

# Contents

- 1 Introduction** ..... 1
- 2 Hammerstein Systems** ..... 5
  - 2.1 Other Systems..... 8
  - 2.2 Notes ..... 10
- 3 Identification Goal** ..... 13
  - 3.1 Notes ..... 15
- 4 Haar Orthogonal Bases** ..... 17
  - 4.1 Classic Haar Wavelets ..... 17
    - 4.1.1 Multiresolution Analysis ..... 18
    - 4.1.2 Multiscale Approximation..... 19
    - 4.1.3 Reproducing Kernel Approximation ..... 19
    - 4.1.4 Multiresolution Representation..... 20
    - 4.1.5 Equivalent Representations and Fast Wavelet Transform ..... 23
    - 4.1.6 Lifting Transform for Haar Wavelets ..... 24
    - 4.1.7 Convergence..... 24
    - 4.1.8 Pointwise Convergence ..... 24
    - 4.1.9 Convergence at Jumps ..... 25
    - 4.1.10 Convergence Rate ..... 26
    - 4.1.11 Global Convergence ..... 28
    - 4.1.12 Linear Approximation ..... 28
    - 4.1.13 Nonlinear Approximation ..... 31
  - 4.2 Unbalanced Haar Wavelets ..... 34
    - 4.2.1 Linear Approximation ..... 35
    - 4.2.2 Unbalanced Haar Wavelets ..... 38
    - 4.2.3 Unbalanced Haar Transform ..... 39
    - 4.2.4 UHT and EZW Nonlinear Approximation..... 40

<b>5</b>	<b>Identification Algorithms</b>	43
5.1	Numerical Illustrations	45
5.2	Quotient Orthogonal Series Algorithm	46
5.2.1	Convergence	48
5.2.2	Convergence Rates	48
5.3	Nonlinear QOS Algorithm	50
5.3.1	Convergence	52
5.3.2	Convergence Rates	52
5.4	Order Statistics (OS) Algorithm	54
5.4.1	Convergence	56
5.4.2	Convergence Rates	56
5.5	Nonlinear OS Algorithm	58
5.5.1	Convergence and Convergence Rates	58
5.6	Empirical Distribution Algorithm	60
5.6.1	Convergence	62
5.6.2	Convergence Rates	63
5.7	Nonlinear ED Algorithm	64
5.7.1	Convergence and Convergence Rates	65
5.8	Empirical Orthogonal Series Algorithm	66
5.8.1	Convergence	68
5.8.2	Convergence Rates	69
5.9	Nonlinear EOS Algorithm	70
5.9.1	Convergence and Convergence Rates	70
5.10	Remarks and Comments	72
5.10.1	Convergence Rates Comparison	72
5.10.2	Common Representation	72
5.10.3	Application of Interpolation Schemes	74
<b>6</b>	<b>Computational Algorithms</b>	77
6.1	Linear and Nonlinear Algorithms Implementations	78
6.1.1	QOS Algorithm	78
6.1.2	OS Algorithm	79
6.1.3	ED Algorithm	81
6.1.4	EOS Algorithm	84
6.2	Linear Algorithms Complexities	87
6.3	Nonlinear Algorithms	87
6.3.1	Implementation of the EZW Scheme	88
6.3.2	Complexity of the EZW Scheme Implementation	90
6.4	Overall Complexity of the Nonlinear Algorithms	91
6.5	Computational Stability	92
<b>7</b>	<b>Final Remarks</b>	95
7.1	Asymptotic Properties	95
7.2	Computational Properties	97
7.3	Linear Versus Nonlinear Algorithms	98

<b>A</b>	<b>Technical Derivations</b> .....	99
A.1	QOS Algorithms .....	100
A.1.1	Convergence .....	101
A.1.2	Convergence Rates .....	107
A.1.3	Nonlinear Algorithm .....	110
A.2	OS Algorithms .....	113
A.2.1	Convergence .....	113
A.3	ED Algorithms .....	119
A.3.1	Convergence .....	120
A.4	EOS Algorithms .....	124
A.4.1	Convergence .....	124
<b>B</b>	<b>Common Symbols</b> .....	127
	<b>References</b> .....	129
	<b>Index</b> .....	137

Nonlinear System Identification by Haar Wavelets

Sliwinski, P.

2013, XI, 139 p. 27 illus., 18 illus. in color., Softcover

ISBN: 978-3-642-29395-5
