# Contents

<b>1</b>	<b>Introduction</b>	1
	References	6
<b>2</b>	<b>The Production Function</b>	7
2.1	Introduction	7
2.2	Production Technology	7
2.3	The Input Set	10
2.4	The Output Set	11
2.5	The Production Function	12
2.6	Diminishing Marginal Returns	13
2.6.1	The Law of Diminishing Marginal Returns	14
2.6.2	Graphical Illustration of the Production Function	15
2.6.3	Mathematical Representation of the Production Function	16
2.6.4	The Production Elasticity	17
<b>3</b>	<b>Optimisation with One Input</b>	19
3.1	Introduction	19
3.2	Optimisation from the Input Side	20
3.3	Optimisation from the Output Side	24
<b>4</b>	<b>Production and Optimisation with Two or More Inputs</b>	29
4.1	Introduction	29
4.2	Cost Minimisation	30
4.3	The Expansion Path and the Form of the Production Function	33
4.4	Maximisation of Production Under Budget Constraint	38
4.5	Profit Maximisation	39
4.6	The Pseudo Scale Line and Optimisation with Fixed Inputs	42
4.7	Substitution Between Inputs	43
	References	44

---

<b>5</b>	<b>Costs</b>	45
5.1	One Variable Input	45
5.2	Multiple Variable Inputs	48
5.3	Short and Long Run Costs	53
5.4	Calculation of Costs in Practice	54
	Reference	57
<b>6</b>	<b>Productivity, Efficiency and Technological Changes</b>	59
6.1	Introduction	59
6.2	Definitions	59
6.2.1	Productivity	59
6.2.2	Efficiency	61
6.2.3	Technological Changes	63
6.2.4	The Scale of Production	63
6.3	Changes in Productivity	65
	References	68
<b>7</b>	<b>Input Demand Functions</b>	69
7.1	Introduction	69
7.2	One Variable Input	70
7.3	Multiple Variable Inputs	73
7.3.1	Increasing Output Price	78
7.4	Input Demand Under Budget Constraint	79
7.5	Demand When the Input Price Depends on the Demand	80
	Reference	82
<b>8</b>	<b>Land and Other Inputs</b>	83
8.1	Introduction	83
8.2	Land as a Special Input	83
8.3	Example of Homogeneous Production Function	86
	References	88
<b>9</b>	<b>The Company's Supply Function</b>	89
9.1	Introduction	89
9.2	The Supply Curve	89
9.3	Adjustment in the Long Run	91
9.4	Derivation of the Supply Function. An Example	92
<b>10</b>	<b>Optimisation of Production Under Restrictions</b>	95
10.1	Introduction	95
10.2	General Method for Optimisation Under Restrictions	96
10.3	Examples of Usage	100
10.3.1	Set-Aside Versus Restriction of Production	102
10.3.2	Limited Input	103

10.3.3	Compulsory Set-Aside of Land . . . . .	104
10.3.4	Adaptation Due to Product Price Decrease . . . . .	105
10.3.5	Restriction of Output: Illustrated by Milk Quota Example . . . . .	105
	References . . . . .	110
<b>11</b>	<b>Economies of Scale and Size . . . . .</b>	<b>111</b>
11.1	Introduction . . . . .	111
11.2	Economies of Size . . . . .	112
11.3	The Optimal Size of the Firm . . . . .	115
11.4	Economies of Scale . . . . .	116
11.5	Summary . . . . .	120
	References . . . . .	120
<b>12</b>	<b>The Fixation of the Production Factors . . . . .</b>	<b>121</b>
12.1	Introduction . . . . .	121
12.2	Degree of “Fixation” . . . . .	121
12.3	Theory of Fixation of Production Factors . . . . .	122
12.4	Disadvantages (and Advantages) of Fixed Factors . . . . .	125
12.5	Limiting the Fixation of the Factors . . . . .	127
12.6	The Duration of the Fixation . . . . .	128
12.7	Measuring the Fixation of Production Factors . . . . .	128
<b>13</b>	<b>Decreasing Sales Curve . . . . .</b>	<b>129</b>
13.1	Introduction . . . . .	129
13.2	Perfect Competition as a Reference . . . . .	129
13.3	Monopoly . . . . .	132
13.4	Optimisation Under Monopoly . . . . .	133
13.5	Optimisation from the Input Side . . . . .	137
13.6	Product Differentiation and Monopolistic Competition . . . . .	139
	13.6.1 Acquisition of Input . . . . .	142
	13.6.2 The Production Process . . . . .	142
	13.6.3 Delivery of Output . . . . .	142
	Reference . . . . .	143
<b>14</b>	<b>Production Over Time . . . . .</b>	<b>145</b>
14.1	Introduction . . . . .	145
14.2	General Theory . . . . .	146
14.3	The Replacement Calculation . . . . .	149
	14.3.1 Introduction . . . . .	149
	14.3.2 Optimal Termination Time for One Individual Asset . . .	150
	14.3.3 Optimal Replacement Time for Replacing an Asset with a New One . . . . .	153
	Appendix . . . . .	161

<b>15 Risk and Uncertainty</b> . . . . .	163
15.1 Introduction . . . . .	163
15.2 Expected Profit and Other Criteria . . . . .	164
15.3 The Cost of Risk . . . . .	166
15.3.1 The Wrong Choice of Inputs . . . . .	167
15.3.2 The Wrong Choice of Production . . . . .	168
15.4 The Theory of Risk and Uncertainty . . . . .	168
15.4.1 Concepts . . . . .	168
15.4.2 Utility Functions . . . . .	169
15.4.3 The State-Contingent Approach . . . . .	177
References . . . . .	180
<b>16 Economic Rent and the Value of Land</b> . . . . .	181
16.1 Introduction . . . . .	181
16.2 Land Rent and Marginal Land . . . . .	183
16.3 The Use Value of Land . . . . .	185
16.4 The Land Price Determination . . . . .	186
16.5 Location and Land Rent . . . . .	188
<b>17 Production of Multiple Products</b> . . . . .	191
17.1 Introduction . . . . .	191
17.2 The Product Transformation Curve . . . . .	191
17.3 The Optimal Combination of Output . . . . .	196
17.4 Product Expansion Path . . . . .	199
17.5 Intermediate Products and Trade . . . . .	199
17.6 Multiple Inputs and Outputs . . . . .	202
<b>18 The Linear Programming Model</b> . . . . .	207
18.1 Introduction . . . . .	207
18.2 The Production Process . . . . .	210
18.3 The Financial Result of the Production Process . . . . .	213
18.4 Multi-process Models . . . . .	214
18.5 Substitution Between Input Factors . . . . .	215
<b>19 Production Planning in the Linear Production Model: Linear Programming</b> . . . . .	221
19.1 Introduction . . . . .	221
19.2 Fixed and Variable Inputs . . . . .	221
19.3 Optimization with Fixed and Variable Inputs . . . . .	222
19.4 An Example . . . . .	224
19.5 Quasi-fixed Input . . . . .	225
19.6 Intermediate Goods . . . . .	227
19.7 Determination of the Production Model Parameters . . . . .	229
19.8 Interpretation of the Dual Problem . . . . .	232
References . . . . .	234

<b>20</b>	<b>Use of Linear Programming in Practical Production Planning . . .</b>	<b>235</b>
20.1	Static Models . . . . .	236
20.1.1	Introduction . . . . .	236
20.1.2	From Problem to LP Model: An Example . . . . .	237
20.1.3	Graphical Solution . . . . .	238
20.1.4	Solution with the Use of Computer Software . . . . .	244
20.1.5	Process Formulation . . . . .	244
20.1.6	Restrictions . . . . .	248
20.2	Multi-period Models . . . . .	252
20.2.1	Introduction . . . . .	252
20.2.2	General Model . . . . .	253
20.2.3	Examples of Formulations . . . . .	255
20.2.4	Concluding Remarks . . . . .	261
20.3	Integer Programming . . . . .	261
20.3.1	Introduction . . . . .	261
20.3.2	Examples of Formulations . . . . .	262
20.3.3	Solving the Integer Programming Problems . . . . .	266
	References . . . . .	267
<b>21</b>	<b>Modelling Supply Functions Using Linear Programming . . . . .</b>	<b>269</b>
21.1	Introduction . . . . .	269
21.2	Estimation of the Cost Function of Individual Firms . . . . .	270
21.3	The Production Model . . . . .	271
21.4	The Linear Programming Model . . . . .	274
	References . . . . .	276
	<b>Appendix A: Profit Concepts . . . . .</b>	<b>277</b>
A.1	Introduction . . . . .	277
A.2	The Purpose of Calculation of Profit . . . . .	277
A.2.1	Profit from an Accounting Perspective . . . . .	278
A.2.2	Calculation of Profit as the Basis for Planning . . . . .	285
A.3	Conclusion . . . . .	286

Production Economics

The Basic Theory of Production Optimisation

Rasmussen, S.

2013, XII, 292 p., Hardcover

ISBN: 978-3-642-30199-5
