

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Background and Significance of the Research	1
1.1.1	Research Background	1
1.1.2	Significance of the Research	2
1.2	Research Progress: A Worldwide Review	2
1.2.1	The Effect of Freeze–Thaw on Soil Material Circulation	2
1.2.2	Accumulation and Release of Carbon and Nitrogen in Wetland Soils	7
1.2.3	Development Trends	11
1.3	Research Topics, Technical Scheme and Innovation	12
1.3.1	Research Topics	12
1.3.2	Research Methods	13
1.3.3	Technical Scheme	24
1.3.4	The Key Issues Addressed	24
1.3.5	Innovation	25
1.4	Chapter Summary	26
	References	26
<b>2</b>	<b>Overview of the Study Area</b>	<b>31</b>
2.1	Natural Conditions of the Study Area	31
2.1.1	Location	31
2.1.2	Topographical Features	31
2.1.3	Climate Conditions	33
2.1.4	Hydrological Characteristics	33
2.1.5	Distribution of Vegetation	33
2.2	Wetland Soil Background of the Studied Area	34
2.2.1	Characteristics of Wetland Soil Distribution	34
2.2.2	Physical Characteristics of the Soils	34
2.2.3	Chemical Properties of the Soils	35
2.3	Chapter Summary	36
	References	36

<b>3</b>	<b>Freeze–Thaw Principles of Wetland Soils</b>	37
3.1	The Variation of Wetland Ice and Snow During the Freeze–Thaw Period	37
3.2	Wetland Soil Temperature Variation During the Freeze–Thaw Period	40
3.2.1	Wetland Soil Temperature Changes with Water Depth and Thaw Depth	40
3.2.2	The Relationship Between Soil Thaw Depth and Soil Temperature	40
3.2.3	Temperature Variation in Wetland Soil Layers During the Freeze–Thaw Period	41
3.3	Chapter Summary	45
	References	45
<b>4</b>	<b>Dynamics of Dissolved Carbon and Nitrogen in Wetland Soil and its Overlying Ice and Water During the Freeze–Thaw Period</b>	47
4.1	Dynamics of Dissolved Carbon and Nitrogen in Wetland Soil During the Freeze–Thaw Period	47
4.1.1	Physicochemical Properties of Soil	47
4.1.2	Dynamics of Dissolved Carbon and Nitrogen in Wetland Soil During the Freeze–Thaw Period	48
4.2	Dynamics of Dissolved Carbon and Nitrogen in Overlying Ice of the Wetland During the Freeze–Thaw Period	51
4.3	Dynamics of the Dissolved Carbon and Nitrogen in Overlying Water of the Wetland During the Freeze–Thaw Period	53
4.4	Chapter Summary	55
	References	56
<b>5</b>	<b>Freeze–Thaw Effects on Sorption/Desorption of Dissolved Organic Carbon in Wetland Soils</b>	57
5.1	Sorption Behavior of DOC	59
5.2	Freeze–Thaw Effects on Sorption of DOC	60
5.3	Freeze–Thaw Effects on Desorption of DOC	62
5.4	Effects of Wetland Reclamation on the Soil Sorption/Desorption Behaviors of DOC	64
5.5	Chapter Summary	64
	References	65
<b>6</b>	<b>Freeze–Thaw Effects on Sorption/Desorption of Ammonium in Wetland Soils</b>	67
6.1	Soil Properties	68
6.2	Sorption of $\text{NH}_4^+$ in Soils Subject to FTCs	68
6.3	Desorption of $\text{NH}_4^+$ in the Soils Subject to FTCs	72
6.4	Ecological Implications of Freeze–Thaw Effect on $\text{NH}_4^+$	75
6.5	Chapter Summary	75
	References	76

<b>7</b>	<b>Effect of Freeze–Thaw on the Mineralization of Organic Carbon, and Organic Nitrogen in Wetland Soil</b>	79
7.1	Effect Freeze–Thaw on the Mineralization of Organic Carbon in the Soil of Wetland	80
7.1.1	Soil Physicochemical Properties	80
7.1.2	Freeze–Thaw Effects on the Mineralization of Organic Carbon in the Wetland Soil	80
7.2	The Effect of Freeze–Thaw on the Mineralization of Organic Nitrogen in Wetland Soil	84
7.3	Chapter Summary	87
	References	88
<b>8</b>	<b>Response of Soil Constituents to Freeze–Thaw Cycles in Wetland Soil Solution</b>	89
8.1	DOC in Soil Solutions	90
8.2	$\text{NH}_4^+$ –N in Soil Solutions	95
8.3	$\text{NO}_3^-$ –N in Soil Solutions	97
8.4	TDP in Soil Solutions	97
8.5	Freeze–Thaw Effects	101
8.6	Spatial Heterogeneity of the Freeze–Thaw Effects	102
8.7	Chapter Summary	104
	References	105
<b>9</b>	<b>Conclusions and Prospect</b>	107
9.1	Conclusions	107
9.1.1	The Freeze–Thaw Rules of Wetland Soils	107
9.1.2	The Dynamics of Dissolved Carbon and Nitrogen in Wetland Soils, Overlying Ice and Overlying Water During the Freeze–Thaw Period	108
9.1.3	The Freeze–Thaw Effects on the Sorption/Desorption of DOC	108
9.1.4	The Freeze–Thaw Effects on the Sorption/Desorption of $\text{NH}_4^+$	108
9.1.5	The Freeze–Thaw Effects on the Organic Carbon and Organic Nitrogen Mineralization of Wetland Soils	109
9.1.6	The Dynamics of Accumulation and Release of Dissolved Carbon and Nitrogen in Intact Wetland Soils	109
9.2	Shortness and Outlook of the Research	110
9.2.1	The Introduction of Biogeochemical Models	110
9.2.2	The Mineral Analysis and Microbial Identification	110
9.2.3	The Coupled Study of Field Simulation and Lab Experiment	111

Material Cycling of Wetland Soils Driven by Freeze-Thaw  
Effects

Yu, X.

2013, XII, 112 p., Hardcover

ISBN: 978-3-642-34464-0
