

Contents

1	Nanoscience-Based Electrochemical Sensors and Arrays for Detection of Cancer Biomarker Proteins	1
	James F. Rusling, Bernard Munge, Naimish P. Sardesai, Ruchika Malhotra and Bhaskara V. Chikkaveeraiah	
2	Nanomaterials for Biosensors and Implantable Biodevices	27
	Roberto A. S. Luz, Rodrigo M. Iost and Frank N. Crespilho	
3	Nanomaterials for Enzyme Biofuel Cells	49
	Serge Cosnier, Alan Le Goff and Michael Holzinger	
4	Biosensors Based on Field-Effect Devices	67
	José Roberto Siqueira Jr., Edson Giuliani Ramos Fernandes, Osvaldo Novais de Oliveira Jr. and Valtencir Zucolotto	
5	Using Supramolecular Chemistry Strategy for Mapping Electrochemical Phenomena on the Nanoscale.	87
	Anna Thaise Bandeira Silva, Janildo Lopes Magalhães, Eduardo Henrique Silva Sousa and Welter Cantanhêde da Silva	
6	DNA and Enzyme-Based Electrochemical Biosensors: Electrochemistry and AFM Surface Characterization	105
	Christopher Brett and Ana Maria Oliveira-Brett	
7	Electrochemical-Surface Plasmon Resonance: Concept and Bioanalytical Applications	127
	Danielle C. Melo Ferreira, Renata Kelly Mendes and Lauro Tatsuo Kubota	

Nanobioelectrochemistry
From Implantable Biosensors to Green Power
Generation

Crespilho, F.N. (Ed.)

2013, X, 138 p., Hardcover

ISBN: 978-3-642-29249-1
