

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	The Title	1
1.2	What is Wrong with Quantum Mechanics?	3
1.3	History	5
1.4	Impossibility	7
1.5	The Dismissal	9
1.6	Roads to Bohmian Mechanics	9
1.7	Questions	11
1.8	The Book	14
	References	19

## Part I Quantum Equilibrium

<b>2</b>	<b>Quantum Equilibrium and the Origin of Absolute Uncertainty</b>	<b>23</b>
2.1	Introduction	23
2.2	Reality and the Role of the Wave Function	26
2.3	Bohmian Mechanics	29
2.4	The Problem of Quantum Equilibrium	34
2.5	The Effective Wave Function	37
2.6	The Fundamental Conditional Probability Formula	44
2.7	Empirical Distributions	46
2.8	Multitime Experiments: the Problem	50
2.9	Random Systems	51
2.10	Multitime Distributions	54
2.11	Absolute Uncertainty	57
2.12	Knowledge and Nonequilibrium	59
2.13	Quantum Equilibrium and Thermodynamic (non)Equilibrium	60
2.14	Global Equilibrium Beneath Nonequilibrium	63
2.15	Appendix: Random Points	65
	References	74

<b>3</b>	<b>Quantum Equilibrium and the Role of Operators as Observables in Quantum Theory</b>	<b>79</b>
3.1	Introduction	79
3.1.1	Notations and Conventions	82
3.2	Bohmian Experiments	83
3.2.1	Equivariance and Quantum Equilibrium	83
3.2.2	Conditional and Effective Wave Functions	85
3.2.3	Decoherence	86
3.2.4	Wave Function and State	88
3.2.5	The Stern-Gerlach Experiment	89
3.2.6	A Remark on the Reality of Spin in Bohmian Mechanics	92
3.2.7	The Framework of Discrete Experiments	92
3.2.8	Reproducibility and its Consequences	94
3.2.9	Operators as Observables	96
3.2.10	The General Framework of Bohmian Experiments	97
3.3	The Quantum Formalism	99
3.3.1	Weak Formal Measurements	100
3.3.2	Strong Formal Measurements	101
3.3.3	From Formal Measurements to Experiments	104
3.3.4	Von Neumann Measurements	105
3.3.5	Preparation Procedures	106
3.3.6	Measurements of Commuting Families of Operators	106
3.3.7	Functions of Measurements	108
3.3.8	Measurements of Operators with Continuous Spectrum	110
3.3.9	Sequential Measurements	110
3.3.10	Some Summarizing Remarks	112
3.4	The Extended Quantum Formalism	114
3.4.1	POVMs and Bohmian Experiments	115
3.4.2	Formal Experiments	116
3.4.3	From Formal Experiments to Experiments	119
3.4.4	Measure-Valued Quadratic Maps	120
3.5	The General Emergence of Operators	122
3.5.1	“No Interaction” Experiments	123
3.5.2	“No $X$ ” Experiments	124
3.5.3	“No $Y$ ” Experiments	126
3.5.4	“No $Y$ no $\Phi$ ” Experiments	127
3.5.5	The Basic Operators of Quantum Mechanics	127
3.5.6	From Positive-Operator-Valued Measures to Experiments	130
3.5.7	Invariance Under Trivial Extension	130
3.5.8	POVMs and the Positions of Photons and Dirac Electrons	131
3.6	Density Matrices	132
3.6.1	Density Matrices and Bohmian Experiments	133
3.6.2	Strong Experiments and Density Matrices	134
3.6.3	The Notion of Instrument	135
3.6.4	On the State Description Provided by Density Matrices	136

3.7	Genuine Measurements .....	137
3.7.1	A Necessary Condition for Measurability .....	138
3.7.2	The Nonmeasurability of Velocity, Wave Function and Deterministic Quantities .....	139
3.7.3	Initial Values and Final Values .....	140
3.7.4	Nonlinear Measurements and the Role of Prior Information .	141
3.7.5	A Position Measurement that Does not Measure Position ...	142
3.7.6	Theory Dependence of Measurement.....	143
3.8	Hidden Variables .....	144
3.8.1	Experiments and Random Variables .....	145
3.8.2	Random Variables, Operators, and the Impossibility Theorems .....	146
3.8.3	Contextuality.....	148
3.8.4	Against “Contextuality” .....	151
3.8.5	Nonlocality, Contextuality and Hidden Variables .....	154
3.9	Against Naive Realism About Operators .....	157
	References .....	159
<b>4</b>	<b>Quantum Philosophy: The Flight from Reason in Science .....</b>	<b>163</b>
	References .....	167
 <b>Part II Quantum Motion</b>		
<b>5</b>	<b>Seven Steps Towards the Classical World .....</b>	<b>171</b>
5.1	Introduction .....	171
5.2	Motion in an External Potential .....	172
5.3	The Classical Limit in Bohmian Mechanics .....	173
5.4	Wave Packets .....	175
5.5	Local Plane Waves .....	176
5.6	General Wave Functions .....	177
5.7	Limitations of the Model: Interference and the Role of the Environment.....	179
5.8	Towards a Mathematical Conjecture .....	180
5.9	The Classical Limit in a Nutshell .....	182
	References .....	182
<b>6</b>	<b>On the Quantum Probability Flux through Surfaces .....</b>	<b>183</b>
6.1	Introduction .....	183
6.2	Standard Scattering Theory .....	184
6.3	Near Field Scattering .....	187
6.4	Bohmian Mechanics .....	189
	References .....	191

<b>7</b>	<b>On the Weak Measurement of Velocity in Bohmian Mechanics</b>	193
7.1	Introduction	193
7.2	Bohmian Analysis of Weak Measurement of Velocity	196
7.3	A More Careful Analysis	199
7.4	Bohmian Mechanics and the Crucial Condition	200
7.5	The Impossibility of Measuring the Velocity in Bohmian Mechanics	201
7.6	Conclusion	202
	References	203
<b>8</b>	<b>Topological Factors Derived From Bohmian Mechanics</b>	205
8.1	Introduction	205
8.2	Bohmian Mechanics in Riemannian Manifolds	206
8.3	Scalar Wave Functions on the Covering Space	209
8.4	Vector-Valued Wave Functions on the Covering Space	213
8.5	Conclusions	218
	References	219
<b>Part III Quantum Relativity</b>		
<b>9</b>	<b>Hypersurface Bohm-Dirac Models</b>	223
9.1	Introduction	223
9.2	The Hypersurface Bohm-Dirac Model	227
9.3	Statistical Analysis of the HBD model	231
9.3.1	Quantum Equilibrium	231
9.3.2	Comparison with Quantum Mechanics	235
9.4	Perspective	237
	References	238
<b>10</b>	<b>Bohmian Mechanics and Quantum Field Theory</b>	239
10.1	Introduction	239
10.2	Configuration Space	240
10.3	The Laws of Motion	242
10.4	Field Operators	244
10.5	Conclusions	245
	References	246
<b>11</b>	<b>Quantum Spacetime without Observers: Ontological Clarity and the Conceptual Foundations of Quantum Gravity</b>	247
11.1	Introduction	247
11.2	The Conceptual Problems of Quantum Gravity	248
11.3	The Basic Problem of Orthodox Quantum Theory: the Lack of a Coherent Ontology	252
11.4	Bohmian Quantum Gravity	253
11.5	A Universal Bohmian Theory	256
	References	260
