
Contents

Co-Seismic Fault Effects of Landslides Triggered by Wenchuan Ms 8.0 Earthquake, China	1
R. Q. Huang and W. L. Li	
Large Deformation Analysis for Costal Geo-Disasters Using Continuum and Discrete Modeling	13
A. Yashima, S. Moriguchi, R. Uzuoka, H. Nonoyama, and K. Sawada	
Seismic Design of Piles in Liquefiable Soils	31
S. Bhattacharya, R. Sarkar, and Y. Huang	
A New Method for Predicting Consolidation Settlement of Soft Ground Reinforced with Preloading Technique	45
G. B. Ye, X. An, and J. Wu	
An Approach to Identify a Linked Spatial Network for Large Mammal Conservation on Yellow Sea Coast	49
S. B. Fang, Z. Tian, Y. G. Sun, and C. S. Yin	
Analysis of Waterfront Excavation Adjacent to Pile-Supported Wharves	53
Z. K. Cheng, D. G. Wang, Y. C. Ding, J. Z. Hang, Q. Gu, and J. H. Wang	
Deformation Behavior of Braced Excavation and Its Influence on Adjacent Piles	57
Y. C. Ding, Z. K. Cheng, G. H. Li, and J. H. Wang	
Numerical Analysis on Deformation of Braced Excavation with Top-down Method	61
Y. C. Ding, D. G. Wang, J. C. Liu, K. H. Gu, Z. K. Cheng, and J. H. Wang	
Analysis of Engineering Geology Condition for Qingdao Tongan Area	65
D. W. Lv, W. F. Ning, B. B. Liu, H. Y. Liu, and J. P. Liang	
Simulation of Tidal Flat Terrain Based on Landform Feature Lines of Tidal Basin	69
Y. Y. Kang and X. R. Ding	

Test and Control Methods for On-Site Compaction of Fine Sand Subgrade on Coastal Regions	75
J. S. Qian, H. L. Wang, and P. Wang	
Strength and Permeability of Biostabilized Sand	79
E. Yee, J. H. Lee, Y. S. Kim, S. R. Chung, H. Y. Kim, and B. S. Chun	
Numerical Study on the Full-Range Consolidation Characteristics of a New Dredger Fill Foundation	83
F. F. Ren, Q. Xu, C. Xu, X. H. Xu, and H. Z. Wang	
Centrifuge Modeling of Embedment Effects on Eccentrically Loaded Shallow Foundation on Sand	89
M. Cocjin, T. Fujita, O. Kusakabe, and M. Kitazume	
An Investigation on Stress–Strain Relationship of on Eucalyptus Saligna by Pull-Out Method Based on Regression Analysis	97
F. Chen, X. B. Xiong, S. Tan, R. L. Chen, and C. Gu	
Detection of Submerged Sand Bars in the Ebro Delta Using ASTER Images	103
R. Rodríguez-Martín and I. Rodríguez-Santalla	
A Brief Review of Actual Dune Dynamics Modeling: Applicability to El Fangar Dune System (Ebro Delta-Spain)	107
F. Barrio-Parra, I. Rodríguez-Santalla, M. Sánchez-García, and I. Montoya-Montes	
Transportation of Huanghe River-Discharged-Suspended Sediments in Nearshore of Huanghe River Delta in Conditions of Different Estuary Channels	111
X. H. Xue, G. S. Li, and L. Y. Yuan	
3D Sediment Physical Model Test Study for PLTU 2 JATENG 1 × 660 MW Adipala, Cilacap, Indonesia	117
F. Gao, H. B. Chen, and Y. Luo	
Compression Behaviors of Marine Clay for Coastal Reclamation in Dalian, China	123
M. J. Jiang, N. Zhang, and J. D. Liu	
Numerical Modeling of Tidal Effects on Groundwater in the Coastal Aquifer of Donghai Island	131
P. P. Zhou, G. M. Li, M. Li, and Y. H. Dong	
Engineering Geological Assessment of the Anzali Coastal Region (North Iran, South Caspian Coast) to Sustain Urban Planning and Development	135
M. Hashemi, M. R. Nikoudel, N. Hafezi Moghaddas, and M. Khamsehchiyan	

Evaluation of Engineering Geological Condition in Shanghai Coastal Area	141
Y. J. Shi, X. X. Yan, J. H. Wang, Z. Fang, and B. Li	
Study of Optimum Building Spacing of Dense High-Rise Building Group in Shanghai Based on Centrifugal Model Test	145
Y. Q. Tang, C. S. Sun, S. P. Song, Q. Yang, and J. Li	
THM Simulation for Real-Scale Field Test	153
Y. L. Xiong, F. Zhang, T. Nishimura, and Y. Kurimoto	
Cluster Analysis for Orientation Data Using DiffFUZZY Method	157
J. Wu and Z. X. Zhang	
Research Progress and Trend of Geotechnical Environmental Problems in Large-Scale Reclamation Projects	163
F. S. Ma, R. L. Hu, J. H. Xiong, and Q. H. Deng	
Change Law of Vane Shear Strength of Soft Soil with Depth in Coastal City	169
P. Yang, T. Deng, Z. J. Zhou, Y. Q. Tang, and J. X. Wang	
The Bearing Capacity of Flexible Piles Under Combined Loads in Dense Sand	173
M. Jian, C. Zhao, C. F. Zhao, and W. Z. Wang	
Foundation Design Challenges at Hunter Expressway Alliance Project in Australia	177
H. H. Zhang and B. Choi	
Analytical Solutions for Three-Dimensional Stability of Coastal Slope	181
C. Y. Han, X. H. Xia, and J. H. Wang	
NCEER Method and Application of an Embankment Slope with Liquefaction Problem in Coastal Area	187
G. L. Wang, H. Y. Liu, F. Q. Wu, and G. X. Yang	
Low-Order Lateral Buckling Analysis of Submarine Pipeline Under Thermal Stress	191
L. P. Guo, R. Liu, and S. W. Yan	
DEM Coupled SMAC Simulation on the Moving Process of Flow Like Landslide	195
A. Kondo, Y. Huang, and K. Maeda	
Risk Assessment for Coal Mining Under Sea Area	199
W. H. Sui and Z. M. Xu	

Potential of Using Remote Sensing Data for Dike Inspection	203
S. L. Cundill, H. R. G. K. Hack, M. van der Meijde, J. S. van der Schrier, and D. J. M. Ngan-Tillard	
Experimental Investigation for Water Flowing Fractured Zone Due to Coal Mining Under Sea Area.	207
W. X. Wang, W. Hu, and Y. K. Liang	
Geodisasteres Prevention and Reinforcement of the Sea Coast in Primorsko Town in Bulgaria	211
K. A. Anguelov	
Potential Tsunami Hazard Modelling of Black Sea Coastline, Turkey	217
Ö. Acir, V. I. Agoshkov, R. Aps, A. A. Danilov, and V. B. Zalesny	
Alluvial Risk in the Costal Plain of Pesaro City, Northern Marche (Italy)	223
U. Gori, M. Mari, and R. W. Romeo	
Analysis of the Carbon Monoxide Released Law Caused by Shield Construction in Shallow Stratum in Sea Reclamation District.	227
J. X. Wang, B. P. Zou, X. J. Chen, J. Yi, and G. L. Kuang	
Numerical Simulation of Seismic Responses of Asymmetric-Plan Reinforced Concrete Frame With Brbs	233
H. J. Sun and C. X. Li	
Seismic Analysis of Geosynthetic-Reinforced Quay-Wall Structure	239
J. F. Lu, B. Ye, and J. Nagaya	
Shape Effect on Active Earth Pressure Against a Sheet Pile Wall with Different Displacement Modes	245
F. Liu, G. Q. Zhang, M. J. Jiang, and H. Nakayama	
“Atlant” Anchor Pile Technology and Capacity Experimental Results	251
D. Malinin and A. Malinin	
Statistical Prediction of Overburden Failure Due to Coal Mining Under Sea Area	255
Z. M. Xu and W. H. Sui	
Numerical Analysis for the Stability of Over-Length Trench Wall Based on a Novel Pre-supporting Excavation Method.	259
Z. X. Zhang, C. H. Pan, and C. F. Duan	
Estimating the Effects of Shield Tunnelling on Buried Pipelines Based on a Kerr Foundation Model.	263
H. Zhang and Z. X. Zhang	

Depositional History and Geotechnical Properties of Shanghai Clays	269
C. J. Wu, G. L. Ye, J. R. Sheng, and J. H. Wang	
On the Using of Deformation Rates as Stability Control Parameters of PVD-Treated Soft Ground.	275
Y. B. Gao	
Application of Improved Vacuum Preloading Method in Tianjin Lingang Industrial Zone	279
C. Le, C. Xu, Y. W. Jin, and Y. Yang	
Observations on the New Trace of Quaternary Glacial Epoch in the Yangtze Three Gorges Area.	285
Y. J. Li	
Strengths of Unsaturated Silty Clay Used as Garden Hill Fill in Shanghai.	289
Y. B. Gao, X. N. Ge, and J. Song	
Index	293
Author Index	303

New Frontiers in Engineering Geology and the
Environment

Proceedings of the International Symposium on Coastal
Engineering Geology, ISCEG-Shanghai 2012

Huang, Y.; Wu, F.; Shi, Z.; Ye, B. (Eds.)

2013, XI, 304 p. 282 illus., 140 illus. in color., Hardcover

ISBN: 978-3-642-31670-8
