

# Contents

<b>1</b>	<b>Generalised Neuber Concept of Fictitious Notch Rounding . . . . .</b>	<b>1</b>
1.1	Survey of Chapter Contents . . . . .	2
1.2	Fictitious Notch Rounding for Tensile Loading . . . . .	4
1.3	Fictitious Notch Rounding for Out-of-Plane Shear Loading . . . .	28
1.4	Fictitious Notch Rounding for In-Plane Shear Loading . . . . .	39
1.5	Application-Relevant Issues of the Fictitious Notch Rounding Concept . . . . .	69
	References . . . . .	98
<b>2</b>	<b>Extended Stress Intensity Factor Concepts . . . . .</b>	<b>101</b>
2.1	Survey of Chapter Contents . . . . .	103
2.2	Original Stress Intensity Factor Concept . . . . .	104
2.3	Notch Stress Intensity Factor Concept . . . . .	130
2.4	Generalised Notch Stress Intensity Factor Concept . . . . .	156
2.5	Plastic Notch Stress Intensity Factor Concept . . . . .	199
2.6	Stress Intensity Factor Concept for Rigid Inclusions . . . . .	242
	References . . . . .	257
<b>3</b>	<b>Local Strain Energy Density Concept . . . . .</b>	<b>267</b>
3.1	Survey of Chapter Contents . . . . .	268
3.2	Pointed Notch SED Concept . . . . .	269
3.3	Multiaxial Loading SED Concept . . . . .	292
3.4	Blunt Notch SED Concept . . . . .	301
3.5	Relation of the Local SED Concept to Comparable Concepts . . .	310
3.6	Special Issues of the SED Concept . . . . .	331
3.7	Coarse Mesh Options . . . . .	365
3.8	Conclusions from Chapter Contents . . . . .	380
	References . . . . .	385

<b>4 Elastic-Plastic Fatigue Crack Growth . . . . .</b>	<b>391</b>
4.1 Survey of Chapter Contents . . . . .	392
4.2 Crack Growth under Small-Scale Yielding Conditions . . . . .	392
4.3 Crack Growth under Large-Scale Yielding Conditions . . . . .	434
References . . . . .	471
<b>Index . . . . .</b>	<b>483</b>

Advanced Methods of Fatigue Assessment

Radaj, D.; Vormwald, M.

2013, XIV, 490 p., Hardcover

ISBN: 978-3-642-30739-3
