                                      | 4  |
| <b>2</b> | <b>Liquid Crystal Theory</b>                    | 7  |
| 2.1      | Liquid Crystal Mesophases                       | 7  |
| 2.2      | Order Parameter                                 | 9  |
| 2.3      | Landau-de Gennes Theory                         | 12 |
| 2.3.1    | Phase Transition                                | 12 |
| 2.3.2    | Nematoelasticity                                | 14 |
| 2.3.3    | Landau-de Gennes Free Energy                    | 15 |
| 2.4      | Surface Anchoring                               | 16 |
| 2.5      | Anisotropy in Liquid Crystals                   | 18 |
| 2.5.1    | Optical Anisotropy                              | 18 |
| 2.5.2    | Viscosity                                       | 20 |
| 2.6      | Topological Defects                             | 21 |
| 2.7      | Flow of Nematic Liquid Crystals: Nematodynamics | 24 |
| 2.7.1    | Ericksen-Leslie Theory of Nematodynamics        | 25 |
| 2.7.2    | Poiseuille Flow of Nematic Liquid Crystals      | 27 |
| 2.7.3    | Topological Defects in Flow                     | 29 |
| 2.8      | Nematic Colloids                                | 32 |
|          | References                                      | 34 |
| <b>3</b> | <b>Materials and Experimental Methods</b>       | 37 |
| 3.1      | Nematic Liquid Crystal                          | 37 |
| 3.2      | Preparation of the Nematic Colloids             | 39 |
| 3.3      | Microfluidic Confinement and Flow Set-Up        | 40 |
| 3.3.1    | Fabrication of Microfluidic Devices             | 41 |
| 3.3.2    | Flow Setup                                      | 42 |
| 3.3.3    | Functionalization of Microfluidic Devices       | 43 |

|          |                                                                                                 |           |
