

Contents

1	Introduction	1
1.1	Background and Motivation	1
1.2	Objectives of the Book	4
1.3	Outline of the Book	6
2	Literature Review	9
2.1	Introduction	9
2.2	Economists' Formulation of Drug Consumption	10
2.3	Drug Consumption	11
2.3.1	Licit Drug Consumption	12
2.3.2	Illicit Drug Consumption	18
2.4	Cross-Drug Relationships	19
2.5	Econometric Approaches	21
2.6	Data Issues	22
2.7	Summary	23
3	An Overview of Recreational Drug Consumption in Australia	25
3.1	Introduction	25
3.2	The Costs of Recreational Drug Use	27
3.3	Data: The National Drug Strategy Household Survey	28
3.4	Licit Drugs	30
3.4.1	Alcohol	30
3.4.2	Tobacco	34
3.5	Illicit Drugs	37
3.5.1	Marijuana	37
3.5.2	Amphetamines	39
3.5.3	Cocaine	39
3.5.4	Heroin	40
3.6	Illicit Drug Laws in Australia	40
3.6.1	Chronicles of Illicit Drug Law Changes	40
3.6.2	Attitudes to Drug Use and Drug Laws	43
3.7	Summary	43

4	Modelling Consumption of Individual Drugs	45
4.1	Introduction	45
4.2	Economic and Econometric Framework	46
4.3	Legal Drug Consumption	49
4.3.1	Alcohol	49
4.3.2	Beer, Wine and Spirits	55
4.3.3	Tobacco	60
4.4	Illegal Drug Consumption	65
4.5	Summary	70
5	Modelling Multiple Drug Use Using a Multivariate Approach	73
5.1	Introduction	73
5.2	The Multivariate Probit Model for Joint Drug Participation	74
5.3	Marijuana, Cocaine, Heroin, Amphetamines and Tobacco (MCHAT) Consumption: A Multivariate Approach	77
5.3.1	MCHAT: Observed Joint, Conditional and Marginal Probabilities	78
5.3.2	Multivariate Probit Estimates of MCHAT Consumption	78
5.3.3	MCHAT: Predicted Joint, Conditional and Marginal Probabilities	82
5.3.4	MCHAT: Marginal Effects on Joint and Conditional Probabilities	82
5.4	Beer, Wine and Spirits (BWS) Consumption: A Multivariate Approach	90
5.4.1	BWS: Observed Joint, Conditional and Marginal Probabilities	91
5.4.2	Multivariate Probit Estimates of BWS Consumption	92
5.4.3	BWS: Predicted Joint, Conditional and Marginal Probabilities	93
5.4.4	BWS: Marginal Effects on Joint and Conditional Probabilities	93
5.5	Summary	96
6	Modelling Alcohol Consumption by Levels Using an Ordered Generalised Extreme Value (OGEV) Model	99
6.1	Introduction	99
6.2	The OGEV Model for Levels of Alcohol Consumption	100
6.3	Estimation Results	102
6.4	Comparison with OP and MNL Models	107
6.5	Summary	112
7	Drinking Patterns and Earnings	115
7.1	Introduction	115
7.2	A Multinomial Selectivity Model for Earnings	117
7.3	Model Estimates and Earnings Predictions	120

7.3.1	Discussion of Results	121
7.3.2	Observed and Predicted Earnings Under Various Model Specifications	126
7.4	Earnings Differentials	127
7.4.1	Earnings Differentials of Non Bingers and Frequent Bingers <i>vis-a-vis</i> Abstainers	128
7.4.2	Earnings Differentials of Non Bingers and Abstainers <i>vis-a-vis</i> Frequent Bingers	128
7.5	Summary	130
8	Summary, Policy Implications and Further Research	133
8.1	Summary of Findings	133
8.1.1	Binge Drinking	134
8.1.2	Who Uses What Drugs and How Much? Do Prices Matter?	134
8.1.3	Exploring Cross-Drug Relationships Via Both Observable and Unobservable Individual Characteristics	137
8.1.4	Are Frequent Drinkers Different from Moderate or Occasional Drinkers? Can Advanced Econometric Techniques Enhance the Analysis of Drug Consumption?	138
8.1.5	Is There Any Association Between Individuals' Drinking Behaviour and Their Earnings?	139
8.2	Policy Implications	139
8.3	Limitations and Potential Future Research	141
A	Definition of Variables	143
B	Appendix to Chap. 3	147
C	Appendix to Chap. 5	149
D	Appendix to Chap. 7	161
	Bibliography	165

Recreational Drug Consumption

An Economic Perspective

Srivastava, P.

2013, VII, 176 p. 18 illus., Hardcover

ISBN: 978-3-319-02404-2
