The Changing Earth Science Network: Projects 2009–2011	1
1 ESA EO Science Strategy and the Support To Science Element (STSE)	2
2 The Changing Earth Science Network	4
3 Project List	7
 CARBONGASES—Retrieval and Analysis of Carbon Dioxide and Methane Greenhouse Gases from SCIAMACHY on Envisat	 9
1 Introduction	9
2 Methodology	10
3 Results	12
3.1 Carbon Dioxide	12
3.2 Methane	15
3.3 Validation	16
References	17
 CLARIFI—Aerosol Direct Radiative Effect in Cloudy Scenes Retrieved from Space-Borne Spectrometers	 21
1 Introduction	21
2 Theory	23
3 Results	24
4 Conclusions	28
References	28
 DIMITRI—Diagnostics of Mixing and Transport in Atmospheric Interfaces	 31
1 Introduction	32
2 Methodology and Data	33
3 Results: The Subtropical Barrier from Satellite Data	34
4 Conclusions	36
References	37

OCCUR—Study of the Chemistry—Climate Coupling in the UTLS Region with Satellite Measurements	39
1 Introduction	40
2 Production, Updating, and Maintenance of GMTR Level 2 Database of MIPAS Full Mission	41
3 Development of a Retrieval Algorithm Capable to Analyze SCIAMACHY Measurements	42
4 Sensitivity of Different Sensors to the UTLS Region	44
5 Summary and Conclusions	46
References	47
 DecPhy—Variability of the Phytoplankton Spring and Fall Blooms in the Northeastern Atlantic in the 1980s and 2000s	 49
1 Introduction	50
2 Data	50
3 Results	51
3.1 Basin-Scale Spatial Features and Seasonal Cycles	51
3.2 Chl and MLD Interannual Variability in 1979–1983 and 1998–2002	53
3.3 Wind Forcing and MLD Differences	54
4 Summary and Discussion	55
References	56
 INCUSAR—A Method to Retrieve Temporal Averages of 2D Ocean Surface Currents from Synthetic Aperture Radar Doppler Shift	 59
1 Introduction	59
2 Retrieval of Line-of-Sight Surface Currents from Envisat ASAR	60
3 Reconstruction of 2D Surface Currents from Line-of-Sight Components	62
4 Conclusions	66
References	67
 OC-Flux—Open Ocean Air-Sea CO₂ Fluxes from Envisat in Support of Global Carbon Cycle Monitoring	 69
1 Introduction	69
2 Global Scale Accuracy Assessment	70
3 Surface Biology and Temperature Gradients	70
4 Methodology	72
5 Evaluating Uncertainties in EO Methods Using In Situ Data	73
6 Impact of Vertical Temperature Gradients	74
7 Importance of Surface Biology	75
8 The Potential of Sentinel 3 Sensors for Studying Air-Sea Fluxes of CO ₂	76

9	Conclusions	76
	References	77

ISMER—Active Magmatic Processes in the East African Rift:

A Satellite Radar Perspective.	81
1 Introduction	82
2 Seismic Activity	83
2.1 The 2009 Karonga Earthquake Sequence	83
2.2 Seismic Swarms	85
3 Aseismic Deformation	86
3.1 Kenyan Rift	86
3.2 Main Ethiopian Rift	87
3.3 Western Branch	89
4 Conclusions	90
References	90

FEMM—Fire Effects Modelling and Mapping: An Approach

to Estimate the Spatial Variability of Burning Efficiency	93
1 Introduction	93
2 Methodology	94
2.1 Study Area and Satellite Data	94
2.2 Burning Efficiency Estimation	95
3 Results	97
4 Discussion	99
5 Conclusions	100
References	100

Index	103
