

Contents

1	Introduction	1
1.1	History and Motivation	1
1.2	State Graphs, and State Surfaces Far from Fibers	4
1.3	Which Links are Semi-adequate?	7
1.4	Essential Surfaces and Colored Jones Polynomials	9
1.5	Volume Bounds from Topology and Combinatorics	12
1.6	Organization	13
2	Decomposition into 3-Balls	17
2.1	State Circles and State Surfaces	17
2.2	Decomposition into Topological Balls	20
2.3	Primeness	26
2.4	Generalizations to Other States	30
3	Ideal Polyhedra	35
3.1	Building Blocks of Shaded Faces	36
3.2	Stairs and Arcs in Shaded Faces	37
3.3	Bigons and Compression Disks	45
3.4	Ideal Polyhedra for σ -Homogeneous Diagrams	48
4	I-Bundles and Essential Product Disks	53
4.1	Maximal I -Bundles	53
4.2	Normal Squares and Gluings	56
4.3	Parabolically Compressing Normal Squares	62
4.4	I -Bundles are Spanned by Essential Product Disks	67
4.5	The σ -Adequate, σ -Homogeneous Setting	71
5	Guts and Fibers	73
5.1	Simple and Non-simple Disks	73
5.2	Choosing a Spanning Set	77
5.3	Detecting Fibers	82

5.4	Computing the Guts	83
5.5	Modifications of the Diagram	86
5.6	The σ -Adequate, σ -Homogeneous Setting	89
6	Recognizing Essential Product Disks	91
6.1	2-Edge Loops and Essential Product Disks	91
6.2	Outline and First Step of Proof	96
6.3	Step 2: Analysis Near Vertices	97
6.4	Step 3: Building Staircases	102
6.5	Step 4: Inside Non-prime Arcs	107
7	Diagrams Without Non-prime Arcs	109
7.1	Mapping EPDs to 2-Edge Loops	110
7.2	A Four-to-One Mapping	114
7.3	Estimating the Size of E_c	117
8	Montesinos Links	119
8.1	Preliminaries	119
8.2	Polyhedral Decomposition	123
8.3	Two-Edge Loops and Essential Product Disks	128
8.4	Excluding Complex Disks	131
9	Applications	139
9.1	Volume Bounds for Hyperbolic Links	139
9.2	Volumes of Montesinos Links	144
9.3	Essential Surfaces and Colored Jones Polynomials	149
9.4	Hyperbolic Volume and Colored Jones Polynomials	152
10	Discussion and Questions	155
10.1	Efficient Diagrams	155
10.2	Control Over Surfaces	157
10.3	Other States	159
10.4	A Coarse Volume Conjecture	159
	References	163

Guts of Surfaces and the Colored Jones Polynomial

Futer, D.; Kalfagianni, E.; Purcell, J.

2013, X, 170 p. 62 illus., 45 illus. in color., Softcover

ISBN: 978-3-642-33301-9
