## Part I Keynote Lecture

<b>1</b>	<b>Formation and Risk Reduction of Landslide-Dammed Lakes Resulted by the <math>M_s</math> 8.0 Wenchuan Earthquake: A Brief Review and a Proposal . . . . .</b>	<b>3</b>
	Peng Cui, Zhi-man Su and Xiao-qing Chen	
<b>2</b>	<b>Local Scale Seismic Landslide Susceptibility Assessment Based on Historic Earthquake Records Combined with Accelerometer Monitoring and Ambient Noise Data. . . . .</b>	<b>11</b>
	Janusz Wasowski, Vincenzo Del Gaudio, Domenico Casarano, Piernicola Lollino and Sandro Muscillo	
<b>3</b>	<b>Use of Indirect Evidence for the Prehistoric Earthquake-Induced Landslides Identification . . . . .</b>	<b>21</b>
	Alexander Strom	
<b>4</b>	<b>Bhedetar Landslide, Eastern Nepal: Aftermath of the Sikkim Earthquake (18th September 2011) . . . . .</b>	<b>31</b>
	Vishnu Dangol, Hiroshi Yagi and Daisuke Higaki	
<b>5</b>	<b>Classification of the Geomorphology, Geology and Movement Types of Earthquake Landslides . . . . .</b>	<b>37</b>
	Daisuke Higaki and Shinro Abe	
<b>6</b>	<b>The Collapse Process of Granular Slopes Under Seismic Forcing . . . . .</b>	<b>45</b>
	Hsien-Ter Chou, Ching-Fang Lee and Su-Chin Chen	
<b>7</b>	<b>Slope Motion Response and Failure Under Strong Earthquakes: Recording, Monitoring and Modeling . . . . .</b>	<b>59</b>
	Runqiu Huang	

## Part II JLS-ELRP WG Report

<b>8</b>	<b>Secondary Hazards Associated with Coseismic Landslide . . . . .</b>	<b>77</b>
	Takashi Okamoto, Masaaki Sakurai, Satoshi Tsuchiya, Hiroyuki Yoshimatsu, Kiichiro Ogawa and Gonghui Wang	
<b>9</b>	<b>Effects of Existing Prevention Works on Earthquake-Induced Landslides . . . . .</b>	<b>83</b>
	Akira Nakamura, Tomoyuki Noro, Kiyoteru Maruyama, Bateer Hasi, Yasuo Ishii and Nobutoshi Ikeda	
<b>10</b>	<b>An Examination of the Stability of an Earthquake-Induced Landslide and Landslide Dam . . . . .</b>	<b>93</b>
	Ryoichi Ohno, Satoshi Niwa, Hideya Iwata and Sachihiko Ozawa	
<b>11</b>	<b>Warning/Evacuation and Monitoring Methods for Earthquake-Induced Landslides . . . . .</b>	<b>101</b>
	Michiya Irasawa, Akira Suemine and Yuichi Ueno	
<b>12</b>	<b>Historical and Prehistoric Earthquake-Induced Landslides in Japan . . . . .</b>	<b>109</b>
	Subcommittee for Historical Earthquake Landslide Studies in the Earthquake-Induced Landslide Program, the Japan Landslide Society (JLS-ELRP)	
<b>13</b>	<b>The Classification and Features of Earthquake-Induced Landslides in the World . . . . .</b>	<b>117</b>
	Masao Yamada, Gonghui Wang and Keiji Mukai	
<b>14</b>	<b>Relationship Between Geological Structure and Landslides Triggered by the 2007 Mid-Niigata Offshore Earthquake . . . . .</b>	<b>125</b>
	Tamotsu Nozaki and Baator Has	

## Part III Case Study

<b>15</b>	<b>Catastrophic Landslides of Pyroclastics Induced by the 2011 off the Pacific Coast of Tohoku Earthquake . . . . .</b>	<b>139</b>
	Masahiro Chigira, Akito Nakasuji, Shinya Fujiwara and Masayuki Sakagami	

<b>16</b>	<b>Earthquake-Induced Landslides in the Roadside Slopes of East Nepal After Recent September 18, 2011 Earthquake . . . . .</b>	<b>149</b>
	Ranjan Kumar Dahal, Netra Prakash Bhandary, Manita Timilsina, Ruichi Yatabe and Shuichi Hasegawa	
<b>17</b>	<b>Characteristics of Earthquake-Induced Landslides in Heavy Snowy Area: The Case of the Northern Nagano Prefecture Earthquake, March 12, 2011, Japan . . . . .</b>	<b>159</b>
	Baator Has, Kiichiro Ogawa, Satoshi Onoda, Tomoyuki Noro, Kiyoteru Maruyama and Akira Nakamura	
<b>18</b>	<b>Types and Characteristics of Typical Landslides Triggered by the M8.0 Wenchuan Earthquake . . . . .</b>	<b>169</b>
	Xiuzhen Li and Jiming Kong	
<b>19</b>	<b>Study on the Development Characteristics of a Typical Case of Sliding-Flow Type Landslide Induced by Wenchuan Earthquake. . . . .</b>	<b>179</b>
	Jiming Kong, Peifeng Han and Yun Cui	
<b>20</b>	<b>Geomorphologic and Geologic Features of Landslides Induced by the 2011 Off the Pacific Coast of Tohoku Earthquake, in Shirakawa Hills, Fukushima Prefecture. . . . .</b>	<b>189</b>
	Hiroyuki Sugimoto, Toshiya Takeshi, Tadakazu Uto and Hiroki Honma	
<b>21</b>	<b>A Long-Traveling Landslide in Deep Snow Conditions: A Case Study of the Tatsunokuchi Landslide Induced by the 2011 North Nagano Prefecture Earthquake . . . . .</b>	<b>203</b>
	Shintaro Yamasaki and Hidehisa Nagata	
<b>22</b>	<b>Re-Evaluation of Factors Controlling Landslides Triggered by the 1999 Chi-Chi Earthquake. . . . .</b>	<b>213</b>
	Chyi-Tyi Lee	
<b>23</b>	<b>Earthquake-Induced Landslides in Slovenia: Historical Evidence and Present Analyses . . . . .</b>	<b>225</b>
	Matjaž Mikoš, Mateja Jemec, Mihael Ribičič, Magda Čarman and Marko Komac	
<b>24</b>	<b>Karstification as a Predisposing Factor of Seismically Triggered Landslides: Case Study from the Crimean Mountains (Ukraine): Introduction to the Problem . . . . .</b>	<b>235</b>
	Jan Hradecký, Tomáš Pánek, Karel Šilhán and Veronika Smolková	

<b>25</b>	<b>Low-Gradient Megalandslides at the Northern Boundary of the Caucasus-Crimean Orogene: Seismically Induced? . . . . .</b>	<b>243</b>
	Tomáš Pánek, Jan Hradecký, Karel Šilhán, Alexander Strom, Veronika Smolková and Oleg Zerkal	
<b>26</b>	<b>On the Tasikmalaya Earthquake Induced Landslide in Indonesia: Field Investigation . . . . .</b>	<b>253</b>
	Aly Ahmed, Budi Brahmantyo and Keizo Ugai	
<b>27</b>	<b>Damages of Hillside Embankments in Sendai City During the 2011 Great East Japan Earthquake . . . . .</b>	<b>261</b>
	Tomohiro Mori, Yoshio Tobita and Takashi Okimura	
<b>28</b>	<b>Common Geographic and Geological Features of Earthquake-Induced Landslides in Northern Ibaraki Prefecture . . . . .</b>	<b>275</b>
	Yuichi Ueno	
<b>29</b>	<b>A Review of Recent Case Studies of Landslides Investigated in the Tien Shan Using Microseismic and Other Geophysical Methods . . . . .</b>	<b>285</b>
	Almaz Torgoev, Laura Lamair, Isakbek Torgoev and Hans-Balder Havenith	
<b>30</b>	<b>Topographical and Geological Features of Landslides Occurred in Kamikashiwazaki District in Tochigi Prefecture Causing by Great East Japan Earthquake . . . . .</b>	<b>295</b>
	Yoshimi Usui, Hiroshi Shimada, Hiroyuki Innami, Kiyoshi Amao, Takami Kanno and Tomoyuki Hiramatsu	
<b>31</b>	<b>Predicting Volume and Runout of Single Gully Debris-Flow Using Hypsometric Integral Value in the Wenchuan Earthquake Area . . . . .</b>	<b>301</b>
	Huaizhen Zhang, Jianrong Fan and Qing Liu	
<b>32</b>	<b>Features of Two Adjacent Landslides in Western Gunma Prefecture, Japan . . . . .</b>	<b>313</b>
	Hiroshi Hasegawa, Yasuhito Sato, Yoshiyuki Kotei and Yukio Hatakeyama	
<b>33</b>	<b>Case Study on Heavy Rainfall-Induced Reactivation of Seismically Disturbed Slope Caused by the 2011 off the Pacific Coast of Tohoku Earthquake. . . . .</b>	<b>323</b>
	Yoshimi Usui, Hiroshi Shimada, Hiroyuki Innami, Kiyosi Amao, Koji Higashi and Hideki Kawabata	

<b>34</b>	<b>The Characteristics of Landslides Induced by the Wenchuan Earthquake Based on High Spatial Resolution Remote Sensing Images . . . . .</b>	<b>331</b>
	Jianqiang Zhang and Fenghuan Su	
<b>35</b>	<b>A Case Study of Behavior Observation of Landslide Induced by Snowmelt After an Earthquake . . . . .</b>	<b>341</b>
	Hiroomi Nakazato, Daisuke Shoda, Keisuke Inoue and Hisato Suzuki	
<b>36</b>	<b>Landslides Induced by a 7.6 Magnitude Earthquake in the Northern Part of Pakistan on October 8, 2005 and Landslide Risk Reduction Through Implementation of Non-Structural Measures . . . . .</b>	<b>347</b>
	Yasushi Momose and Pucai Yang	
<b>37</b>	<b>Research on the Triggering Factors Analysis and Relevant Countermeasures of FaTing Mountain Landslide Induced by Wenchuan Earthquake . . . . .</b>	<b>355</b>
	Linrong Xu, Zheng Han, Shuyang Chen and Hongwei Chen	

#### **Part IV Mechanism**

<b>38</b>	<b>On the Initiation and Movement of Hanokidaira Landslide from the 2011 Tohoku Earthquake, Japan . . .</b>	<b>369</b>
	Gonghui Wang, Akira Suemine, Yoshiya Hata and Toshitaka Kamai	
<b>39</b>	<b>Numerical Insights into Mechanisms of Earthquake-Induced Catastrophic Landslides on Gentle Slopes in Liquefiable Soils . . . . .</b>	<b>379</b>
	Aurelian C. Trandafir, Ko-Min Tjok and Xiaoyan Long	
<b>40</b>	<b>Effects of Excess Pore Water Pressure on the Displacement of Failed Dip Slopes in 2004 Niigata-Ken Chuetsu Earthquake . . . . .</b>	<b>387</b>
	J. L. Deng, H. Kameya, Y. Miyashita, J. Kuwano, R. Kuwano, J. Koseki and L. Z. Chen	
<b>41</b>	<b>Velocity-Displacement Dependent Friction Coefficient and the Kinematics of Giant Landslide . . . . .</b>	<b>397</b>
	Jia-Jyun Dong, Che-Ming Yang, Wei-Lun Yu, Chyi-Tyi Lee, Yuki Miyamoto and Toshihiko Shimamoto	

<b>42</b>	<b>The Interpretation for Landslide Mechanism and The Proposal of Landslide Countermeasures in Abay Gorge in Ethiopia . . . . .</b>	<b>405</b>
	Masao Yamada, Kensuke Ichikawa, Takeshi Kuwano, Tomonari Takeuchi and Atsushi Nakagawa	
<b>43</b>	<b>Development of a Cyclic Box Shear Apparatus to Elucidate Mechanisms of Earthquake-Triggered Landslides . . . . .</b>	<b>417</b>
	Yoichi Hasegawa, Tatsuya Shibasaki and Takanari Yamasaki	
<b>44</b>	<b>Empirical Modal Decomposition of Near Field Seismic Signals of Tsaoiling Landslide . . . . .</b>	<b>421</b>
	Kuo-Jen Chang, Shao-Kuan Wei, Rou-Fei Chen, Yu-Chang Chan, Pi-Wen Tsai and Chih-Yu Kuo	
<b>45</b>	<b>Examining Fluidisation Mechanisms of Hikagemori Landslide Triggered by Iwate-Miyagi Nairiku Earthquake in 2008 by Laboratory Soil Tests . . . . .</b>	<b>431</b>
	Yasuhiko Okada, Ushio Kurokawa and Shiho Asano	
<b>46</b>	<b>Shaking Table Test of Embankment on Inclined Ground Affected by Rainfall . . . . .</b>	<b>437</b>
	Takaki Matsumaru, Motoaki Suga and Ryosuke Uzuoka	
<b>47</b>	<b>Dynamic Ring Shear Characteristics of Artificially Cemented Sand. . . . .</b>	<b>445</b>
	Motoyuki Suzuki, Hiroshi Takahara and Takeo Umezaki	
<b>48</b>	<b>Re-Estimation Method of Landslide-Triggering Rainfall Thresholds After an Earthquake with the Two Conceptual Models . . . . .</b>	<b>455</b>
	Yasuhiro Shuin, Norifumi Hotta, Masakazu Suzuki, Keigo Matsue, Kazuhiro Aruga and Toshiaki Tasaka	
<b>49</b>	<b>Niaozhisuo Landslide Dynamic Process . . . . .</b>	<b>465</b>
	Yunsheng Wang, Qiang Li, Yun Chen, Junfeng Wu, Junsheng Yue and Qinlong Hu	
<b>50</b>	<b>Initiation and Motion Mechanism of the Donghekou Rapid and Long Runout Landslide Triggered by the 2008 Wenchuan Earthquake, China . . . . .</b>	<b>473</b>
	Fawu Wang, Ping Sun, Lynn Highland and Qiangong Cheng	
<b>51</b>	<b>Natural Gas Eruption Mechanism for Earthquake Landslides: Illustrated with Comparison between Donghekou and Papandayan Rockslide-Debris Flows . . .</b>	<b>485</b>
	Quentin Z. Q. Yue	

<b>52</b>	<b>Three-Dimensional Stability Analysis for Evaluation of Drainage Effect for Earthquake-Triggered Large Landslides . . . . .</b>	<b>495</b>
	Atsushi Nakamura, Masashi Koizumi, Fei Cai and Keizo Ugai	
<b>53</b>	<b>Centrifuge Model Tests on Seismic Slope Failure. . . . .</b>	<b>501</b>
	Chiharu Mikuni, Satoshi Tamate, Tomohito Hori and Naoaki Suemasa	
<b>54</b>	<b>Genetic Types of Large-Scale Landslides Induced by the Wenchuan Earthquake. . . . .</b>	<b>511</b>
	Q. Xu, S. Zhang and X. J. Dong	
<b>55</b>	<b>Kinetic Friction Coefficient and Mass Movement Process of Large Rock Avalanches Triggered by the Wenchuan Earthquake. . . . .</b>	<b>521</b>
	Jiawen Zhou, Zhiman Su and Xingguo Yang	
<b>56</b>	<b>Topographic Effect on Seismic Slope Behavior in a Shaking Table Test . . . . .</b>	<b>529</b>
	Qiang Xu and Hanxiang Liu	
<b>57</b>	<b>Evaluation of Effective Stress of an Unsaturated Soil Under Cyclic Loading . . . . .</b>	<b>537</b>
	T. Nishimura	
<b>58</b>	<b>Analysis of the Factors Affecting Slope Failures Distribution Within Northern Kanto Area due to The East Japan Great Earthquake . . . . .</b>	<b>547</b>
	Takanori Kimura, Akihiko Wakai and Kunihiro Higuchi	
<b>59</b>	<b>Landslide Risk Evaluation in a Suffered Inland Area in Tochigi Prefecture Due to the Great East Japan Earthquake. . . . .</b>	<b>555</b>
	Asumi Tabata, Akihiko Wakai, Kazunori Hayashi, Norihiro Tanaka and Shinro Abe	

## **Part V Simulation**

<b>60</b>	<b>Dynamic Simulation and Analysis of High-Speed and Long Run-Out Landslide Triggered by the Wenchuan Earthquake, China . . . . .</b>	<b>567</b>
	Yuan Jiao Zhang, Long Zhu Chen, Ai Guo Xing and Chao Qi	

<b>61</b>	<b>Simulation of the Largest Landslide Caused by the 2008 Wenchuan Earthquake by Rapid-Landslide-Movement Simulation. . . . .</b>	<b>575</b>
	T. Satoshi, S. Kyoji and N. Osamu	
<b>62</b>	<b>Pseudo-Static Stability Analysis of High Fill Slopes by the Shear Strength Reduction FEM . . . . .</b>	<b>583</b>
	Ting-Kai Nian, Dong-Chen Li, Hai-Yang Xu and Guang-Qi Chen	
<b>63</b>	<b>Fully Coupled Dynamic Effective Stress Analysis of the Nigiri Landslide Triggered by 2004 Niigata-Chuetsu Earthquake . . . . .</b>	<b>591</b>
	Fei Cai, Keizo Ugai, Akihiko Wakai and Seiichiro Kuroda	
<b>64</b>	<b>Numerical Analysis of Two Wooden House Damages Induced by Dune Liquefaction During 2007 Niigata Chuetsu-Offshore Earthquake . . . . .</b>	<b>599</b>
	Lingyu Xu, Fei Cai, Guoxin Wang, Keizo Ugai, Akihiko Wakai, Qingqing Yang and Atsuo Onoue	
<b>65</b>	<b>Three-Dimensional Virtual Reality Modeling of the Cikangkareng Rock Avalanche in Indonesia . . . . .</b>	<b>609</b>
	Andhitiawarman Nugraha and Keizo Ugai	
<b>66</b>	<b>Numerical Analysis of the Largest Landslide Induced by the Wenchuan Earthquake, May 12, 2008 Using DDA . . . . .</b>	<b>617</b>
	Yingbin Zhang, Guangqi Chen, Lu Zheng and Yange Li	
<b>67</b>	<b>Extension of the Liquefaction Strength Concept Under Cyclic Loading to the Modeling of Volcanic Clayey Soils . . . . .</b>	<b>627</b>
	Shigeki Tanaka, Hirotatsu Usami, Keisuke Matsushita and Akihiko Wakai	
<b>68</b>	<b>Parametric Numerical Study of Seismic Slope Stability and Verification of the Newmark Method . . . . .</b>	<b>635</b>
	Almaz Torgoev and Hans-Balder Havenith	
<b>69</b>	<b>Numerical Simulation of Granular Flows by DDA . . . . .</b>	<b>643</b>
	Qingqing Yang, Fei Cai, Keizo Ugai, Zhiman Su and Lingyu Xu	
<b>70</b>	<b>Analysis of a Embankment Landslide in Baoji-Chengdu Railway Induced by the 2008 Wenchuan Earthquake. . . . .</b>	<b>649</b>
	Shu-Wei Sun, Wei-Xin Dong, Yu-Zhen Yu and Jing Zheng	

<b>71</b>	<b>Mechanism and Stability Analysis of the 2010 Yushu Earthquake (<math>M_s7.1</math>)-Induced Landslide Based on Point Safety Factor of Stress State . . . . .</b>	<b>655</b>
	Wu Honggang, Yang Tao, Ma Huimin and Zhang Hongli	
<b>72</b>	<b>Strong Motion Estimation at the Kanaga Landslide, Nasukarasuyama City, Induced by the 2011 off the Pacific Coast of Tohoku Earthquake (<math>M_w9.0</math>) Based on Empirical Site Amplification and Phase Effects . . . . .</b>	<b>663</b>
	Yoshiya Hata, Gonghui Wang, Atsushi Nozu and Toshitaka Kamai	
<b>73</b>	<b>Finite Element Simulation for An Earthquake-Induced Landslide Considering Strain-Softening Characteristics of Sensitive Clayey Loam . . . . .</b>	<b>671</b>
	Tomoyuki Fukushima, Keisuke Matsushita, Hirotatsu Usami and Akihiko Wakai	
<b>74</b>	<b>Case Studies on Seismically Induced Slope Failures in Terms of Energy. . . . .</b>	<b>679</b>
	Takaji Kokusho and Tomohiro Ishizawa	

## **Part VI Hazard Mapping and Risk Management**

<b>75</b>	<b>The Tree-Ring Reconstruction of Slope Instabilities Associated with Earthquakes (The Crimean Mts., Ukraine) . . . . .</b>	<b>689</b>
	Karel Šilhán, Tomáš Pánek and Jan Hradecký	
<b>76</b>	<b>Case Example of GIS Utilization on Abay Gorge's Landslide Survey in Ethiopia . . . . .</b>	<b>699</b>
	Yoshimizu Gonai, Satoru Tsukamoto, Mitsuya Enokida, Kensuke Ichikawa, Atsushi Nakagawa and Tomonari Takeuchi	
<b>77</b>	<b>Features and Distribution of Landslides in the 2011 Earthquake of the Pacific Coast of Tohoku . . . . .</b>	<b>707</b>
	Shoji Doshida and Shoichiro Uchiyama	
<b>78</b>	<b>Quick Identification of Regional Earthquake-Induced Landslides Based on Sharp NDVI Change . . . . .</b>	<b>715</b>
	Jiayuan Lin and Guiyun Zhou	
<b>79</b>	<b>Earthquake-Induced Landslide Hazard Zoning of the Island of Hawai'i . . . . .</b>	<b>725</b>
	Peter Nicholson and Shailesh Namekar	

<b>80</b>	<b>Assessment of Hazard and Contributing Factors of Landslides in Abay Gorge in Ethiopia . . . . .</b>	<b>737</b>
	Takeshi Kuwano, Mitsuya Enokida, Satoru Tsukamoto, Kensuke Ichikawa, Atsushi Nakagawa and Tomonari Takeuchi	
<b>81</b>	<b>Risk Assessment for the Earthquake-Induced Slope Failures Using the Micro-Zoning Technique Applied for Mountain Area in Japan. . . . .</b>	<b>745</b>
	Akio Yamamoto, Shun-ichi Azuma, Yoshiaki Inagaki, Katsuhiro Shirai and Tetsuro Kitahara	
<b>82</b>	<b>Progressive Failure Cycles and Distributions of Earthquake-Triggered Landslides . . . . .</b>	<b>755</b>
	Robert Parker, David Petley, Alexander Densmore, Nicholas Rosser, David Damby and Matthew Brain	
<b>83</b>	<b>Distribution of Landslides Induced in Iwaki City, Japan, by Two Large-scale Earthquakes in 2011. . . . .</b>	<b>763</b>
	Go Sato, Kazunori Hayashi, Hiroshi Yagi and Daisuke Higaki	
<b>84</b>	<b>Assessment of Earthquake-Induced Landslides Triggered by Roudbar-Manjil Earthquake in Rostamabad(Iran) Quadrangle Using Knowledge-Based Hazard Analysis Approach . . . . .</b>	<b>769</b>
	Mohammadreza Mahdavifar and Parham Memarian	
<b>85</b>	<b>Identifying Landslides Using Binary Logistic Regression and Landslide Detection Index . . . . .</b>	<b>781</b>
	Wentao Yang, Peijun Shi and Lianyou Liu	
<b>86</b>	<b>A Comparison of Predicted and Observed Slope Failures Due to the 2004 Niigata-Ken Chuetsu Earthquake . . . . .</b>	<b>791</b>
	J.-C. Jiang and S. Nakano	
<b>87</b>	<b>Distribution Characteristics and Slope Structure Types of Landslide/Rock Fall Along the Roads in the 2010 Yushu Earthquake (Ms7.1) Disaster Area . . .</b>	<b>799</b>
	Hongli Zhang, Honggang Wu, Daoyong Wu and Huimin Ma	
<b>88</b>	<b>Estimating the Strength Parameters of Geological Formations Using Fuzzy Sets and its Application in Generating Seismic-Landslide Hazard Maps . . . . .</b>	<b>807</b>
	Reza Majidi Feijani, Mohammad Reza Mahdavifar and Mohammad Kashanchi	

<b>89</b>	<b>Detection of 2011 off the Pacific Coast of Tohoku Earthquake-Induced Landslide Deformation Using InSAR . . . . .</b>	<b>817</b>
	Hiroshi P. Sato, Basara Miyahara, Takaki Okatani, Masayuki Yamanaka, Akira Suzuki, Tatsuo Sekiguchi, Mamoru Koarai, Izumi Kamiya and Hiroshi Yagi	

## **Part VII Monitoring and Countermeasure**

<b>90</b>	<b>Ground Anchor Structure for Seismic Resistance and Its Applications . . . . .</b>	<b>829</b>
	Koji Takeya	
<b>91</b>	<b>Analysis on the Time-Dependent Rotational Displacement of Retaining Wall During the Process of Earthquake . . . . .</b>	<b>839</b>
	H. Q. Yang, D. Huang, X. P. Zhou and Y. Chen	
<b>92</b>	<b>Prevention Works for ‘Namasu landslide’ in Gunma Prefecture and Behavior of the Landslide During the 2011 Earthquake off the Pacific Coast of Tohoku . . . .</b>	<b>849</b>
	Senro Kuraoka, Tamiaki Fujiwara and Tadashi Kudo	
<b>93</b>	<b>Newly Developed Method of Predicting Slope Collapse Places Triggered by Faults Combined with <math>\gamma</math>-Ray and Magnetic Susceptibility Survey . . . . .</b>	<b>857</b>
	Tatsuro Yoshimura and Naozo Fukuda	
<b>94</b>	<b>Observations on Earthquake Acceleration and Pore Water Pressure in a Hilly Region . . . . .</b>	<b>863</b>
	Shiho Asano, Hirotaka Ochiai and Yasuhiko Okada	
<b>95</b>	<b>A Simplified Technique for Slope Stability Assessment Based on Insitu S-Wave Velocity Measurement . . . . .</b>	<b>871</b>
	Mohsin Usman Qureshi, Suguru Yamada and Ikuo Towhata	
<b>96</b>	<b>Experimental and Analytical Studies of Landslides in the South of Ukraine Under the Action of Natural Seismic Impacts . . . . .</b>	<b>883</b>
	O. M. Trofymchuk, I. I. Kaliukh, H. S. Hlebachuk and V. P. Berchun	

## **Part VIII Landslide Dam and Post-Earthquake Phenomena**

<b>97</b>	<b>Rainfall Patterns of Post-seismic Debris Flows in the Wenchuan Earthquake Area . . . . .</b>	<b>895</b>
	Wei Zhou, Chuan Tang and Chun-hua Zhou	

<b>98</b>	<b>The Future in the Tangjiashan Dammed-Lake Resulted from the M8.0 Wenchuan Earthquake: Discussion on Several Scientific Issues . . . . .</b>	<b>901</b>
	Zhi-man Su, Peng Cui, Qing-qing Yang, Ugai Keizo and Fei Cai	
<b>99</b>	<b>Research on the Mechanism of Failure and Sediment Delivery of Landslide Dams in Debris Flow Channel . . . .</b>	<b>907</b>
	Zhu Xinghua, Cui Peng, Zhou Gongdan, Chen Huayong and Tang Jinbo	
<b>100</b>	<b>Mechanism of Landslide-Debris Flow-Barrier Lake Disaster Chain After the Wenchuan Earthquake . . . . .</b>	<b>917</b>
	Q. Zou, Z. M. Su and X. H. Zhu	
<b>101</b>	<b>Statistical Analysis of the Key Factors of Landslide Induced by Wenchuan Earthquake . . . . .</b>	<b>925</b>
	Runqiu Huang, Guo Li, Nengpan Ju and Jianjun Zhao	
<b>102</b>	<b>Simultaneous Debris Flows of 13 August 2010 in the Mianyu River Basin, China . . . . .</b>	<b>937</b>
	Weile Li, Runqiu Huang, Chuan Tang and Qiang Xu	
<b>103</b>	<b>The Disaster Chain of Earthquake Induced Landslides . . . . .</b>	<b>949</b>
	Guangqi Chen, Yange Li, Yingbin Zhang and Jian Wu	
<b>104</b>	<b>Post-seismic Surface Processes in the Zoumaling Gully in the Qingping Area, Southwestern China: Landslide, Debris-flow and Sediment Delivery . . . . .</b>	<b>959</b>
	Hong-zhi Chen, Zhi-man Su, Jian-zhong Wang and Zhi-quan Chen	
<b>105</b>	<b>Study on the Breakage Mode and Risk Analysis of Tangjiashan Barrier Dam . . . . .</b>	<b>965</b>
	Wen-jie Xu, Yu-xin Jie and Yu-zhen Yu	
<b>106</b>	<b>Characteristics, Hazards and Mitigation of Debris Flows Along Min River after the Wenchuan Earthquake . . . . .</b>	<b>975</b>
	Yonggang Ge, Peng Cui, Xingzhang Chen, Xinghua Zhu and Lingzhi Xiang	
<b>107</b>	<b>Multiple Predict Landslides in Giant Earthquake Struck Region: A Case Study in Chengdu, China . . . . .</b>	<b>989</b>
	Tian Hongling, Wang Meng, Yang Zongji and Qiao Jianping	

Earthquake-Induced Landslides

Proceedings of the International Symposium on  
Earthquake-Induced Landslides, Kiryu, Japan, 2012

Ugai, K.; Yagi, H.; Wakai, A. (Eds.)

2013, XVIII, 996 p. 843 illus., 627 illus. in color.,

Hardcover

ISBN: 978-3-642-32237-2
