

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Notation, Naming, and General Definitions</b>	<b>7</b>
2.1	Time, Time Interval, and Time Scale	7
2.2	Time Series	9
2.2.1	Historical, Centered and Realized Quantities	9
2.2.2	Returns	10
2.2.3	Volatilities	11
2.2.4	Volatility Increments	12
2.3	Average, Expectation	12
2.4	Scaling, Annualization, and Reference Time Interval	13
2.5	EMA, MA, and Operators on Time Series	14
2.6	Computation of the Histograms and Pdf	16
<b>3</b>	<b>Stylized Facts</b>	<b>17</b>
3.1	Introduction	17
3.2	Probability Density Function	18
3.2.1	Pdf for the Return	18
3.2.2	Pdf for the Volatility	20
3.2.3	Pdf for the Volatility Increment	22
3.3	Scaling for the Moments: The Width of the Pdf	23
3.3.1	Introduction	23
3.3.2	Scaling for the Return	23
3.3.3	Scaling for the Volatility	25
3.4	Relative Excess Kurtosis: The Shape of the Pdf	26
3.4.1	Introduction	26
3.4.2	Relative Excess Kurtosis for the Return	27
3.4.3	Relative Excess Kurtosis for the Volatility	27
3.4.4	Relative Excess Kurtosis for the Volatility Increment	27

3.5	Lagged Correlations . . . . .	28
3.5.1	Introduction . . . . .	28
3.5.2	Lagged Correlations for the Absolute Return . . . . .	29
3.5.3	Lagged Correlations for the Volatility . . . . .	31
3.6	Correlation with the Realized Volatility . . . . .	34
3.6.1	Introduction . . . . .	34
3.6.2	Autocorrelation for the Volatility . . . . .	35
3.6.3	Correlations Between the Historical and Realized Volatilities . . . . .	35
3.6.4	Correlations Between the Realized Volatility and the Historical Volatility Increment . . . . .	37
3.6.5	Correlations of the Realized Volatilities with the Centered Volatility Increment . . . . .	38
3.7	Correlation for the Volatility Increment . . . . .	38
3.8	Volatility Graining . . . . .	41
3.9	Trend and Leverage Effects . . . . .	44
3.9.1	Historical Return Versus Realized Volatility Correlation . . . . .	44
3.9.2	Trend/Drift Versus Realized Volatility Correlation . . . . .	45
3.10	Time Reversal Invariance . . . . .	46
<b>4</b>	<b>Empirical Mug Shots . . . . .</b>	<b>49</b>
<b>5</b>	<b>Process Overview . . . . .</b>	<b>57</b>
5.1	Why Using a Finite Time Increment for the Processes? . . . . .	57
5.2	The Definition of the Returns . . . . .	59
5.3	The Most Important Stylized Facts . . . . .	60
5.4	ARCH Processes . . . . .	65
5.5	Stochastic Volatility Processes . . . . .	66
5.6	Regime-Switching Processes . . . . .	66
5.7	The Plan for the Forthcoming Chapters . . . . .	67
<b>6</b>	<b>Logarithmic Versus Relative Random Walks . . . . .</b>	<b>69</b>
6.1	Motivations . . . . .	69
6.2	The Definitions of the Return . . . . .	70
6.3	Logarithmic Process: One Asset, Constant Volatility . . . . .	72
6.4	Geometric Process: One Asset, Constant Volatility . . . . .	73
6.5	Long Time Properties of the (Constant Volatility) Random Walk Process . . . . .	75
6.6	Geometric Process: Many Assets, Constant Volatility . . . . .	76
6.6.1	One Time-Step . . . . .	77
6.6.2	Many Time Steps . . . . .	77
6.7	Enforcing the Condition $r_{\text{rel}} > -1$ or $r_{\text{rel}} \geq -1$ . . . . .	79
6.8	Skewness . . . . .	79
6.9	The Broader Perspective So Far . . . . .	83

<b>7</b>	<b>ARCH Processes</b>	85
7.1	GARCH(1, 1)	85
7.1.1	Volatility Forecast for the GARCH(1, 1) Process*	92
7.1.2	Computation for the Lagged Correlation*	93
7.2	I-GARCH(2)	95
7.3	EGARCH(1, 1)	95
7.4	Linear Versus Affine Processes	96
7.5	Multicomponent ARCH Processes	99
7.6	General Considerations on Volatility Forecast	101
7.7	Volatility Forecast for the Microscopic ARCH Processes	102
7.7.1	Explicit Equations for the Volatility Forecasts*	102
7.8	Geometric ARCH Processes	105
7.9	Long-Memory ARCH Processes	106
7.10	The Long-Memory Affine Pure-Aggregated ARCH Process	107
7.11	The Market-ARCH Processes	110
7.12	FIGARCH( $p, d, m$ )	113
7.13	The GARCH Processes with Trends: GARTCH*	118
7.14	Sensitivity with Respect to the Estimated Parameters	121
7.15	Long-Term Dynamics for the Mean Volatility*	122
7.16	The Induced Dynamics for the Volatility	123
7.17	Some Thoughts on the Small Values of $w_\infty$	126
7.18	Which Simple ARCH Process and Parameter Values to Use Overall?	127
<b>8</b>	<b>Stochastic Volatility Processes</b>	129
8.1	Introduction	129
8.1.1	Stochastic Time Processes	131
8.2	Exponential Stochastic Volatility Process	132
8.2.1	One-Component Exponential Stochastic Volatility Process	132
8.2.2	Long-Memory Exponential Stochastic Volatility Process	134
8.3	Heston Stochastic Volatility Process	135
8.3.1	One-Component Heston Stochastic Volatility Process	135
8.3.2	Long-Memory Heston Stochastic Volatility Process	140
<b>9</b>	<b>Regime-Switching Process</b>	143
<b>10</b>	<b>Price and Volatility Using High-Frequency Data</b>	147
10.1	Introduction	147
10.2	The Short-Term Models for the Prices	149
10.2.1	Prices with Finite Granularity	149
10.2.2	The Incoherent Prices	150
10.3	Models for the Underlying Price	152
10.4	Continuous Price Paths and the Realized Variance	152
10.5	Correction with Multiple Time-Scale Estimation	155
10.6	Correction with Lagged Variance	156
10.7	AR(1) Filter on the Prices	158
10.8	Tick Time Sampling and the Volatility per Tick	160

<b>11</b>	<b>Time-Reversal Asymmetry</b>	163
11.1	Statement of the Problem	163
11.2	Empirical Time Reversal Statistics	166
11.3	TRI in Theoretical Processes	169
11.4	Test Statistics	170
11.5	Possible Origins of Time Irreversibility	174
11.6	The Analogy with Hydrodynamic Turbulence	176
11.7	Further Thoughts on Time-Reversal Invariance	177
<b>12</b>	<b>Characterizing Heteroscedasticity</b>	181
12.1	Introduction	181
12.2	Volatility and Correlation Estimators	183
12.2.1	The Volatility Estimator	183
12.2.2	The Lagged Correlation Estimators	183
12.3	Lagged Correlation Shapes	185
12.3.1	Exponential Decay	185
12.3.2	Two Exponentials with Fixed Ranges	186
12.3.3	Power Law Decay	186
12.3.4	Logarithmic Decay	186
12.4	The Cost Function and Parameter Estimation	187
12.5	Monte Carlo Simulations	188
12.6	Lagged Correlations for Empirical Time Series	190
12.7	The DJIA over One Century	194
12.8	Summarizing the Findings About the Heteroscedasticity	195
<b>13</b>	<b>The Innovation Distributions</b>	197
13.1	Empirical Probability Distribution for the Returns	197
13.2	The Mapping Between Returns and Innovations	198
13.3	Empirical Probability Distributions for the Innovations	201
<b>14</b>	<b>Leverage Effect</b>	205
14.1	Introduction	205
14.2	Empirical Statistics	205
14.3	Processes with Leverage and Monte Carlo Simulations	207
<b>15</b>	<b>Processes and Market Risk Evaluation</b>	211
15.1	Background on Risk Evaluation	211
15.2	“Return-Based” Versus “Innovation-Based” Risk Methodologies	214
15.3	General Considerations on Innovation-Based Risk Methodologies	216
15.4	The Main Innovation-Based Risk Methodologies	218
15.4.1	The RM1994 Risk Methodology	218
15.4.2	The RM2006 Risk Methodology	219
15.5	Market Risk Evaluations in Practice	220
15.6	Backtesting	222
15.6.1	Stating the Problem	222
15.6.2	Mapping to the Probtils	222
15.6.3	An Example: Backtesting the DJIA over One Century	224

15.7	Measuring Accurately Shocks . . . . .	227
15.7.1	Defining the Scale of Market Shocks . . . . .	228
15.7.2	Empirical Properties of the Scale of Market Shocks . . . . .	229
<b>16</b>	<b>Option Pricing . . . . .</b>	<b>233</b>
16.1	Processes and the Price of Options . . . . .	233
16.2	The Stock Process . . . . .	236
16.3	The Equivalent Martingale Measure . . . . .	237
16.4	The Valuation of European Style Contingent Claims . . . . .	239
16.5	Minimal Variance Hedging . . . . .	242
16.6	Small $\delta t$ Expansion . . . . .	243
16.7	Moneyness and Implied Volatility . . . . .	248
16.8	Application for ARCH Processes . . . . .	249
16.9	Cross-Product Approximation of the IV Surface . . . . .	251
<b>17</b>	<b>The Empirical Properties of Large Covariance Matrices . . . . .</b>	<b>257</b>
17.1	Introduction . . . . .	257
17.2	Theoretical Framework . . . . .	259
17.3	The Datasets for the Empirical Studies . . . . .	261
17.4	The Dynamics of the Covariance Spectrum . . . . .	262
17.5	The Dynamics of the Correlation Spectrum . . . . .	263
17.6	Spectral Density of the Correlation Matrix . . . . .	264
17.7	Spectrum and Spectral Density of the Covariance . . . . .	266
17.8	Mean Projector . . . . .	268
17.9	Projector Dynamics . . . . .	269
17.10	Putting All the Pieces Together . . . . .	271
<b>18</b>	<b>Multivariate ARCH Processes . . . . .</b>	<b>273</b>
18.1	Introduction . . . . .	273
18.2	General Setup for Multivariate Processes . . . . .	274
18.3	Multivariate Linear ARCH Processes . . . . .	275
18.3.1	The Linear Covariance Matrix . . . . .	275
18.3.2	The Inverse Covariance Matrix . . . . .	277
18.3.3	Quantifying the Properties of the Returns and the Innovations . . . . .	279
18.3.4	The Sample Correlations for the Returns . . . . .	279
18.3.5	The Sample Correlations for the Residuals . . . . .	281
18.3.6	Whitening of the Residuals . . . . .	282
18.3.7	Comparing Different Covariance Kernels . . . . .	285
18.3.8	“Projected” and “Full Rank” Regularizations . . . . .	286
18.3.9	Summarizing the Situations . . . . .	288
18.4	Multivariate Affine ARCH Processes . . . . .	289
18.5	More General Extensions for the Multivariate GARCH Process . . . . .	291

<b>19</b>	<b>The Processes Compatible with the Stylized Facts . . . . .</b>	<b>295</b>
<b>20</b>	<b>Further Thoughts . . . . .</b>	<b>299</b>
20.1	Multi-time Horizon Analysis . . . . .	299
20.2	Slow Decay for the Lagged Correlation . . . . .	300
20.3	Definition of “the” Volatility . . . . .	301
20.4	Is the Heteroscedasticity that Important? . . . . .	301
20.5	Fat-Tailed Distributions . . . . .	302
20.6	Convergence Toward a Gaussian Distribution . . . . .	304
20.7	Temporal Aggregation . . . . .	305
20.8	Mean Reversion and Ornstein–Uhlenbeck Processes . . . . .	306
	<b>References . . . . .</b>	<b>309</b>
	<b>Index . . . . .</b>	<b>317</b>

Discrete Time Series, Processes, and Applications in  
Finance

Zumbach, G.

2013, XXII, 322 p., Hardcover

ISBN: 978-3-642-31741-5
