## Part I    Quantum Gravity

<b>1</b>	<b>String Theory, Unification and Quantum Gravity . . . . .</b>	<b>3</b>
	K.S. Stelle	
1.1	Introduction: The Ultraviolet Problems of Gravity . . . . .	3
1.2	String Theory Basics . . . . .	5
1.2.1	Reparametrization Invariance . . . . .	6
1.2.2	The String Action . . . . .	7
1.3	Effective Field Equations . . . . .	10
1.4	Dimensional Reduction and T-Duality . . . . .	12
1.4.1	Dimensional Reduction of Strings and T-Duality . . . . .	13
1.5	M-Theory and the Web of Dualities . . . . .	15
1.6	Branes and Duality . . . . .	17
1.7	The Onset of Supergravity Divergences . . . . .	20
1.7.1	Supergravity Counterterm Analysis . . . . .	22
1.7.2	Supergravity Divergences from Superstrings . . . . .	25
1.8	Other Aspects of String Theory . . . . .	26
1.8.1	The String Scale . . . . .	26
1.8.2	Boundaries of Moduli Space . . . . .	27
1.8.3	String and Gravity Thermodynamics . . . . .	28
1.9	Conclusion . . . . .	28
	References . . . . .	29
<b>2</b>	<b>Introduction to Loop Quantum Gravity and Cosmology . . . . .</b>	<b>31</b>
	Abhay Ashtekar	
2.1	Introduction . . . . .	31
2.1.1	Development of Quantum Gravity: A Bird's Eye View . . . . .	31
2.1.2	Physical Questions of Quantum Gravity . . . . .	36
2.2	Loop Quantum Gravity and Cosmology . . . . .	38
2.2.1	Viewpoint . . . . .	38
2.2.2	Advances . . . . .	40

2.2.3	Challenges and Opportunities . . . . .	47
	References . . . . .	55
<b>3</b>	<b>Covariant Loop Gravity . . . . .</b>	<b>57</b>
	Carlo Rovelli	
3.1	The Definition of the Theory . . . . .	57
3.2	Properties . . . . .	58
3.3	The Discretization of Parametrized Systems . . . . .	59
3.4	The Discretization of Classical General Relativity . . . . .	62
3.5	Conclusion . . . . .	64
	References . . . . .	65
<b>4</b>	<b>Spinor Gravity and Diffeomorphism Invariance on the Lattice . . . .</b>	<b>67</b>
	C. Wetterich	
4.1	Introduction . . . . .	67
4.2	Spinors as Fundamental Degrees of Freedom . . . . .	68
4.3	Action and Functional Integral . . . . .	71
4.4	Generalized Lorentz Transformations . . . . .	72
4.5	Lorentz Invariant Spinor Bilinears . . . . .	74
4.6	Action with Local Lorentz Symmetry . . . . .	75
4.7	Gauge and Discrete Symmetries . . . . .	77
4.8	Discretization . . . . .	78
4.9	Lattice Action . . . . .	79
4.10	Lattice Diffeomorphism Invariance . . . . .	81
4.11	Lattice Diffeomorphism Invariance in Two Dimensions . . . . .	83
4.12	Effective Action . . . . .	86
4.13	Metric . . . . .	87
4.14	Effective Action for Gravity and Gravitational Field Equations . .	89
4.15	Conclusions and Discussion . . . . .	90
	References . . . . .	92
<b>5</b>	<b>Introduction to Causal Dynamical Triangulations . . . . .</b>	<b>93</b>
	Andrzej Görlich	
5.1	Introduction . . . . .	93
5.1.1	Causal Triangulations . . . . .	94
5.1.2	The Regge Action and the Wick Rotation . . . . .	96
5.2	Phase Diagram . . . . .	98
5.3	The Macroscopic de Sitter Universe . . . . .	100
5.3.1	The Spatial Volume . . . . .	100
5.3.2	The Mini-superspace Model . . . . .	102
5.3.3	The Four-Dimensional Space-Time . . . . .	103
5.4	Quantum Fluctuations . . . . .	107
5.4.1	The Effective Action . . . . .	109
5.4.2	Flow of the Gravitational Constant . . . . .	112
5.5	The Geometry of Spatial Slices . . . . .	113
5.5.1	The Hausdorff Dimension . . . . .	113

5.5.2	Spectral Dimension . . . . .	115
5.6	Conclusions . . . . .	116
	References . . . . .	116
<b>6</b>	<b>Massive Gravity: A Primer . . . . .</b>	<b>119</b>
	E.A. Bergshoeff, M. Kovacevic, J. Rosseel, and Y. Yin	
6.1	Introduction . . . . .	119
6.2	General Spin . . . . .	121
6.2.1	“Boosting up the Derivatives” . . . . .	121
6.2.2	“Taking the Square Root” . . . . .	125
6.3	Spin 1 . . . . .	126
6.4	Spin 2 . . . . .	131
6.4.1	3D New Massive Gravity . . . . .	131
6.4.2	3D Topological Massive Gravity . . . . .	136
6.4.3	Extensions . . . . .	138
6.5	Conclusions . . . . .	139
	Appendix Exercises . . . . .	139
	References . . . . .	144

## Part II Quantum Cosmology

<b>7</b>	<b>Loop Quantum Cosmology, Space-Time Structure, and Falsifiability . . . . .</b>	<b>149</b>
	Martin Bojowald	
7.1	Introduction . . . . .	149
7.2	Canonical Gravity . . . . .	153
7.2.1	Cosmic Subtleties . . . . .	154
7.2.2	Deformations of Space . . . . .	156
7.2.3	Gauge Theory . . . . .	157
7.2.4	Quantum Corrections . . . . .	159
7.3	Loop Quantum Gravity . . . . .	160
7.3.1	Corrections from Loop Quantum Gravity . . . . .	162
7.3.2	Construction of Inverse-Triad Corrections . . . . .	163
7.3.3	Anomaly-Freedom . . . . .	164
7.3.4	Falsifiability . . . . .	166
7.3.5	Anomaly-Free Holonomy Corrections . . . . .	167
7.4	Effective Theories . . . . .	168
7.4.1	Effective Canonical Dynamics . . . . .	170
7.4.2	Moment Dynamics . . . . .	172
7.4.3	Effective Constraints . . . . .	174
7.4.4	Isotropic Cosmology . . . . .	177
7.4.5	Beginning . . . . .	179
7.5	Conclusions . . . . .	181
	References . . . . .	181
<b>8</b>	<b>Asymptotic Safety, Fractals, and Cosmology . . . . .</b>	<b>185</b>
	Martin Reuter and Frank Saueressig	
8.1	Introduction . . . . .	185

8.2	Theory Space and Its Truncation . . . . .	188
8.3	The Effective Average Action for Gravity . . . . .	192
8.4	The Einstein–Hilbert Truncation . . . . .	194
8.5	The Multi-fractal Properties of QEG Space-Times . . . . .	197
8.6	Spectral, Walk, and Hausdorff Dimension . . . . .	200
8.7	Fractal Dimensions Within QEG . . . . .	202
8.7.1	Diffusion Processes on QEG Space-Times . . . . .	202
8.7.2	The Spectral Dimension in QEG . . . . .	204
8.7.3	The Walk Dimension in QEG . . . . .	206
8.7.4	The Hausdorff Dimension in QEG . . . . .	206
8.7.5	Relations Between Dimensions . . . . .	207
8.8	The RG Running of $\mathcal{D}_s$ and $\mathcal{D}_w$ . . . . .	207
8.9	Matching the Spectral Dimensions of QEG and CDT . . . . .	210
8.10	Asymptotic Safety in Cosmology . . . . .	213
8.10.1	RG Improved Einstein Equations . . . . .	214
8.10.2	Solving the RG Improved Einstein Equations . . . . .	214
8.10.3	Inflation in the Fixed-Point Regime . . . . .	215
8.10.4	Entropy and the Renormalization Group . . . . .	217
8.10.5	Primordial Entropy Generation . . . . .	219
8.10.6	Entropy Production for RG Trajectory Realized by Nature . . . . .	221
8.11	Conclusions . . . . .	223
	References . . . . .	223
<b>9</b>	<b>Holography for Inflationary Cosmology . . . . .</b>	<b>227</b>
	Paul McFadden	
9.1	Introduction . . . . .	227
9.2	Domain-Walls and Cosmologies . . . . .	230
9.2.1	Defining the Perturbations . . . . .	230
9.2.2	Dynamics . . . . .	232
9.2.3	The Domain-Wall/Cosmology Correspondence . . . . .	234
9.2.4	Cosmological Power Spectra . . . . .	236
9.3	Holography for Cosmology . . . . .	237
9.3.1	Background Solutions . . . . .	238
9.3.2	Basics of Holography . . . . .	238
9.3.3	Hamiltonian Holographic Renormalisation . . . . .	240
9.3.4	The Stress Tensor 2-Point Function . . . . .	243
9.3.5	Holographic Analysis . . . . .	244
9.3.6	Holographic Formulae for the Power Spectra . . . . .	249
9.4	Holographic Phenomenology for Cosmology . . . . .	250
9.4.1	A Prototype Dual QFT . . . . .	251
9.4.2	Calculating the Holographic Power Spectra . . . . .	252
9.5	Confronting Observations . . . . .	257
9.6	Conclusion . . . . .	263
	References . . . . .	265

### Part III Observational Status

<b>10</b>	<b>Observational Status of Dark Matter</b>	271
	Joseph Silk	
10.1	Introduction	271
10.2	The Observational Case	272
10.3	From Galaxies to Clusters	272
10.3.1	Galaxy Rotation Curves	272
10.4	Large-Scale Structure	274
10.4.1	Redshift Space Distortions	274
10.4.2	Baryon Acoustic Oscillations	275
10.4.3	Cosmic Microwave Background	275
10.5	Future Prospects in Observation	275
10.6	Future Prospects in Astrophysical Theory	276
10.7	Direct Detection	279
10.8	Indirect Detection	279
10.8.1	Helioseismology	280
10.8.2	High Energy Cosmic Rays	280
10.8.3	Gamma Rays	281
10.8.4	The WMAP Microwave Haze	281
10.8.5	Decaying Dark Matter	282
10.9	The Future	282
10.9.1	The Sun	282
10.9.2	Direct Detection	283
10.9.3	Air Cerenkov Telescopes	283
10.9.4	Strange Stars	283
10.9.5	The Galactic Centre	284
10.9.6	LHC	284
10.10	Summary	284
	References	285
<b>11</b>	<b>Dark Energy: Observational Status and Theoretical Models</b>	289
	Shinji Tsujikawa	
11.1	Introduction	289
11.2	Observational Constraints on Dark Energy	291
11.2.1	Supernovæ Ia Observations	291
11.2.2	CMB	294
11.2.3	BAO	296
11.3	Cosmological Constant	298
11.4	Modified Matter Models	300
11.4.1	Quintessence	301
11.4.2	k-Essence	304
11.4.3	Coupled Dark Energy	307
11.4.4	Unified Models of Dark Energy and Dark Matter	311
11.5	Modified Gravity Models	313
11.5.1	$f(R)$ Gravity	313

11.5.2	Scalar-Tensor Theories . . . . .	319
11.5.3	DGP Model . . . . .	323
11.6	Conclusions . . . . .	325
	References . . . . .	326
<b>12</b>	<b>Unconventional Cosmology . . . . .</b>	<b>333</b>
	Robert H. Brandenberger	
12.1	Introduction . . . . .	333
12.1.1	Overview . . . . .	333
12.1.2	Review of Inflationary Cosmology . . . . .	335
12.1.3	Conceptual Problems of Inflationary Cosmology . . . . .	337
12.2	Matter Bounce . . . . .	339
12.2.1	The Idea . . . . .	339
12.2.2	Realizing a Matter Bounce with Modified Matter . . . . .	342
12.2.3	Realizing a Matter Bounce with Modified Gravity . . . . .	344
12.3	Emergent Universe . . . . .	345
12.3.1	The Idea . . . . .	345
12.3.2	String Gas Cosmology . . . . .	347
12.4	Cosmological Perturbations . . . . .	351
12.4.1	Overview . . . . .	351
12.5	Fluctuations in Inflationary Cosmology . . . . .	355
12.6	Matter Bounce and Structure Formation . . . . .	356
12.6.1	Basics . . . . .	357
12.6.2	Specific Predictions . . . . .	359
12.7	String Gas Cosmology and Structure Formation . . . . .	361
12.7.1	Overview . . . . .	361
12.7.2	Spectrum of Cosmological Fluctuations . . . . .	363
12.7.3	Key Prediction of String Gas Cosmology . . . . .	365
12.7.4	Comments . . . . .	367
12.8	Conclusions . . . . .	367
	References . . . . .	368
