

# Contents

<b>1</b>	<b>Semi-quasihomogeneous Systems of Differential Equations .....</b>	<b>1</b>
1.1	Formal Asymptotic Particular Solutions of Semi-quasihomogeneous Systems of Differential Equations.....	1
1.2	Problems of Convergence.....	13
1.3	Exponential Methods for Finding Nonexponential Solutions.....	24
1.4	Examples .....	41
1.5	Group Theoretical Interpretation .....	55
<b>2</b>	<b>The Critical Case of Pure Imaginary Roots.....</b>	<b>77</b>
2.1	Asymptotic Solutions of Autonomous Systems of Differential Equations in the Critical Case of $m$ Pairs of Pure Imaginary and $n - 2m$ Zero Roots of the Characteristic Equation .....	77
2.2	Periodic and Quasiperiodic Systems .....	92
2.3	Hamiltonian Systems .....	108
<b>3</b>	<b>Singular Problems .....</b>	<b>131</b>
3.1	Asymptotic Solutions of Autonomous Systems of Differential Equations in the Critical Case of Zero Roots of the Characteristic Equation .....	131
3.2	Concerning Iterated Logarithms.....	143
3.3	Systems Implicit with Respect to Higher Derivatives and Kuznetsov's Theory .....	152
<b>4</b>	<b>Inversion Problem for the Lagrange Theorem on the Stability of Equilibrium and Related Problems .....</b>	<b>169</b>
4.1	On Energy Criteria for Stability .....	169
4.2	Regular Problems .....	189
4.3	Singular Problems.....	200

<b>A Nonexponential Asymptotic Solutions of Systems of Functional-Differential Equations .....</b>	<b>215</b>
<b>B Arithmetic Properties of the Eigenvalues of the Kovalevsky Matrix and Conditions for the Nonintegrability of Semi-quasihomogeneous Systems of Ordinary Differential Equations .....</b>	<b>229</b>
<b>Literature .....</b>	<b>249</b>
<b>Index .....</b>	<b>259</b>

Asymptotic Solutions of Strongly Nonlinear Systems of  
Differential Equations

Kozlov, V.V.; Furta, S.D.

2013, XX, 264 p., Hardcover

ISBN: 978-3-642-33816-8
