

Contents

1	The Wrist Joint	1
1.1	Anatomy of the Wrist Joint	1
1.2	Bone Structure	3
1.3	Cartilage Structure	4
1.4	Ligament Structure	7
1.5	Kinematics	8
	References	11
2	Biomechanical Properties and Behaviours of the Wrist Joint	13
2.1	Contact Surfaces and Load Transmission	13
2.2	Biomechanical Consideration of the Cartilage Structure	14
2.3	Biomechanical Consideration of the Ligamentous Structure	15
2.4	Current Trends in Biomechanical Modelling	17
2.4.1	Rigid Body Spring Method	17
2.4.2	Finite Element Method	17
	References	22
3	The Wrist Joint Affected by Rheumatoid Arthritis	25
3.1	Pathology	25
3.2	Rheumatoid Arthritis	26
3.3	Treatment	30
	References	31
4	Finite Element Modelling of the Healthy Wrist Joint	33
4.1	Bone Model Reconstruction	33
4.2	Modelling of Cartilages	39
4.3	Modelling of Ligaments	39
	References	40

5	Finite Element Analysis of the Wrist Joint Affected by Rheumatoid Arthritis	41
5.1	Finite Element Model Construction of the Rheumatic Wrist	41
5.1.1	Simulation of Cartilage Destruction.	42
5.1.2	Simulation of Loss of Carpal Height	43
5.1.3	Simulation of Dislocation of the Carpus in the Ulnar Direction	43
5.1.4	Simulation of Dislocation of the Proximal Carpal Row in the Palmar and Ulnar Directions	43
5.1.5	Simulation of Scapholunate Dissociation and Scapholunate Advanced Collapse	45
5.1.6	Simulation of Dislocation of the Scaphoid in the Palmar Direction	46
5.1.7	Simulation of Hand Scoliosis	46
5.1.8	Simulation of Reduction of Contact Between the Lunate and the Radius	47
5.1.9	Simulation of Bone Erosion	47
5.2	Finite Element Analysis: Pre-Processing Procedures	48
5.3	Biomechanical Behaviours of the Rheumatic Wrist Joint	50
5.3.1	Comparative Analysis	50
5.3.2	The Biomechanical Effect of Symptoms and Pathophysiological Characteristics.	52
	References	56
6	Finite Element Analysis of the Wrist Arthroplasty in Rheumatoid Arthritis.	59
6.1	Total Wrist Arthroplasty.	59
6.2	Finite Element Modelling of the Total Wrist Arthroplasty	60
6.3	Finite Element Analysis: Pre-Processing Procedures	60
6.4	Finite Element Analysis	65
6.4.1	Mechanical Stress Distribution Within the Bones	66
6.4.2	Mechanical Contact Pressure Within the Bones	67
6.4.3	Biomechanical Analysis of Different Moduli of Bone Graft.	67
6.4.4	Biomechanical Assessment of the Total Wrist Arthroplasty Procedure	67
	References	68
	Summary	71
	Index	73

Computational Biomechanics of the Wrist Joint

Nazri Bajuri, M.; Abdul Kadir, M.R.

2013, XI, 74 p. 43 illus., Softcover

ISBN: 978-3-642-31905-1
