|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Introduction</b>   | <b>1</b>  |
|          | References  | 2         |
| <b>2</b> | <b>Structural Limit States and Reliability Measures</b>                                   | <b>3</b>  |
| 2.1      | Introduction  | 3         |
| 2.2      | Failure Function and Probability of Failure   | 4         |
| 2.3      | Time-Varying Load and Capacity  | 7         |
| 2.4      | Simplified Calculation of Failure Probability<br>for Gaussian Random Variables            | 9         |
| 2.5      | Calculation of Failure Probability for Non-Gaussian<br>Random Variables                   | 10        |
|          | References  | 12        |
| <b>3</b> | <b>Dynamic Structural Response Analysis and Probabilistic<br/>Representation</b>          | <b>13</b> |
| 3.1      | General   | 13        |
| 3.2      | Environmental Modeling  | 14        |
| 3.3      | Dynamic Response Analysis   | 16        |
| 3.4      | Response Statistics for Scalar Gaussian Processes   | 17        |
| 3.5      | Reliability Formulations for Scalar Gaussian Processes                                    | 22        |
| 3.6      | Multi-Dimensional Response Statistics   | 24        |
| 3.6.1    | Introduction  | 24        |
| 3.6.2    | Outcrossing-Rate Analysis   | 25        |
| 3.6.3    | Local Maxima and Extremes   | 26        |
| 3.6.4    | Fatigue Analysis for Multi-Dimensional Processes  | 30        |
|          | References  | 32        |
| <b>4</b> | <b>Categories of On-Line Control Schemes Based<br/>on Structural Reliability Criteria</b> | <b>35</b> |
| 4.1      | General   | 35        |
| 4.2      | Control Schemes Involving Structural Reliability Criteria                                 | 36        |
| 4.2.1    | Introduction  | 36        |
| 4.2.2    | Various Types of Simplified Structural<br>Reliability Indices                             | 36        |

|          |  |           |
|----------|--|-----------|
| 4.2.3    | Simplistic Illustrative Example and Comparison<br>of Reliability Indices . . . . .             | 40        |
| 4.2.4    | Off-Line Control Schemes . . . . .   | 42        |
| 4.2.5    | Control Scheme Based on Reliability Monitoring . . . . .                                       | 43        |
| 4.2.6    | On-Line Control Schemes . . . . .  | 44        |
| 4.3      | Off-Line “Calibration” of LQG Schemes . . . . .  | 46        |
| 4.3.1    | General . . . . .  | 46        |
| 4.3.2    | LQG Control of Stationary Quasi-Static Response . . . . .                                      | 46        |
| 4.3.3    | Alternative Loss Function Based on Structural<br>Failure Cost . . . . .                        | 48        |
| 4.3.4    | The Case with Two-Scale Response Characteristics . . . . .                                     | 52        |
| 4.3.5    | Application to Simplified Example . . . . .  | 54        |
| 4.4      | Concluding Remarks . . . . .   | 55        |
|          | References . . . . .   | 56        |
| <b>5</b> | <b>Example Applications Related to On-Line Control Schemes . . . . .</b>                       | <b>57</b> |
| 5.1      | General . . . . .  | 57        |
| 5.2      | Vessel Dynamics . . . . .  | 58        |
| 5.2.1    | Vessel Motion . . . . .  | 58        |
| 5.2.2    | PID Control Algorithm for Dynamic Positioning . . . . .  | 60        |
| 5.3      | Example of Control Scheme Based on Structural<br>Reliability Monitoring . . . . .              | 61        |
| 5.3.1    | General . . . . .  | 61        |
| 5.3.2    | System Model and Behavior Without Position Control . . . . .                                   | 61        |
| 5.3.3    | System Model and Behavior with Position<br>Control Implemented. . . . .                        | 64        |
| 5.4      | Control Schemes Based on On-Line Computation<br>of Reliability Measures . . . . .              | 70        |
| 5.4.1    | Example 1 . . . . .  | 70        |
| 5.4.2    | Example 2: Position Mooring of Floating<br>Vessel Based on Reliability Index Criteria. . . . . | 87        |
| 5.4.3    | Further Examples of Application . . . . .  | 91        |
| 5.5      | Concluding Remarks . . . . .   | 93        |
|          | References . . . . .   | 94        |
| <b>6</b> | <b>Conclusions . . . . .</b>   | <b>97</b> |

Optimal Stochastic Control Schemes within a Structural  
Reliability Framework

Leira, B.J.

2013, VI, 98 p. 54 illus., 11 illus. in color., Softcover
