

Contents

1	Introduction	1
1.1	Introduction to Quantum Information Science	1
1.2	Photonic Quantum Information Science	3
1.3	Waveguide Chips for Quantum Optics	4
1.4	Thesis Summary	5
	References	6
2	Background and Methods	11
2.1	Introduction	11
2.2	Spontaneous Parametric Down Conversion	11
2.2.1	Degenerate Photon Pair Sources	14
2.2.2	Multi-Photon Sources	15
2.3	Single Waveguide Propagation	16
2.3.1	Ray Optics Description: Total Internal Reflection	17
2.3.2	An Electromagnetic Description: Guided Modes and Evanescent Fields	18
2.3.3	Coupled Waveguides: A Quantum Mechanical Description	21
2.4	Waveguide Architectures	22
2.4.1	Directly Written Waveguides in Silica	22
2.4.2	Silica-on-Silicon	23
2.4.3	Silicon Oxynitride Waveguide Arrays	25
2.4.4	Chip-Fibre Coupling	26
	References	27
3	The Hong–Ou–Mandel Effect in a Waveguide Directional Coupler	29
3.1	Introduction	29
3.2	Classical Particles on a Beamsplitter	29
3.3	Two Identical Photons on a Beamsplitter	30

3.4	Two Photon Quantum Interference in Directional Couplers	34
3.5	Three Photon Quantum Interference in a Directional Coupler . . .	35
3.6	Discussion	40
	References	40
4	Multi Directional-Coupler Circuit for Quantum Logic	41
4.1	Introduction	41
4.2	A Compiled Version of Shor’s Algorithm	42
4.3	Linear Optical CNOT Gate	44
4.4	Realising the Compiled Algorithm with a Waveguide Circuit . . .	46
4.5	Discussion	48
	References	49
5	Quantum Interference in a Waveguide Interferometer	51
5.1	Introduction	51
5.2	Integrated Mach Zehnder Interferometer with a Resistive Heating Element	52
5.3	Mach Zehnder Interferometer Matrix Representation	52
5.4	Hong–Ou–Mandel Interference in a Reconfigurable Waveguide Beam Splitter	55
5.5	Manipulation of Multi-Photon Entanglement: NOON State Manipulation for On-Chip Quantum Metrology	57
5.6	Multi-Photon Detection	61
5.7	Phase Control Calibration	62
5.8	Discussion	64
	References	65
6	Heralded NOON State Generation in Waveguide	69
6.1	Introduction	69
6.2	Waveguide Circuit for Heralding Path-Number Entangled NOON States Using Projective Measurement	70
6.2.1	Heralding Two Photon NOON States	71
6.2.2	Heralding Four Photon Entangled States	72
6.3	Heralding a Two Photon NOON State with Four Photons	72
6.4	Heralding a Four Photon NOON State with Six Photons	74
6.5	Higher Photon Number Contributions	76
6.6	Detection Scheme	77
6.7	Discussion	78
	References	78
7	Two Photon Quantum Walks	81
7.1	Introduction	81
7.2	The Continuous Time Quantum Walk	82
7.3	Continuous Time Quantum Walks Using Waveguide Arrays . . .	83

7.4	Correlated Quantum Walk of Two Photons.	85
7.5	Simulating Quantum Walks Using Photonic Quantum Interference.	88
7.6	Experimental Realisation of a Correlated Quantum Walk of Two Photons	90
7.7	Discussion	92
	References	93
8	Simulating Arbitrary Quantum Statistics with Entangled Photons	95
8.1	Introduction	95
8.2	Quantum Particle Statistics and Correlation Functions	96
8.2.1	Deriving the Two-Particle Correlation Function for Arbitrary Statistics	96
8.2.2	The N -Particle Correlation Function for Arbitrary Statistics	98
8.3	Simulating Quantum Interference of Two Arbitrary Particles with Entanglement.	99
8.3.1	Two-Particle Simulation	99
8.3.2	N -Particle Simulation	100
8.3.3	Circuit for Generating N -Partite, N -Level Entanglement	101
8.4	Experimental Realisation Two Particle Quantum Interference Simulation	104
8.5	Discussion	109
	References	110
9	Conclusions and Outlook	113
9.1	Key Results	113
9.2	Outlook	115
	References	116
