Contents

Part I A Scholarly Perspective on the Link Between Innovation, Collaboration, and Design

1 Innovation and Design: A Fragmented Relationship 3
1.1 Exploring the Connection Between Innovation and Design 3
1.2 A Perspective for Design in Innovation Processes 6
1.3 Socially Relevant Networked Innovation 8
References 10
2 Innovation by Networking and Systemic Innovation 13
2.1 Forms of Economic Exchange and Networked Firms 13
2.2 At the Boundaries of Networked/Systemic Innovation 15
2.3 Strategies for Working Together and Taxonomy of Networks . . . 16
2.4 Triggering Innovation Coalitions—by Design 22
References 23

Part II Devising and Activating Collaborative Networks for Innovation

3 Defining Collaborative Networks for Innovation 29
3.1 Defining Social and Collaborative Networks 29
3.1.1 The Principle of Social *Embeddedness* 31
3.1.2 The Centrality of Social Capital 32
3.2 Dimensions to Design Networks for Innovation 38
3.2.1 Structure of Relationships 39
3.2.2 Quality of Relationships. 40
3.2.3 Location of Relationships. 41
3.2.4 Content of Relationships 42
3.3 A design Principle to Devise Collaborative Networks 42
References 44

4 NETS: An Approach to Design Collaborative Networks 47
4.1 Premises of the Design Approach 47
4.2 The Test on the Field. 49
4.3 Description of the Design Approach: NETS 50
4.4 The Properties of NETS: Access, Interdependence, Adaptability, Resilience 54
References 58

5 Open Discussions and Future Challenges 59
5.1 Open Discussion: The Relationship Between Design and Innovation 59
5.2 Open Discussion: The New Firm and the New Entrepreneur . . . 60
5.3 Open Discussion: The Designer-Citizen 62
5.4 Future Challenges: The Potentials of the Research Field 64
References 66
