<b>Introduction</b> .....	ix
<b>1 <math>\mathcal{J}</math>-Filtrations</b> .....	1
1.1 Introduction .....	1
1.2 Étale Spaces of Sheaves .....	2
1.3 Étale Spaces of Sheaves of Ordered Abelian Groups .....	3
1.4 The Category of Pre- $\mathcal{J}$ -Filtrations .....	5
1.5 Traces for Étale Maps .....	10
1.6 Pre- $\mathcal{J}$ -Filtrations of Sheaves .....	11
1.7 $\mathcal{J}$ -Filtrations of Sheaves (the Hausdorff Case) .....	13
1.8 $\mathcal{J}$ -Filtered Local Systems (the Hausdorff Case) .....	16
1.9 $\mathcal{J}$ -Filtered Local Systems (the Stratified Hausdorff Case) .....	16
1.10 Comments .....	19
<b>Part I Dimension One</b>	
<b>2 Stokes-Filtered Local Systems in Dimension One</b> .....	23
2.1 Introduction .....	23
2.2 Non-ramified Stokes-Filtered Local Systems .....	23
2.3 Pull-Back and Push-Forward .....	29
2.4 Stokes Filtrations on Local Systems .....	31
2.5 Extension of Scalars .....	35
2.6 Stokes-Filtered Local Systems and Stokes Data .....	36
<b>3 Abelianity and Strictness</b> .....	39
3.1 Introduction .....	39
3.2 Strictness and Abelianity .....	40
3.3 Level Structure of a Stokes-Filtered Local System .....	41
3.4 Proof of Theorem 3.5 .....	43
3.5 Proof of the Stability by Extension .....	48
3.6 More on the Level Structure .....	48
3.7 Comments .....	49

<b>4</b>	<b>Stokes-Perverse Sheaves on Riemann Surfaces</b>	51
4.1	Introduction	51
4.2	The Setting	52
4.3	The Category of Stokes- $\mathbb{C}$ -Constructible Sheaves on $\widetilde{X}$	53
4.4	Derived Categories and Duality	55
4.5	The Category of Stokes-Perverse Sheaves on $\widetilde{X}$	58
4.6	Direct Image to $X$	60
4.7	Stokes-Perverse Sheaves on $\widetilde{X}$	60
4.8	Associated Perverse Sheaf on $X$	62
<b>5</b>	<b>The Riemann–Hilbert Correspondence for Holonomic <math>\mathcal{D}</math>-Modules on Curves</b>	65
5.1	Introduction	65
5.2	Some Basic Sheaves	66
5.3	The Riemann–Hilbert Correspondence for Germs	68
5.4	The Riemann–Hilbert Correspondence in the Global Case	75
5.5	Compatibility with Duality for Meromorphic Connections	77
<b>6</b>	<b>Applications of the Riemann–Hilbert Correspondence to Holonomic Distributions</b>	79
6.1	Introduction	79
6.2	The Riemann–Hilbert Correspondence for Meromorphic Connections of Hukuhara–Turrittin Type	80
6.3	The Hermitian Dual of a Holonomic $\mathcal{D}_X$ -Module	81
6.4	Asymptotic Expansions of Holonomic Distributions	82
6.5	Comments	88
<b>7</b>	<b>Riemann–Hilbert and Laplace on the Affine Line (the Regular Case)</b>	89
7.1	Introduction	89
7.2	Direct Image of the Moderate de Rham Complex	91
7.3	Topological Spaces	95
7.4	Topological Laplace Transform	97
7.5	Proof of Theorem 7.6 and Compatibility with Riemann–Hilbert	101
7.6	Compatibility of Laplace Transformation with Duality	103
7.7	Compatibility of Topological Laplace Transformation with Poincaré–Verdier Duality	105
7.8	Comparison of Both Duality Isomorphisms	108
<b>Part II Dimension Two and More</b>		
<b>8</b>	<b>Real Blow-Up Spaces and Moderate de Rham Complexes</b>	115
8.1	Introduction	115
8.2	Real Blow-Up	116

8.3	The Sheaf of Functions with Moderate Growth on the Real Blow-Up Space .....	118
8.4	The Moderate de Rham Complex .....	121
8.5	Examples of Moderate de Rham Complexes .....	127
<b>9</b>	<b>Stokes-Filtered Local Systems Along a Divisor with Normal Crossings</b> .....	131
9.1	Introduction .....	131
9.2	The Sheaf $\mathcal{J}$ on the Real Blow-Up (Smooth Divisor Case) .....	132
9.3	The Sheaf $\mathcal{J}$ on the Real Blow-Up (Normal Crossing Case) .....	133
9.4	Goodness .....	134
9.5	Stokes Filtrations on Local Systems .....	138
9.6	Behaviour by Pull-Back .....	142
9.7	Partially Regular Stokes-Filtered Local Systems .....	145
<b>10</b>	<b>The Riemann–Hilbert Correspondence for Good Meromorphic Connections (Case of a Smooth Divisor)</b> .....	147
10.1	Introduction .....	147
10.2	Good Formal Structure of a Meromorphic Connection .....	149
10.3	The Riemann–Hilbert Functor .....	150
10.4	Proof of the Full Faithfulness in Theorem 10.8 .....	152
10.5	Elementary and Graded Equivalences .....	153
10.6	Proof of the Essential Surjectivity in Theorem 10.8 .....	155
<b>11</b>	<b>Good Meromorphic Connections (Formal Theory)</b> .....	159
11.1	Introduction .....	159
11.2	Preliminary Notation .....	160
11.3	Good Formal Decomposition .....	161
11.4	Good Lattices .....	166
11.5	Proof of Theorem 11.18 .....	168
11.6	Comments .....	175
<b>12</b>	<b>Good Meromorphic Connections (Analytic Theory) and the Riemann–Hilbert Correspondence</b> .....	177
12.1	Introduction .....	177
12.2	Notation .....	178
12.3	The Malgrange–Sibuya Theorem in Higher Dimension .....	179
12.4	The Higher Dimensional Hukuhara–Turrittin Theorem .....	181
12.5	The Riemann–Hilbert Correspondence .....	188
12.6	Application to Hermitian Duality of Holonomic $\mathcal{D}$ -Modules .....	191
12.7	Comments .....	192
<b>13</b>	<b>Push-Forward of Stokes-Filtered Local Systems</b> .....	195
13.1	Introduction .....	195
13.2	Preliminaries .....	196
13.3	Adjunction .....	197
13.4	Recent Advances on Push-Forward and Open Questions .....	198

13.5	An Example of Push-Forward Computation .....	199
13.6	The Topological Computation of the Stokes Filtration: Leaky Pipes .....	201
<b>14</b>	<b>Irregular Nearby Cycles</b> .....	207
14.1	Introduction .....	207
14.2	Moderate Nearby Cycles of Holonomic $\mathcal{D}$ -Modules .....	208
14.3	Irregular Nearby Cycles (After Deligne) .....	213
14.4	Another Proof of the Finiteness Theorem in Dimension Two .....	214
<b>15</b>	<b>Nearby Cycles of Stokes-Filtered Local Systems</b> .....	227
15.1	Introduction .....	227
15.2	Nearby Cycles Along a Function (the Good Case) .....	228
15.3	Nearby Cycles Along a Function (Dimension Two) .....	231
15.4	Comparison .....	236
	<b>References</b> .....	239
	<b>Index of notation</b> .....	245
	<b>Index</b> .....	247

Introduction to Stokes Structures

Sabbah, C.

2013, XIV, 249 p. 14 illus., 1 illus. in color., Softcover
