

Contents

| | | |
|----------|---|----|
| 1 | Introduction | 1 |
| 1.1 | High Nitrogen Steels | 1 |
| 1.2 | High Interstitial Steels | 2 |
| 1.3 | Aim | 3 |
| 1.4 | Procedure | 4 |
| | References | 5 |
| 2 | Constitution | 7 |
| 2.1 | General Remarks | 7 |
| 2.2 | Variation of Interstitial Content | 8 |
| 2.3 | Effect of C/N Ratio | 9 |
| 2.4 | Variation of Substitutional Content | 11 |
| 2.4.1 | Chromium and Manganese | 11 |
| 2.4.2 | Molybdenum and Copper | 14 |
| 2.4.3 | Tramp Elements | 16 |
| 2.5 | Selection of Steels | 17 |
| | References | 19 |
| 3 | Structure | 21 |
| 3.1 | As-Quenched | 22 |
| 3.1.1 | Electron Structure: Calculated and Measured | 22 |
| 3.1.2 | Atomic Distribution | 28 |
| 3.1.3 | Chemical Nanoscale Homogeneity | 36 |
| 3.2 | Structural Change by Loading | 47 |
| 3.2.1 | Tensile Straining | 47 |
| 3.2.2 | Effect of Subzero Temperature | 59 |
| 3.2.3 | Effect of Strain Rate | 61 |
| 3.2.4 | Effect of Cyclic Loading | 68 |
| | References | 77 |

| | |
|---|-----|
| 4 Properties | 85 |
| 4.1 Mechanical Properties | 85 |
| 4.1.1 Tensile Properties at Room Temperature | 85 |
| 4.1.2 Tensile Properties at Subzero Temperatures | 88 |
| 4.1.3 Tensile Properties at Elevated Temperatures | 88 |
| 4.1.4 Creep Properties | 91 |
| 4.1.5 Hardness | 93 |
| 4.1.6 Notch Impact Toughness | 93 |
| 4.1.7 Rotating Bending Fatigue | 94 |
| 4.2 Wear Resistance | 95 |
| 4.2.1 Abrasive Wear | 96 |
| 4.2.2 Impact Wear | 96 |
| 4.2.3 Wear by Cavitation | 99 |
| 4.3 Corrosion Resistance | 99 |
| 4.3.1 Submersion Tests | 100 |
| 4.3.2 Current Density/Potential Tests | 102 |
| 4.3.3 Tests on Intercrystalline Corrosion | 106 |
| 4.4 Magnetic Properties | 106 |
| References | 108 |
| 5 Manufacture | 111 |
| 5.1 Melting and Casting | 112 |
| 5.1.1 Ingots | 112 |
| 5.1.2 Centrifugal Castings | 113 |
| 5.1.3 Sand Castings | 113 |
| 5.1.4 Refractories | 114 |
| 5.2 Hot Working | 115 |
| 5.3 Heat Treatment | 116 |
| 5.3.1 Solution Annealing | 116 |
| 5.3.2 Interrupted Quenching | 118 |
| 5.3.3 Continuous Quenching | 120 |
| 5.3.4 Aging | 123 |
| 5.4 Cold Drawing | 123 |
| 5.5 Welding | 124 |
| 5.6 Machining | 125 |
| References | 126 |
| 6 Assessment | 127 |
| 6.1 From Structure to Properties | 127 |
| 6.1.1 Mechanical Properties | 128 |
| 6.1.2 Wear Behaviour | 130 |
| 6.1.3 Corrosion Resistance | 130 |
| 6.1.4 Nonmagnetic State | 131 |

| | | |
|-------|--|------------|
| 6.2 | From Manufacture to Application | 131 |
| 6.2.1 | Constitution and Hot Manufacture. | 132 |
| 6.2.2 | Workhardening and Cold Manufacture | 133 |
| 6.2.3 | Application | 134 |
| 6.3 | Pros and Cons of HIS | 137 |
| 6.3.1 | Pros. | 137 |
| 6.3.2 | Cons | 138 |
| | References | 138 |
| | Appendix A: Tables. | 141 |
| | Appendix B: Figures | 151 |
| | About the Authors. | 163 |
| | Index | 165 |

High Interstitial Stainless Austenitic Steels

Berns, H.; Gavriljuk, V.; Riedner, S.

2013, X, 170 p., Hardcover

ISBN: 978-3-642-33700-0
