
Contents

Part I IPL Programme

| | | |
|----------|---|----------|
| 1 | International Programme on Landslides | 3 |
| 1.1 | Outline | 3 |
| 1.2 | Tokyo Action Plan | 4 |
| 1.3 | Landslides: Journal of the International Consortium on Landslides | 8 |
| 1.4 | World Landslide Forum (WLF) and World Centre of Excellence (WCoE) | 11 |
| 1.5 | World Centres of Excellence on Landslide Risk Reduction (WCoE) | 13 |
| 1.6 | Projects of the International Programme on Landslides | 15 |
| 1.7 | Management and Finance of IPL | 18 |
| | Bibliography | 19 |
| | Appendix: MoU between UNESCO and ICL to Promote IPL | 20 |

Part II Joint Coordinating Projects

| | | |
|----------|---|-----------|
| 2 | Early Warning of Landslides (IPL 105) | 27 |
| 2.1 | Introduction | 27 |
| 2.2 | Site and Areal Prediction | 28 |
| 2.3 | Time Prediction from Satellite Monitoring | 34 |
| 2.4 | Safety Factor Change in Shallow Landslides from Satellite Monitoring | 36 |
| 2.5 | Others | 38 |
| 2.6 | Conclusion and Social Impact | 40 |
| | Bibliography | 41 |
| 3 | Social Impact of IPL 101-1 “Landslide Investigation in Inca’s World Heritage, Machu Picchu” Peru | 43 |
| 3.1 | Introduction | 43 |
| 3.2 | Initial Investigation of Machu Picchu | 44 |
| 3.3 | Social Impact of Machu Picchu Investigation | 47 |
| 3.4 | Possible Scenario for Landslide Development at Machu Picchu | 51 |
| 3.5 | Further Landslide Monitoring in Machu Picchu | 54 |
| 3.6 | Landslide-disaster Risk Reduction at Machu Picchu | 56 |
| | Bibliography | 58 |
| 4 | Assessment of Global Landslide Hazard Hotspots | 59 |
| 4.1 | Introduction | 59 |

| | | |
|-----|---|----|
| 4.2 | Model for Landslide Hazard Evaluation | 60 |
| 4.3 | Discussion of Results and Social Impact | 68 |
| | Bibliography | 71 |

Part III Projects by Word Centres of Excellence

| | | |
|-----------|---|------------|
| 5 | The Landslide Handbook – A Guide to Understanding Landslides | 75 |
| 5.1 | Introduction | 75 |
| 5.2 | Examples of Information Found in the Handbook | 76 |
| 5.3 | Translations of the English Version of the Handbook | 84 |
| | Bibliography | 84 |
| 6 | International Summer School on Rockslides and Related Phenomena in the Kokomeran River basin, Kyrgyzstan | 85 |
| 6.1 | Introduction | 85 |
| 6.2 | Morphological Types of Rockslide Deposits | 87 |
| 6.3 | Internal Structure | 88 |
| 6.4 | Evidence of Seismic Triggering of Rockslides, River Damming, and Outburst Floods | 89 |
| 6.5 | Social Impact of IDG RAS & KIS as World Center of Excellence | 92 |
| | Bibliography | 93 |
| 7 | SafeLand: Changing Pattern of Landslides Risk and Strategies for Its Management | 95 |
| 7.1 | Aims and Background | 96 |
| | Bibliography | 114 |
| 8 | Approaches to Landslide Risk Assessment in China | 115 |
| 8.1 | Introduction | 115 |
| 8.2 | Catastrophic Landslide Study – the Jiweishan Landslide | 116 |
| 8.3 | Seismic Landslide Hazards Assessment and Mapping | 122 |
| 8.4 | Earthquake Triggered Catastrophic Landslides Study | 123 |
| 8.5 | Conclusions | 128 |
| 8.6 | Social Impact | 129 |
| | Bibliography | 130 |
| 9 | The Share of Landslides in the Occurrence of Natural Hazards and the Significance of El Niño in the Cordillera Blanca and Cordillera Negra Mountains, Peru | 133 |
| 9.1 | Introduction | 134 |
| 9.2 | Methods | 136 |
| 9.3 | Results | 137 |
| 9.4 | Discussion | 145 |
| 9.5 | Conclusion | 146 |
| 9.6 | Social Impact | 147 |
| | Bibliography | 147 |
| 10 | Mechanisms of Active Landslides in Flysch | 149 |
| 10.1 | Introduction | 149 |

| | | |
|---|---|------------|
| 10.2 | Geology of the Slano Blato Landslide | 150 |
| 10.3 | History of the Slano Blato Landslide | 152 |
| 10.4 | Slano Blato Landslide Monitoring from 2001 to 2007 | 153 |
| 10.5 | Flysch Softening | 157 |
| 10.6 | Soil Suction and Occurrences of Mud Flows | 157 |
| 10.7 | Field Instrumentation | 160 |
| 10.8 | Monitoring Results from the Period 2007–2010 | 161 |
| 10.9 | Concluding Remarks | 161 |
| | Bibliography | 164 |
| 11 | A Numerical Modeling of Dip-slope Failure for Risk Assessment of Earthquake-induced Landslides | 167 |
| 11.1 | Introduction | 167 |
| 11.2 | A Numerical Modeling of Dip Slope Failure Induced by Earthquakes (From One of the Research Activities Related To WG 1) (Wakai et al., 2010) | 170 |
| 11.3 | Conclusions and Social Impact | 178 |
| | Bibliography | 178 |
| 12 | Approaches for Promoting Landslide Early Warning in a Changing Climate Scenario | 179 |
| 12.1 | Introduction | 180 |
| 12.2 | The Approach | 181 |
| 12.3 | Activities and Achievements | 182 |
| 12.4 | Social Impact | 188 |
| | Bibliography | 189 |
| Part IV Risk Assessment Technology | | |
| 13 | Dynamics and Prediction of Earthquake and Rainfall-Induced Rapid Landslides and Submarine Megaslides | 193 |
| 13.1 | Introduction | 193 |
| 13.2 | Areal Prediction of Earthquake and Rainfall Induced Rapid and Long-Travelling Flow Phenomena (APERITIF) | 196 |
| 13.3 | Dynamics of Subaerial and Submarine Megaslides | 208 |
| 13.4 | Social Impacts | 212 |
| | Bibliography | 213 |
| 14 | Low-cost and Simple Early Warning Systems of Slope Instability | 215 |
| 14.1 | Introduction | 215 |
| 14.2 | Wireless Monitoring System for Slope Failure | 217 |
| 14.3 | Rotation on Slope Surface Before Failure | 218 |
| 14.4 | Miniature Ground Inclinator | 220 |
| 14.5 | Conclusions | 225 |
| 14.6 | Social Impact, Including Promotion of IPL Leaders/Groups Through the Project | 226 |
| | Bibliography | 227 |

| | | |
|-----------|--|-----|
| 15 | Slope Deformation Caused by Water-level Variation in the Three Gorges Reservoir, China | 229 |
| 15.1 | Introduction | 230 |
| 15.2 | Qianjiangping Landslide | 230 |
| 15.3 | The Shuping Landslide | 236 |
| 15.4 | Conclusion and Social Impact | 238 |
| | Bibliography | 239 |
| 16 | Landslide Mechanisms and Protection of Highways in Frozen Regions of Northeast China | 241 |
| 16.1 | Introduction | 242 |
| 16.2 | Landslides in Cut Soil Slopes and Slope Protection by Vegetation in Seasonal Frozen Regions | 243 |
| 16.3 | Landslide Mechanisms and Permafrost Characteristics of the Northwest Section of the Lesser Khingan Range China | 248 |
| 16.4 | Conclusion and Social Impact | 252 |
| | Bibliography | 254 |
| 17 | Evaluation of Landslides in Uzbekistan Caused by the Joint Impact of Precipitation and Deep-Focus Pamir-Hindu Kush Earthquakes | 255 |
| 17.1 | Introduction | 255 |
| 17.2 | Evaluation of the Joint Influence of two Spatial Factors in the Formation of Landslides | 256 |
| 17.3 | Evaluation of the Mechanism of Landslides Influenced by Low-Frequency, Long-Duration Seismic Vibrations | 258 |
| 17.4 | Damage and Safety Measures | 266 |
| 17.5 | Conclusion | 266 |
| | Bibliography | 266 |
| 18 | Modelling of Landslide Hazards in Kharkov Region of Ukraine Using GIS | 269 |
| 18.1 | Introduction | 269 |
| 18.2 | Project Activities and Results | 272 |
| 18.3 | Social Impact | 276 |
| | Bibliography | 278 |
| 19 | Landslide Inventory and Susceptibility Mapping in the Río Chiquito-Barranca Del Muerto Watershed, Pico de Orizaba Volcano, Mexico | 279 |
| 19.1 | Introduction | 280 |
| 19.2 | Background | 280 |
| 19.3 | Study Area | 281 |
| 19.4 | Materials and Methods | 282 |
| 19.5 | Results | 285 |
| 19.6 | Conclusions and Social Impact | 288 |
| | Bibliography | 288 |

| | | |
|-----------|---|-----|
| 20 | Landslides and Great Soil Volume Changes Affecting an Urban Area of Barranquilla, Colombia | 291 |
| 20.1 | Introduction | 292 |
| 20.2 | Problem Description | 292 |
| 20.3 | Geology and Soil Profile | 293 |
| 20.4 | Failure Mechanism | 295 |
| 20.5 | Lessons from the Problem Evolution and its Management | 297 |
| 20.6 | Action Plan of the IPL-Project | 297 |
| 20.7 | Conclusion And Social Impact | 298 |
| | Bibliography | 298 |

Part V Risk Management and Capacity Development

| | | |
|-----------|---|-----|
| 21 | Landslide Monitoring and Warning Systems in Mexico | 301 |
| 21.1 | Introduction | 302 |
| 21.2 | Landslide Disasters and Triggering Mechanisms | 305 |
| 21.3 | Landslides Warning Systems in Mexico | 306 |
| 21.4 | State of the Art: A Synthesis | 308 |
| 21.5 | Conclusion and Social Impact | 313 |
| | Bibliography | 314 |
| 22 | Canadian Technical Guidelines and Best Practices Related to Landslides | 317 |
| 22.1 | Introduction | 317 |
| 22.2 | The Approach | 319 |
| 22.3 | Development and Organisation of the Guidelines | 319 |
| 22.4 | Proposed Timeline | 322 |
| 22.5 | Conclusion and Social Impact | 322 |
| | Bibliography | 323 |
| 23 | The Hybrid Socio-technical System for Strategic Landslide Disaster Risk Reduction in Indonesia | 325 |
| 23.1 | Aims and Background | 325 |
| 23.2 | Concept of the Hybrid Socio-technical System | 326 |
| 23.3 | Approach and Method for the Hybrid Socio-technical System Development | 326 |
| 23.4 | Social Impacts | 332 |
| 23.5 | Conclusion | 332 |
| | Bibliography | 332 |
| 24 | The Croatian–Japanese Joint Research Project on Landslides: Activities and Public Benefits | 335 |
| 24.1 | Introduction | 335 |
| 24.2 | Project Activities Related to Landslide Monitoring and Development of Early Warning Systems | 336 |
| 24.3 | Project Activities Related to Landslide Mapping and Landslide Hazard Analysis | 342 |
| 24.4 | Conclusions and Social Impact | 349 |
| | Bibliography | 350 |

| | | |
|-----------|--|------------|
| 25 | Landslides in West Africa: Impact, Mechanisms and Management . | 353 |
| 25.1 | Introduction: Background of IPL Project 150, Objectives of the Project and Project Plan | 354 |
| 25.2 | Some Recent Landslides Investigated under IPL Project 150 . . . | 355 |
| 25.3 | Capacity Building and Co-operative Research | 362 |
| 25.4 | Effective Management of Landslides in a Developing Region: Applied Research | 366 |
| 25.5 | Conclusion and Social Impact | 368 |
| | Bibliography | 369 |
| 26 | Capacity Development for Landslide Risk Reduction in India | 371 |
| 26.1 | Introduction | 372 |
| 26.2 | Concepts in Capacity | 373 |
| 26.3 | Concepts in Capacity Development | 373 |
| 26.4 | Levels of Capacity Development | 373 |
| 26.5 | Process of Capacity Development | 374 |
| 26.6 | Capacity Development Initiatives for Landslide Risk Reduction . | 374 |
| 26.7 | Global Initiatives | 375 |
| 26.8 | Regional Initiatives | 376 |
| 26.9 | National and Local Initiatives | 377 |
| 26.10 | Conclusion and Social Impact | 383 |
| | Bibliography | 384 |
| | Web Resources | 385 |

Landslides: Global Risk Preparedness

Sassa, K.; Rouhban, B.; Briceño, S.; McSaveney, M.; He, B. (Eds.)

2013, XVI, 387 p. 293 illus. in color., Hardcover

ISBN: 978-3-642-22086-9
