

# Contents

<b>1</b>	<b>A Geometric Morphometric Approach in Assessing Paleontological Problems in Atrypid Taxonomy, Phylogeny, Evolution and Ecology . . . . .</b>	<b>1</b>
1.1	Introduction . . . . .	1
1.1.1	Brief Outline . . . . .	1
1.1.2	Why Silurian and Devonian Time Periods for this Study? . . . . .	2
1.1.3	Why Brachiopods? . . . . .	3
1.1.4	Why Geometric Morphometric Methods? . . . . .	4
	References . . . . .	5
<b>2</b>	<b>Testing the Taxonomy and Phylogeny of Eastern North American Atrypid Brachiopods: A Geometric Morphometric Approach . . . .</b>	<b>11</b>
2.1	Introduction . . . . .	11
2.1.1	Taxonomy . . . . .	11
2.1.2	Hypotheses . . . . .	12
2.1.3	Ecological Evolutionary Units and Subunits . . . . .	16
2.2	Materials . . . . .	16
2.2.1	Paleogeography . . . . .	16
2.3	Methods . . . . .	18
2.3.1	Data Set . . . . .	18
2.3.2	Geometric Morphometrics . . . . .	19
2.3.3	Morphometric Divergence . . . . .	20
2.3.4	Statistical Analysis . . . . .	21
2.4	Results . . . . .	22
2.4.1	Taxonomic Differentiation . . . . .	22
2.4.2	Temporal Variation . . . . .	25
2.4.3	Spatial Variation . . . . .	27

2.5	Discussion . . . . .	28
2.5.1	Taxonomy . . . . .	28
2.5.2	Temporal Variation . . . . .	31
2.5.3	Spatial Variation . . . . .	33
2.5.4	Environmental Effect. . . . .	34
2.6	Conclusion . . . . .	36
	References . . . . .	37
<b>3</b>	<b>Morphological Evolution in an Atrypid Brachiopod Lineage from the Middle Devonian Traverse Group of Michigan, USA: A Geometric Morphometric Approach . . . . .</b>	<b>41</b>
3.1	Introduction . . . . .	41
3.1.1	Hypotheses. . . . .	43
3.2	Geologic Setting . . . . .	44
3.3	Materials and Methods. . . . .	45
3.4	Results . . . . .	48
3.5	Discussion . . . . .	52
3.5.1	Patterns of Stasis and Change and Their Possible Causes . . . . .	52
3.5.2	Shell Function and Shape Change. . . . .	57
3.6	Conclusion . . . . .	58
	References . . . . .	59
<b>4</b>	<b>Morphological Shape, Episkeletobiont Analysis, and Life Orientation Study in <i>Pseudoatrypa cf. lineata</i> (Brachiopoda) from the Lower Genshaw Formation of the Middle Devonian Traverse Group, Michigan: A Geometric Morphometric Approach . . . . .</b>	<b>63</b>
4.1	Introduction . . . . .	63
4.2	Geologic Setting . . . . .	65
4.3	Materials and Methods. . . . .	66
4.3.1	Sampling . . . . .	66
4.3.2	Species Recognition . . . . .	66
4.3.3	Morphometrics . . . . .	67
4.3.4	Episkeletobiont Analysis . . . . .	69
4.4	Results. . . . .	72
4.4.1	Morphology and Morphometrics. . . . .	72
4.4.2	Frequency of Episkeletobionts . . . . .	74
4.4.3	Location of Episkeletobionts . . . . .	79
4.5	Discussion . . . . .	82
4.5.1	Morphology of <i>Pseudoatrypa lineata</i> and <i>Pseudoatrypa</i> sp. A. . . . .	82
4.5.2	Species Preference of Episkeletobionts . . . . .	84
4.5.3	Live-Dead and Live-Live Associations . . . . .	85

4.5.4	Distribution of Episkeletobionts on <i>P. lineata</i> and <i>Pseudoatrypa</i> sp. A. . . . .	87
4.5.5	Inference of Life Orientation in <i>P. lineata</i> and <i>Pseudoatrypa</i> sp. A. . . . .	89
4.6	Conclusion . . . . .	90
	References . . . . .	91
<b>5</b>	<b>Success of Geometric Morphometrics in Deducing Morphological Shape Change Patterns in Paleozoic Atrypids . . . . .</b>	<b>97</b>
5.1	Conclusion . . . . .	97
5.1.1	Brief Inferences . . . . .	97
5.1.2	Atrypid Taxonomy, Evolution and Ecology . . . . .	98
5.1.3	This Study Supports or Contradicts EEU, EESU and PE Model? . . . . .	99
5.1.4	Evolutionary Ecology in Silurian-Devonian Brachiopods . . . . .	99
	References . . . . .	100

Biodiversity and Evolutionary Ecology of Extinct  
Organisms

Bose, R.

2013, XVIII, 102 p., Hardcover
