

Contents

1	Introduction	1
1.1	Markov Jump Linear Systems	1
1.2	Some Applications of MJLS	7
1.3	Prerequisites and General Remarks	11
1.4	Overview of the Chapters	11
1.5	Historical Remarks	13
2	A Few Tools and Notations	15
2.1	Outline of the Chapter	15
2.2	Some Basic Notation and Definitions	15
2.3	Semigroup Operators and Infinitesimal Generator	16
2.4	The Fundamental Theorem for Differential Equations	17
2.5	Continuous-Time Markov Chains	19
2.6	The Space of Sequences of N Matrices	23
2.7	Auxiliary Results	26
2.8	Linear Matrix Inequalities	29
3	Mean-Square Stability	33
3.1	Outline of the Chapter	33
3.2	The Models and Problem Statement	33
3.3	Main Operators and Auxiliary Results	36
3.4	Mean-Square Stability for the Homogeneous Case	44
3.4.1	MSS, StS, and the Spectrum of an Augmented Matrix	44
3.4.2	Coupled Lyapunov Equations	47
3.4.3	Summary	52
3.5	The $L_2^r(\Omega, \mathcal{F}, P)$ and Jump Diffusion Cases	52
3.5.1	The $L_2^r(\Omega, \mathcal{F}, P)$ Disturbance Case	53
3.5.2	The Jump Diffusion Case	55
3.5.3	Summary	58
3.6	Mean-Square Stabilizability and Detectability	59
3.6.1	Definitions and LMIs Conditions	59

3.6.2	Mean-Square Stabilizability with $\theta(t)$ Partially Known . .	61
3.6.3	Dynamic Output Mean-Square Stabilizability	64
3.7	Historical Remarks	68
4	Quadratic Optimal Control with Complete Observations	71
4.1	Outline of the Chapter	71
4.2	Notation and Problem Formulation	71
4.3	Dynkin's Formula	74
4.4	The Finite-Horizon Optimal Control Problem	76
4.5	The Infinite-Horizon Optimal Control Problem	79
4.6	Historical Remarks	81
5	H_2 Optimal Control with Complete Observations	83
5.1	Outline of the Chapter	83
5.2	Robust and Quadratic Mean-Square Stabilizability	83
5.3	Controllability, Observability Gramians, and the H_2 -Norm	85
5.4	H_2 Control via Convex Analysis	88
5.4.1	Preliminaries	88
5.4.2	Π Exactly Known	89
5.4.3	Π Not Exactly Known	91
5.5	The Convex Approach and the CARE	92
5.6	Historical Remarks	96
6	Quadratic and H_2 Optimal Control with Partial Observations	97
6.1	Outline of the Chapter	97
6.2	Finite-Horizon Quadratic Optimal Control with Partial Observations	98
6.2.1	Problem Statement	98
6.2.2	Filtering Problem	99
6.2.3	A Separation Principle for MJLS	105
6.3	The H_2 Control Problem with Partial Observations	112
6.3.1	Problem Statement	112
6.3.2	Filtering H_2 Problem	115
6.3.3	The Separation Principle	119
6.3.4	An LMIs Approach for the H_2 Control Problem	123
6.4	Historical Remarks	126
7	Best Linear Filter with Unknown $(x(t), \theta(t))$	127
7.1	Outline of the Chapter	127
7.2	Preliminaries	127
7.3	Problem Formulation for the Finite-Horizon Case	129
7.4	Main Result for the Finite-Horizon Case	131
7.5	Stationary Solution for the Algebraic Riccati Equation	136
7.6	Stationary Filter	139
7.6.1	Auxiliary Results and Problem Formulation	139
7.6.2	Solution for the Stationary Filtering Problem via the ARE .	147
7.7	Historical Remarks	149

8	H_∞ Control	151
8.1	Outline of the Chapter	151
8.2	Description of the Problem	151
8.3	The Bounded Real Lemma	153
8.3.1	Problem Formulation and Main Result	153
8.3.2	Proof of Proposition 8.3 and Lemma 8.4	156
8.4	The H_∞ Control Problem	165
8.5	Static State Feedback	166
8.6	Dynamic Output Feedback	167
8.6.1	Main Results	168
8.6.2	Analysis of Dynamic Controllers	170
8.6.3	Synthesis of Dynamic Controllers	176
8.6.4	H_∞ Analysis and Synthesis Algorithms	179
8.7	Historical Remarks	181
9	Design Techniques	183
9.1	Outline of the Chapter	183
9.2	Stability Radius	183
9.3	A Robustness Margin for Π	189
9.4	Robust Control	193
9.4.1	Preliminary Results	194
9.4.2	Robust H_2 Control	196
9.4.3	The Equalized Case	199
9.4.4	Robust Mixed H_2/H_∞ Control	200
9.5	Robust Linear Filtering Problem via an LMI's Formulation	201
9.5.1	The LMI's Formulation	202
9.5.2	Robust Filter	206
9.5.3	ARE Approximations for the LMI's Problem	208
9.6	Historical Remarks	210
10	Some Numerical Examples	213
10.1	Outline of the Chapter	213
10.2	An Example on Economics	213
10.3	Coupled Electrical Machines	217
10.3.1	Problem Statement	218
10.3.2	Mean-Square Stabilization	220
10.3.3	H_2 Control	220
10.3.4	Stability Radius Analysis	221
10.3.5	Synthesis of Robust Controllers	223
10.4	Robust Control of an Underactuated Robotic Arm	223
10.5	An Example of a Stationary Filter	226
10.6	Historical Remarks	230
Appendix A Coupled Differential and Algebraic Riccati Equations		231
A.1	Outline of the Appendix	231
A.2	Coupled Differential Riccati Equations	231
A.3	Maximal Solution	237

A.4	Stabilizing Solution	244
A.5	Filtering Coupled Algebraic Riccati Equations	246
A.6	Asymptotic Convergence	248
A.7	Filtering Differential and Algebraic Riccati Equation for Unknown $\theta(t)$	252
Appendix B	The Adjoint Operator and Some Auxiliary Results	257
B.1	Outline of the Appendix	257
B.2	Preliminaries	257
B.3	Main Results	258
