<b>Preface</b> . . . . .	ix
<b>Acknowledgments</b> . . . . .	xv
<b>About the authors</b> . . . . .	xvii
<b>List of figures</b> . . . . .	xix
<b>List of tables</b> . . . . .	xxv
<b>List of abbreviations and acronyms</b> . . . . .	xxvii
<b>1 Qualification, species variety, and consequences of harmful algal blooms (HABs)</b> . . . . .	1
1.1 Introduction . . . . .	1
1.2 Harmful algal bloom species qualification and variety . . . . .	3
1.3 Ecological aspects . . . . .	4
1.4 Food safety, health, and sanitary aspects . . . . .	9
1.5 Economic aspects . . . . .	20
1.6 Concluding remarks . . . . .	24
<b>2 Biology and ecology of harmful algal species</b> . . . . .	25
2.1 Role of hydrodynamics . . . . .	26
2.2 Role of biogeochemistry . . . . .	29
2.3 Role played by other factors . . . . .	31
2.4 Case studies . . . . .	32
2.4.1 <i>Chattonella</i> or <i>Pseudochattonella</i> spp. in the North Sea/ Skaggerak . . . . .	32
2.4.2 Cyanobacteria blooms in the Baltic Sea . . . . .	40
2.4.3 <i>Gymnodinium catenatum</i> blooms in the Galician Rías . . .	43

<b>3</b>	<b>Potential of remote sensing for identification, delineation, and monitoring of harmful algal blooms</b>	<b>49</b>
3.1	Taxonomy and pigment composition of harmful algae	50
3.2	Absorption and emission spectral features of pigments	52
3.3	Inherent optical and apparent properties of natural waters	61
3.4	Optical properties of the major color-producing agents (CPAs) in natural waters	65
3.4.1	Absorption cross-sections of whole algal cells and pigments	65
3.4.2	Backscattering cross-sections of algal cells	68
3.4.3	Fluorescence cross-sections, $\phi_{ph}^*(\lambda)$ of algal cells	72
3.4.4	Optical impact of mucilage	72
3.4.5	Absorption and backscattering cross-sections of suspended minerals and dissolved organic matter	73
3.5	Harmful algae detection: methodologies	80
3.5.1	Detection of expressions of pigment composition in harmful algae in absorption and water column reflectance spectra	80
3.5.2	Detection of massive HABs through remote estimation of <i>chl-a</i> concentration/phytoplankton biomass levels	95
3.6	Synergistic approaches for HAB detection and monitoring	107
3.7	Closing remarks	110
<b>4</b>	<b>Monitoring harmful algal blooms from space</b>	<b>113</b>
4.1	Some case studies of bloom events in the world's oceans	114
4.1.1	The North and Baltic Seas	116
4.1.2	The Korean Southeast and East China Seas	118
4.1.3	The Pearl River Estuary, China	119
4.1.4	The Yellow Sea/Bohai Sea, China	120
4.1.5	Vietnam coastal waters	121
4.1.6	Moreton Bay, Australia	121
4.1.7	The Gulf of Finland	122
4.1.8	Lake Erie, U.S.A./Canada	124
4.1.9	Norwegian coastal waters	125
4.1.10	Applications of FLH data products for HAB monitoring	170
4.2	Role played by synergies between satellite EO data in HAB monitoring	177
4.3	Near-real time surveillance of HABs	188
4.3.1	Norwegian HAB-monitoring services	188
4.3.2	British EO Data Acquisition and Analysis Service (NEODAAS)	197
4.3.3	U.S. HAB monitoring system for the Gulf of Mexico	199
4.4	Closing remarks	200

<b>5</b>	<b>Integrated modeling and satellite monitoring of algal blooms . . . . .</b>	<b>203</b>
5.1	Marine/shelf sea ecosystem modeling: nature, capabilities, and limitations . . . . .	203
5.1.1	General characterization of marine ecosystem models. . .	203
5.1.2	Types of marine ecosystem models simulating algal blooms . . . . .	206
5.2	Global to regional model simulations: specific features . . . . .	211
5.2.1	General considerations . . . . .	211
5.2.2	Equatorial Pacific Ocean . . . . .	218
5.2.3	Subtropical and tropical waters . . . . .	220
5.2.4	Barcelona Harbor, the Mediterranean Sea . . . . .	222
5.2.5	European continental shelf waters . . . . .	225
5.3	Modeling HABs as an element of integrated marine monitoring	236
5.3.1	HAB modeling for the North Sea and Skagerrak waters	237
5.3.2	HAB modeling for the Baltic Sea. . . . .	247
5.3.3	HAB modeling in the Galician Rias . . . . .	255
5.4	Closing remarks . . . . .	261
	<b>Afterword . . . . .</b>	<b>263</b>
	<b>References . . . . .</b>	<b>269</b>
	<b>Index . . . . .</b>	<b>299</b>

Monitoring of Harmful Algal Blooms

Pettersson, L.H.; Pozdnyakov, D.

2013, XXXI, 309 p., Hardcover

ISBN: 978-3-540-22892-9
