

Contents

- 1 Introduction to Metamaterials** 1
 - 1.1 The Concept of Metamaterials 1
 - 1.1.1 Basic Electromagnetic and Optical Properties 2
 - 1.1.2 Basic Structures 5
 - 1.1.3 Potential Applications 8
 - 1.2 Governing Equations for Metamaterials 13
 - 1.3 A Brief Overview of Computational Electromagnetics 17
 - 1.4 Bibliographical Remarks 18
- 2 Introduction to Finite Element Methods** 19
 - 2.1 Introduction to Finite Elements 19
 - 2.2 Functional Analysis and Sobolev Spaces 26
 - 2.2.1 Basic Functional Analysis 26
 - 2.2.2 Sobolev Spaces 27
 - 2.3 Classic Finite Element Theory 32
 - 2.3.1 Conforming and Non-conforming Finite Elements 32
 - 2.3.2 Basic Interpolation Error Estimates 35
 - 2.4 Finite Element Analysis for Elliptic Problems 39
 - 2.4.1 Abstract Convergence Theory 39
 - 2.4.2 Error Estimate for an Elliptic Problem 40
 - 2.5 Finite Element Programming for Elliptic Problems 42
 - 2.5.1 The Basic Steps 43
 - 2.5.2 A MATLAB Code for Q_1 Element 49
- 3 Time-Domain Finite Element Methods for Metamaterials** 53
 - 3.1 Divergence Conforming Elements 53
 - 3.1.1 Finite Element on Hexahedra and Rectangles 53
 - 3.1.2 Interpolation Error Estimates 59
 - 3.1.3 Finite Elements on Tetrahedra and Triangles 62

3.2	Curl Conforming Elements	67
3.2.1	Finite Element on Hexahedra and Rectangles	67
3.2.2	Interpolation Error Estimates	75
3.2.3	Finite Elements on Tetrahedra and Triangles	79
3.3	Mathematical Analysis of the Drude Model	84
3.4	The Crank-Nicolson Scheme for the Drude Model	87
3.4.1	The Raviart-Thomas-Nédélec Finite Elements	87
3.4.2	The Scheme and Its Stability Analysis	88
3.4.3	The Optimal Error Estimate	90
3.5	The Leap-Frog Scheme for the Drude Model	96
3.5.1	The Leap-Frog Scheme	96
3.5.2	The Stability Analysis	97
3.5.3	The Optimal Error Estimate	101
3.6	Extensions to the Lorentz Model	107
3.6.1	The Well-Posedness of the Lorentz Model	107
3.6.2	The Crank-Nicolson Scheme and Error Analysis	109
3.6.3	Some Other Schemes	116
3.7	Extensions to the Drude-Lorentz Model	120
3.7.1	The Well-Posedness	120
3.7.2	Two Numerical Schemes	122
3.8	Bibliographical Remarks	125
4	Discontinuous Galerkin Methods for Metamaterials	127
4.1	A Brief Overview of DG Methods	127
4.2	Discontinuous Galerkin Methods for Cold Plasma	128
4.2.1	The Modeling Equations	128
4.2.2	A Semi-discrete Scheme	130
4.2.3	A Fully Explicit Scheme	133
4.2.4	A Fully Implicit Scheme	134
4.3	Discontinuous Galerkin Methods for the Drude Model	137
4.4	Nodal Discontinuous Galerkin Methods for the Drude Model	140
4.4.1	The Algorithm	141
4.4.2	MATLAB Codes and Numerical Results	143
5	Superconvergence Analysis for Metamaterials	151
5.1	A Brief Overview of Superconvergence Analysis	151
5.2	Superclose Analysis for a Semi-discrete Scheme	152
5.3	Superclose Analysis for Fully-Discrete Schemes	155
5.4	Superconvergence in the Discrete l_2 Norm	158
5.5	Extensions to 2-D Superconvergence Analysis	161
5.5.1	Superconvergence on Rectangular Edge Elements	161
5.5.2	Superconvergence on Triangular Edge Elements	168
6	A Posteriori Error Estimation	173
6.1	A Brief Overview of A Posteriori Error Analysis	173
6.2	A Posteriori Error Estimator for Free Space Model	174
6.2.1	Preliminaries	174

6.2.2	An Upper Bound of A Posterior Error Estimator	176
6.2.3	A Lower Bound of A Posterior Error Estimator	180
6.2.4	Zienkiewicz-Zhu Error Estimator	184
6.3	A Posteriori Error Estimator for Cold Plasma Model	186
6.3.1	Upper Bound of the Posteriori Error Estimator	188
6.3.2	Lower Bound of the Local Error Estimator.....	191
7	A Matlab Edge Element Code for Metamaterials	195
7.1	Mesh Generation	196
7.2	The Finite Element Scheme	199
7.3	Calculation of Element Matrices	201
7.4	Assembly Process and Boundary Conditions	202
7.5	Postprocessing	205
7.6	Numerical Results	208
7.7	Bibliographical Remarks	213
8	Perfectly Matched Layers	215
8.1	PMLs Matched to the Free Space	215
8.1.1	Berenger Split PMLs	215
8.1.2	The Convolutional PML	221
8.1.3	The Uniaxial PML	222
8.2	PMLs for Lossy Media	224
8.2.1	Split PML	224
8.2.2	The Convolutional PML	227
8.2.3	The Uniaxial PML	227
8.2.4	Time Derivative Lorentz Material Model	228
8.3	PMLs for Dispersive Media and Metamaterials	231
8.3.1	Complex Frequency-Shifted Technique	232
8.3.2	Complex-Coordinate Stretching	235
8.4	Bibliographical Remarks	240
9	Simulations of Wave Propagation in Metamaterials	241
9.1	Interesting Phenomena of Wave Propagation in Metamaterials	241
9.1.1	Demonstration of a PML Model	241
9.1.2	The Multiscale Phenomena for Metamaterials	243
9.1.3	Demonstration of Backward Wave Propagation.....	245
9.2	Metamaterial Electromagnetic Cloak	250
9.2.1	Form Invariant Property for Maxwell's Equations	250
9.2.2	Design of Cylindrical and Square Cloaks	253
9.2.3	Cloak Simulation in the Frequency Domain	257
9.3	Time Domain Cloak Simulation.....	258
9.3.1	The Governing Equations	259
9.3.2	An Explicit Finite Element Scheme	262
9.4	Solar Cell Design with Metamaterials	265
9.4.1	A Brief Introduction	265
9.4.2	The Mathematical Formulation	268
9.4.3	Numerical Simulations	269

9.5	Problems Needing Special Attention.....	272
9.5.1	Unit Cell Design and Homogenization	272
9.5.2	A Posteriori Error Estimator	281
9.5.3	Concluding Remarks	281
References.....		285
