

Contents

1	WKB Approximation in Quantum Mechanics	1
1.1	One-Dimensional Motion	1
1.2	WKB-Approximation for a Particle in Central Field. Langer Transformation	16
	References	30
2	1/N-Expansion in Quantum Mechanics	31
2.1	1/N Expansion for Energy Levels of Binding States	35
2.2	Wave Functions of 1/n Expansion	49
	Reference	55
3	Rydberg States of Atomic Systems	57
3.1	Unperturbed Rydberg States of Atoms	59
3.2	Interaction Between a Rydberg Electron and an Electromagnetic Radiation	75
	References	104
4	Penetrability of Potential Barriers and Quasi-Stationary States . . .	105
4.1	Quasi-Stationary States of One-Dimensional Systems	107
4.2	Quasi-Stationary States and Above-Barrier Reflection	115
	References	153
5	Transitions and Ionization in Quantum Systems	155
5.1	Adiabatic Transitions	155
5.2	Ionization of Quantum Systems	161
	Index	175

WKB Approximation in Atomic Physics

Karnakov, B.M.; Krainov, V.P.

2013, VIII, 176 p., Hardcover

ISBN: 978-3-642-31557-2
