## Part I   Roots of Ramsey Theory

<b>1</b>	<b>Ramsey's Theorem</b>	3
1.1	Frank Plumpton Ramsey	3
1.2	Ramsey's Theorem	4
1.3	Erdős-Szekeres' Theorem	5
1.4	Erdős-Rado's Canonization Theorem	6
<b>2</b>	<b>From Hilbert's Cube Lemma to Rado's Thesis</b>	9
2.1	Hilbert's Cube Lemma	10
2.2	Schur's Lemma	13
2.3	Van der Waerden's Theorem	15
2.4	Schur's Extension of Van der Waerden's Theorem	18
2.5	Rado's Thesis	20
2.5.1	Partition Regular Systems of Homogenous Linear Equations	20
2.5.2	$(m, p, c)$ -Sets	23
2.5.3	Proof of Rado's Theorem	25
2.5.4	Finite and Infinite Sums	27

## Part II   A Starting Point of Ramsey Theory: Parameter Sets

<b>3</b>	<b>Definitions and Basic Examples</b>	33
3.1	Parameter Words	34
3.1.1	Parameter Words Over the Empty Alphabet	36
3.1.2	Parameter Words Over a One-Element Alphabet	36
3.1.3	Parameter Words Over a Two-Element Alphabet	36
3.1.4	Parameter Words Over a $k$ -Element Alphabet	37
3.1.5	Parameter Words Over $GF(q)$	37

3.2	Parameter Words and Finite Groups.....	38
3.2.1	Parameter Words Over $[\{0\}, GF(q)^*]$ .....	38
3.2.2	Parameter Words Over $[\{a\}, G]$ .....	39
3.2.3	Parameter Words Over $[k, \{e, \pi\}]$ .....	39
<b>4</b>	<b>Hales-Jewett's Theorem</b> .....	<b>41</b>
4.1	Hales-Jewett's Theorem.....	42
4.2	Some Applications .....	45
4.2.1	Arithmetic Progressions .....	45
4.2.2	Gallai-Witt's Theorem.....	45
4.2.3	Deuber's $(m, p, c)$ -Sets .....	46
4.2.4	Idempotents in Finite Algebras .....	48
4.2.5	Lattices and Posets .....	49
4.3	A $*$ -Version.....	49
<b>5</b>	<b>Graham-Rothschild's Theorem</b> .....	<b>53</b>
5.1	Graham-Rothschild's Theorem .....	53
5.2	Applications .....	55
5.2.1	Ramsey's Theorem .....	55
5.2.2	The Dual Ramsey Theorem .....	56
5.2.3	Distributive Lattices .....	56
5.2.4	Finite Unions and Finite Sums .....	57
5.2.5	Linear and Affine Spaces.....	58
<b>6</b>	<b>Canonical Partitions</b> .....	<b>61</b>
6.1	Canonizing Hales-Jewett's Theorem .....	62
6.2	Canonizing van der Waerden's Theorem .....	66
6.3	Canonizing Graham-Rothschild's Theorem.....	67
6.4	Applications .....	75
6.4.1	Finite Unions and Finite Sums .....	75
6.4.2	Boolean Lattices .....	76
6.4.3	Finite Sets .....	77

### Part III Back to the Roots: Sets

<b>7</b>	<b>Ramsey Numbers</b> .....	<b>81</b>
7.1	The Finite Ramsey Theorem: A Constructive Proof.....	81
7.2	Some Exact Values .....	83
7.3	A Lower Bound for Diagonal Ramsey Numbers .....	84
7.4	Asymptotics for Off-Diagonal Ramsey Numbers .....	88
7.5	More than Two Colors .....	94
<b>8</b>	<b>Rapidly Growing Ramsey Functions</b> .....	<b>97</b>
8.1	The Hardy Hierarchy.....	97
8.2	Paris-Harrington's Unprovability Result .....	99

<b>9</b>	<b>Product Theorems</b> .....	105
9.1	A Product Ramsey Theorem .....	106
9.2	Diversification .....	107
9.3	A Product Erdős-Rado Theorem .....	109
<b>10</b>	<b>A Quasi Ramsey Theorem</b> .....	111
10.1	The Upper Bound .....	112
10.2	A Lemma of Erdős .....	113
10.3	The Lower Bound: The Graph Case .....	114
10.4	The Lower Bound: The General Case .....	115
<b>11</b>	<b>Partition Relations for Cardinal Numbers</b> .....	119
11.1	Erdős-Rado's Partition Theorem for Cardinals .....	120
11.2	Negative Partition Relations .....	122
11.3	Dushnik-Miller's Theorem .....	123
11.4	Weakly Compact Cardinals .....	124
11.5	Canonical Partition Relations for Cardinals .....	125

## Part IV Graphs and Hypergraphs

<b>12</b>	<b>Finite Graphs</b> .....	129
12.1	Vertex Colorings .....	130
12.2	Colorings of Edges .....	132
12.3	Colorings of Subgraphs .....	136
12.4	Unbounded Colorings of Subgraphs .....	140
<b>13</b>	<b>Infinite Graphs</b> .....	145
13.1	Rado's Graph .....	145
13.2	Countable-Universal $K_\ell$ -Free Graphs .....	148
13.3	Colorings of Edges .....	150
<b>14</b>	<b>Hypergraphs on Parameter Sets</b> .....	153
14.1	An Induced Hales-Jewett Theorem .....	154
14.1.1	Applications .....	155
14.2	Colorings of Subgraphs: An Alternative Proof .....	157
14.2.1	Partite Graphs .....	157
14.2.2	Amalgamation of Partite Graphs .....	159
14.3	An Induced Graham-Rothschild Theorem .....	161
14.3.1	Partite Hypergraphs .....	162
14.3.2	Amalgamation of Partite Graphs .....	164
14.3.3	Proof of the Induced Graham-Rothschild Theorem .....	167
<b>15</b>	<b>Ramsey Statements for Random Graphs</b> .....	171
15.1	Rödl-Ruciński's Theorem .....	172
15.2	Proof of the 1-Statement .....	173
15.3	Proof of the 0-Statement .....	176

<b>16 Sparse Ramsey Theorems</b> .....	185
16.1 Sparse Graphs and Hypergraphs .....	185
16.2 Sparse Ramsey Families .....	189
16.3 Arithmetic Structures .....	191
16.4 Parameter Sets .....	194
 <b>Part V Density Ramsey Theorems</b>	
<b>17 Szemerédi's Theorem</b> .....	203
<b>18 Density Hales-Jewett Theorem</b> .....	205
18.1 Lines Imply Spaces .....	206
18.2 The Boolean Case: Sperner's Lemma .....	206
18.3 The General Case: Alphabets of Size $k \geq 3$ .....	207
18.3.1 Proof of Lemma 18.6 .....	211
18.3.2 Proof of Lemma 18.7 .....	215
18.3.3 Proof of Lemma 18.8 .....	217
 <b>References</b> .....	221
 <b>Index</b> .....	229

Ramsey Theory for Discrete Structures

Prömel, H.J.

2013, XVI, 232 p. 13 illus., Hardcover

ISBN: 978-3-319-01314-5
