

Contents

1	Anatomical Considerations	1
1.1	Anatomy of Human Craniofacial Bones	1
1.2	Dental Anatomy	3
1.3	Dental Implantology	5
1.3.1	Definition of Dental Implant	5
1.3.2	Implantation Methods	6
1.3.3	Implantation Loading	6
1.3.4	Surface Topography	7
1.3.5	Material	7
	References	7
2	Treatment Options for Severely Atrophic Maxillae	9
2.1	Bone Quality	9
2.2	Potential of the Zygoma for Implantation	10
2.3	Edentulous Jaw Classification	11
2.4	Conventional Surgical Procedure by Using Bone Augmentation	12
2.5	Advanced Surgical Procedure by Zygomatic Implant Application	13
2.5.1	Advantages and Disadvantages of Zygomatic Implants	14
2.5.2	Indications and Contraindications	14
2.5.3	Types of Surgical Approach	16
2.5.4	Survival Rate of Zygomatic Implants	20
	References	23
3	Biomechanical Considerations	27
3.1	Force Distribution by Natural Teeth	27

3.2	Biomechanics of Implant-Bone Interface	28
3.2.1	Occlusal Forces in Patients Treated with Osseointegrated Implants	28
3.2.2	Force Transmission from Implants to Bone	28
3.3	Biomechanics of Implant-Supported Restorations	30
3.4	Biomechanical Considerations of Zygomatic Implant Application	31
3.4.1	Previous Biomechanical Study of Zygomatic Implants.	32
3.5	Finite Element Analysis in Dentistry	33
	References	35
4	Finite Element Modelling	37
4.1	Three-Dimensional Craniofacial Model Reconstruction	37
4.2	Pre-surgical Planning of Implants Fixation	41
4.3	Three-Dimensional Implant Models Construction	43
4.4	Virtual Surgery Simulation	45
4.5	Finite Element Analysis (FEA)	47
4.5.1	Solid Meshed Models Generation	47
4.5.2	Contact Modelling.	48
4.5.3	Material Properties Assignment	48
4.5.4	Boundary and Loading Conditions	49
4.6	Total Contact Area	50
	References	51
5	Bone and Prosthetic Component Responses in Various Occlusal Loading Locations	53
5.1	Mechanical Stress Distribution Within the Bones, Framework and Implants	53
5.1.1	Mechanical Stress Distribution Within the Bones	53
5.1.2	Mechanical Stress Distribution Within the Framework	55
5.1.3	Mechanical Stress Distribution Within the Implants	56
5.2	Displacement of Prosthetic Components.	60
	References	66
6	Bone and Prosthetic Component Responses in Various Occlusal Loading Directions.	67
6.1	Mechanical Stress Distribution Within the Bones, Framework and Implants	67
6.1.1	Mechanical Stress Distribution Within the Bones	67
6.1.2	Mechanical Stress Distribution Within the Framework	71
6.1.3	Mechanical Stress Distribution Within the Implants	72

Contents	xi
6.2 Displacement of Prosthetic Components	77
6.3 Deformation of Zygomatic Implant Body	82
6.4 Prosthetic Configuration Improvement	85
References	85
Summary	87
Index	89

Biomechanics in Dentistry: Evaluation of Different
Surgical Approaches to Treat Atrophic Maxilla Patients

Ishak, M.I.; Abdul Kadir, M.R.

2013, XIII, 91 p. 72 illus., Softcover

ISBN: 978-3-642-32602-8
