

Contents

1	Introduction and Background.	1
1.1	Climate Change.	2
1.2	Stochastic Modelling of Environmental Processes	12
1.3	Data.	20
1.4	Some Identified Areas for Further Research	21
	References	23
2	Literature Survey on Stochastic Wave Models	25
2.1	Wave Data and Data Sources	25
2.2	Review of Statistical Models for Extreme Waves	27
2.3	Relevant Statistical Models from Other Areas of Application	36
2.4	Selecting a Modeling Approach.	47
2.5	Wave Climate Projections	48
2.6	Summary and Conclusions	53
	References	54
3	A Bayesian Hierarchical Space-Time Model for Significant Wave Height	65
3.1	Data and Area to be Considered	65
3.2	Model Description.	74
3.3	Model Comparison and Selection	80
3.4	Implementation and Simulations	82
3.5	Results and Predictions	83
3.6	Discussion	102
3.7	Summary and Conclusions	103
	References	103
4	Including a Log-Transform of the Data	
4.1	Introduction and Motivation	107
4.2	Re-transformation Bias Correction.	109
4.3	Revised Model Description.	110
4.4	Simulations and Results	112

4.5	Discussion	124
4.6	Summary and Conclusions	128
	References	128
5	CO₂ Regression Component for Future Projections	131
5.1	Introduction and Background	131
5.2	Data Description	132
5.3	Model Extension	136
5.4	Results and Predictions	138
5.5	Model Comparison and Selection	148
5.6	Discussion	149
5.7	Summary and Conclusion	150
	References	151
6	Bayesian Hierarchical Modeling of the Ocean Windiness.	153
6.1	Data Description and Area of Investigation	154
6.2	The Stochastic Model	156
6.3	Results	158
6.4	Discussion	165
6.5	Summary and Conclusions	166
	References	167
7	Application: Impacts on Ship Structural Loads.	169
7.1	Introduction and Background	169
7.2	Probabilistic Structural Design	170
7.3	Potential Impact of Climate Change on Ship Structural Loads and Responses	173
7.4	Summary and Conclusions	182
	References	183
8	Case Study: Modeling the Effect of Climate Change on the World's Oceans.	185
8.1	Introduction	185
8.2	Simulation Results for the Various Ocean Areas	187
8.3	Prediction Losses.	205
8.4	Discussion	205
8.5	Conclusion	208
	References	209
9	Summary and Conclusions	211
9.1	Open Issues and Suggestions for Further Work	213

Appendix A: Markov Chain Monte Carlo Methods	217
Appendix B: Extreme Value Modelling	231
Appendix C: Markov Random Fields.	239
Appendix D: Derivation of the Full Conditionals of the Bayesian Hierarchical Space-Time Model for Significant Wave Height.	249
Appendix E: Sampling from a Multi-normal Distribution.	261

Bayesian Hierarchical Space-Time Models with
Application to Significant Wave Height

Vanem, E.

2013, XX, 262 p. 85 illus., 14 illus. in color., Hardcover

ISBN: 978-3-642-30252-7
