

Contents

1	Introduction	1
	Augusto Giussani and Christoph Hoeschen	
Part I Basic Principles and Physics of Nuclear Medical Imaging		
2	The Role of Imaging in Nuclear Medicine: The Medical Perspective	7
	Katrine Riklund	
3	Physics of Imaging in Nuclear Medicine	19
	Andrej Studen	
4	Tomographic and Hybrid Imaging in Nuclear Medicine	43
	Axel Martinez-Möller	
5	Perspectives in Nuclear Medicine Tomography: A Physicist's Point of View	69
	Stephan Walrand and François Jamar	
Part II Data Acquisition and Image Processing		
6	Reconstruction Algorithms and Scanning Geometries in Tomographic Imaging	99
	Oleg Tischenko and Christoph Hoeschen	
7	Advances in SPECT Image Reconstruction	127
	Gernot Ebel and Timo Aspelmeier	
8	Noise Reduction	135
	Oleg Tischenko and Christoph Hoeschen	
9	New Approaches to Quality Assurance	167
	Hugo de las Heras Gala	

Part III New Concepts in Nuclear Medical Imaging

10 The EURATOM FP7 Collaborative Project MADEIRA	189
Augusto Giussani and Marcus Söderberg	

11 Image Magnification with PET Insert Probe	203
Andrej Studen	

Part IV Optimization of Nuclear Medical Imaging

12 Rules of the Thumb	225
Christoph Hoeschen	

Index	231
