

Contents

1	Introduction to Laser Forming and Welding Processes	1
	References	4
2	Analytical Treatment of Laser Forming and Welding Processes	5
2.1	Analytical Formulation of Heating and Stress Field Involving Melting and Solid Heating	5
2.2	Analytical Formulation of Heating and Stress Field Involving Evaporation and Solidification	10
2.3	Findings and Discussions	32
2.3.1	Stationary Source Consideration	33
2.3.2	Moving Source Consideration	36
2.4	Concluding Remarks	37
	References	38
3	Numerical Analysis for Laser Forming and Welding	39
3.1	Numerical Analysis for Laser Forming Process	39
3.1.1	Solid Heating and Stress Field Formation	40
3.1.2	Phase Change and Stress Field Formation	47
3.2	Numerical Analysis for Laser Welding Process	49
3.2.1	Phase Change Including Melting and Evaporation	49
3.2.2	Transiently Developing Vapor Jet	52
3.2.3	Numerical Solution	58
3.2.4	Analysis for Laser Welding	59
3.3	Efficiency Analysis of Welding	64
3.3.1	First Law (Energy) Efficiency	66
3.3.2	Second Law (Exergy) Efficiency	67
3.4	Findings and Discussions	67
3.4.1	Phase Change Process Including Surface Evaporation	68
3.4.2	Laser Multi Spot Heating of Thin Metal Sheet	71
3.4.3	Three-Dimensional Heating and Stress Fields	72

3.4.4	Temperature and Stress Fields for Welding and Forming Process	75
3.4.5	Welding Efficiency	78
3.5	Concluding Remarks	81
	References	83
4	Experimental Analysis for Laser Forming and Welding	85
4.1	Introduction	85
4.2	Lasers Used for Welding and Forming	85
4.3	Analytical Tools for Microstructural Analysis	87
4.4	Mechanical Characterisation of Laser Welded and Bended Sections	88
4.5	Findings and Discussions	90
4.5.1	Bending Angle Measurements, Morphology and Microstructure for Laser Forming	90
4.5.2	Morphology, Microstructure and Mechanical Properties for Laser Welding Process	95
4.5.3	Laser Welding of Hayness 188 Alloy	98
4.5.4	Welding of AISI 316 Steel	100
4.6	Concluding Remarks	104
	References	105

Laser Forming and Welding Processes

Yilbas, B.S.; Akhtar, S.; Shuja, S.Z.

2013, X, 106 p. 48 illus., 6 illus. in color., Hardcover

ISBN: 978-3-319-00980-3
