

# Contents

<b>1</b>	<b>Introduction to Tight Gas Reservoirs</b>	<b>1</b>
1.1	Introduction	1
1.2	Tight Gas Reservoirs Characteristics	1
1.3	Damage Mechanisms in Tight Gas Reservoirs	3
1.4	Hydraulic Fracturing in Tight Gas Reservoirs	4
1.5	Damage Due to Hydraulic Fracturing	6
1.6	Thermal Fracturing	7
1.7	Mitigating Damage in Tight Gas Reservoirs	8
1.8	Summary	9
	References	9
<b>2</b>	<b>Tight Gas Reservoirs Characterisation for Dynamic Parameters</b>	<b>13</b>
2.1	Welltest Analysis in Tight Gas Reservoirs	13
2.2	Permeability Estimation in Hydraulically Fractured Tight Gas Wells	14
2.3	Estimating Permeability of the Natural Fractures	16
2.4	Relative Permeability Curves in Tight Gas Reservoirs	18
2.5	Pressure Measurement in Tight Gas Reservoirs	18
2.6	Summary	19
	References	19
<b>3</b>	<b>Tight Gas Reservoir Simulation</b>	<b>21</b>
3.1	Effect of Damage Mechanisms on Well Productivity	21
3.1.1	Damaged Zone Permeability and Radius	21
3.1.2	Phase Trapping Damage Caused by Water Invasion	22
3.1.3	Effect of Phase-Trap Damage on Skin Factor	24
3.1.4	Overbalanced and Underbalanced Drilling	24
3.1.5	Phase Trapping Caused by Oil Based and Water Based Drilling Fluids	26
3.1.6	Water Blocking Damage in Hydraulically Fractured Wells	26
3.1.7	Damage to Natural Fractures	29

3.2	Effect of Wellbore Related Parameters on Well Productivity. . .	29
3.2.1	Hydraulic Fractures . . . . .	29
3.2.2	Drilling Direction and Permeability Anisotropy . . . . .	30
3.2.3	Wellbore Breakouts . . . . .	31
3.2.4	Perforation Parameters . . . . .	32
3.2.5	Liquid Loading in Wellbore . . . . .	32
3.3	Effect of Natural Fractures Parameters on Welltest Response . .	33
3.4	Pressure Measurement in Tight Gas Reservoirs . . . . .	34
3.5	Summary . . . . .	36
	References . . . . .	36
<b>4</b>	<b>Tight Gas Field Example: Effect of Damage Mechanisms</b>	
	<b>on Well Productivity . . . . .</b>	<b>37</b>
4.1	Wellbore Instability . . . . .	37
4.2	Perforation Data. . . . .	39
4.3	Reservoir Fluid . . . . .	40
4.4	Initial Water Saturation. . . . .	41
4.5	Relative Permeability and Capillary Pressure. . . . .	42
4.6	Hydraulic Fracturing . . . . .	43
4.7	Welltest Analysis . . . . .	44
4.8	Formation Sensitivity to Water Invasion Damage. . . . .	46
4.9	Well Production History (Pre-Frac and Post-Frac) . . . . .	46
4.10	Formation Damage Caused by Water and Oil Invasion. . . . .	47
	4.10.1 Damage Caused by Water Invasion . . . . .	47
	4.10.2 Damage Caused by Oil Invasion . . . . .	48
	4.10.3 Comparison of Damage Caused by Water and Oil . . . .	48
4.11	Well Productivity Evaluation in WR Tight Gas Field. . . . .	48
4.12	Tight Gas Development Strategy for Optimized Productivity. . . . .	49
	References . . . . .	50
<b>5</b>	<b>Conclusions . . . . .</b>	<b>51</b>

Evaluating Factors Controlling Damage and Productivity  
in Tight Gas Reservoirs

Bahrami, N.

2013, XVI, 53 p. 37 illus., 14 illus. in color., Hardcover

ISBN: 978-3-319-02480-6
